CONTENTS

Executive Summary 1

1 Introduction 11

2 Standards for Mathematics, Science, and Technology Education 17
   The Context in Which Standards Evolved, 18
   Developing National Standards in Mathematics, 20
   Developing National Standards in Science, 22
   Developing Standards for Technological Literacy, 24
   Commonalities Across the Mathematics, Science, and Technology Standards, 24

3 A Framework for Investigating the Influence of Education Standards 29
   An Overview of the U.S. Education System, 29
   One View of the Education System, 31
   The Elements of the Framework, 33
CONTENTS

4 Curriculum as a Channel of Influence: What Shapes What Is Taught to Whom? 39
   Curriculum in the Education System, 39
   Implications of Policy Decisions, 39
   Development of Instructional Materials and Programs, 41
   Selection Mechanisms, 42
   How Standards Might Influence Curriculum, 44
   The Curriculum Channel and Nationally Developed Standards, 46

5 Teacher Development as a Channel of Influence: How Do Teachers Learn What and How to Teach? 49
   Teacher Development in the Education System, 50
   Teacher Preparation, 50
   Certification and Licensure, 52
   Ongoing Professional Development, 53
   How Standards Might Influence Teacher Development, 55
   The Teacher Development Channel and Nationally Developed Standards, 57

6 Assessment and Accountability: What Kinds of Assessment Are Used and for What Purposes? 59
   Assessment and Accountability in the Education System, 60
   Accountability, 60
   Classroom Assessment, 62
   State and District Assessment and Accountability Policies, 63
   College Entrance and Placement Practices, 64
   Impact and Unintended Consequences of Assessment, 65
How Standards Might Influence Assessment and Accountability, 67

The Assessment and Accountability Channel and Nationally Developed Standards, 68

7 Contextual Forces that Influence the Education System 71

Who Affects the Education System from "Outside"?, 71
Outside Forces Affecting Decision Making, 73
Outside Forces Affecting Components Within the Education System, 74

How Can Nationally Developed Standards Influence Those "Outside" the System? How Might They, in Turn, Influence the Education System?, 75
Contextual Forces and Nationally Developed Standards, 76

8 Using the Framework 79

The Framework in Review, 79
How the Framework Can Be Used, 83
Situating Current Studies, 86
Examining Claims and Inferences Reported in Current Studies, 88
Generating Questions and Hypotheses for Future Investigations, 92
Aspirations for Framework-Driven Research on Nationally Developed Standards, 94

References 97
## Appendixes

A  Participants at the Workshop on Understanding the Influence of Standards in K-12 Science, Mathematics, and Technology Education  

B  A Framework for Investigating the Influence of Nationally Developed Standards for Mathematics, Science, and Technology Education  

C  Biographical Sketches  

Index  

### FIGURES, BOXES, AND TABLE

#### Figures

1-1 The Black Box, 12  

3-1 The Layers of Education Governance and Channels Through Which Reform Might Flow, 32  

3-2 A Conceptual Map for Investigating the Influence of Nationally Developed Standards for Mathematics, Science, and Technology Education, 34  

3-3 A Set of Guiding Questions for Investigating the Influences of Nationally Developed Standards, 35  

8-1 A Framework for Investigating the Influence of Nationally Developed Standards for Mathematics, Science, and Technology Education, 80  

8-2 Parts of the Framework Addressed in the Briars and Resnick Study, 87
Boxes

2-1 Basic Principles and Features of *Principles and Standards for School Mathematics*, 21

2-2 Basic Principles and Features of *National Science Education Standards*, 23

2-3 Basic Principles and Features of *Standards for Technological Literacy: Content for the Study of Technology*, 25

Table

8-1 Hypothetical Studies That Address One or More of the Framework Questions, 84
