## CONTENTS

**Foreword**

**Acknowledgements**

1. **Introduction** (*Peter Auer and Sandrine Cazes*)
   1.1 No more stable jobs? 1
   1.2 Country experiences: Trade-off or complementarity between employment and social protection 11
   1.3 The implications of these findings for employment analysis and policy advice 17

2. **The resilience of the long-term employment relationship** (*Peter Auer and Sandrine Cazes*)
   2.1 Introduction 22
   2.2 Evaluating job stability 22
   2.3 Job security versus job stability: How to measure job security? 47
   2.4 Explaining the paradox 53
   Annex 2.1 Sources and definitions of data 57

3. **“Flexicurity” through labour market policies and institutions in Denmark** (*Per Kongshøj Madsen*)
   3.1 Introduction 59
   3.2 The flexibility of the employment relationship 60
   3.3 Labour market effects of employment protection and labour market policies 90
   3.4 The “golden triangle” of flexicurity: Conclusions 100

4. **Flexibility, stability and the interaction between employment protection and labour market policies in France** (*Bénédicte Galtier and Jérôme Gautié*)
   4.1 Introduction 106
   4.2 Employment stability and flexibility 107
   4.3 Interactions between EPL and LMP: Regulations, institutions and programmes 125
   4.4 Interactions between EPL and LMP: Origins and outcomes 139
## Contents

4.5 Reforms affecting EPL and LMP  
4.6 Summary and conclusions  

5. **Stability and change: Japan’s employment system under pressure**  
   (Olivier Passet)  
   5.1 Introduction  
   5.2 The permanence of the Japanese model of “internal flexibility”, and its implications for job stability  
   5.3 The Japanese paradox: Acute perception of job insecurity in a context of job stability  
   5.4 Labour market policy and its effectiveness: Consistency with employment protection legislation  
   5.5 Conclusions  
   Annex 5.1 The Japanese numerical stability of employment  
   Annex 5.2 Younger workers: Voluntary flexibility or displaced employment opportunities?  

6. **Flexibility and commitment in the United States labour market**  
   (Paul Osterman)  
   6.1 Introduction  
   6.2 Aggregate measures of stability  
   6.3 The behaviour of firms  
   6.4 Public policy  
   6.5 Conclusion
