THE BIOLOGICAL FOUNDATIONS
OF MUSIC

Edited by Robert J. Zatorre and Isabelle Peretz
THE BIOLOGICAL FOUNDATIONS OF MUSIC

Editors
ROBERT J. ZATORRE AND ISABELLE PERETZ

This volume is the result of a conference entitled The Biological Foundations of Music held by the New York Academy of Sciences on May 20–22, 2000 at The Rockefeller University, New York, New York.

CONTENTS

Preface. By ROBERT J. ZATORRE AND ISABELLE PERETZ ix

Part I. The Origins of Music
Musical Predispositions in Infancy. By SANDRA E. TREHUB 1
The Quest for Universals in Temporal Processing in Music. By CAROLYN DRAKE AND DAISY BERTRAND 17
Music, Cognition, Culture, and Evolution. By IAN CROSS 28
Is Music an Evolutionary Adaptation? By DAVID HURON 43

Part II. The Musical Mind
Similarity, Invariance, and Musical Variation. By STEPHEN MCAFADAMS AND DANIEL MATZKIN 62
Tonal Cognition. By CAROL L. KRUMHANSL AND PETRI TOIVIAinnen 77

Part III. The Neurons of Music
Intracerebral Evoked Potentials in Pitch Perception Reveal a Functional Asymmetry of the Human Auditory Cortex. By CATHERINE LIÉGEOIS-CHAUVEL, KIMBERLY GIRAUD, JEAN-MICHEL BADIER, PATRICK MARQUIS, AND PATRICK CHAUVEL 117
The Neural Processing of Complex Sounds. By TIMOTHY D. GRIFFITHS 133
Part IV. The Musical Brain

Music and the Neurologist: A Historical Perspective. By John C. M. Brust... 143

Brain Specialization for Music: New Evidence from Congenital Amusia. By Isabelle Peretz

Cerebral Substrates for Musical Temporal Processes. By Sèverine Samson, Nathalie Ehrlé, and Michel Baulac... 166

Cerebral Substrates of Musical Imagery. By Andrea R. Halpern... 179

Neural Specializations for Tonal Processing. By Robert J. Zatorre... 193

Exploring the Functional Neuroanatomy of Music Performance, Perception, and Comprehension. By Lawrence M. Parsons... 211

Comparison between Language and Music. By Mireille Besson and Daniele Schön... 232

Musical Sound Processing in the Human Brain: Evidence from Electric and Magnetic Recordings. By Mari Tervanien... 259

How Many Music Centers Are in the Brain? By Eckart O. Altenmüller... 273

Part V. Musical Expertise/Brain Plasticity

The Brain of Musicians: A Model for Functional and Structural Adaptation. By Gottfried Schlaug and Chi Chen... 281

Representational Cortex in Musicians: Plastic Alterations in Response to Musical Practice. By C. Pantev, A. Engelien, V. Candia, and T. Elbert... 300

The Brain That Plays Music and Is Changed by It. By Alvaro Pascual-Leone... 315

Cortical Plasticity and Music. By Josef P. Rauschecker... 330

Part VI. Music and Related Cognitive Abilities

The Sounds of Poetry Viewed as Music. By Fred Lerdahl... 337

Music and Nonmusical Abilities. By E. Glenn Schellenberg... 355

Part VII. Poster Papers

Are Music and Language Homologues? By Steven Brown... 372

Ambiguous Musical Figures: Sequential Grouping by Common Pitch and Sound-Source Location versus Simultaneous Grouping by Temporal Synchrony. By Martine Turgeon and Albert S. Bregman... 375

Explaining Harmony: The Roles of Interval Dissonance and Chordal Tension. By Norman D. Cook... 382

Associations and Dissociations among Music Training, Tonal and Temporal Order Processing, and Cognitive Skills. By Christine K. Koh, Lola L. Cuddy, and Lorna S. Jakobson... 386

Playing the Piano by Heart: From Behavior to Cognition. By Rita Aiello... 389
