TOWARDS SUPREME MORALITY

An Attempt to Establish
THE NEW SCIENCE OF MORALOGY

CHIKURO HIROIKE, LL.D.

VOLUME ONE

THE INSTITUTE OF MORALOGY
CONTENTS

IV (C) The Motives and Reasons Involved in My Study of Moral Science (3)—The Great Contribution of Sociology 76

REFERENCE 1: The Name and Origin of Sociology
REFERENCE 2: An Explanation of Sociology
REFERENCE 3: Brief Biographies of Saint-Simon and Auguste Comte

V Sciences on Which the System of Moralogy Is Based 84
VI The Purposes of Moralogy 85
VII Moral Science and Ethics 85
VIII Moral Science and Religion 87

REFERENCE 1: A Few Examples of the Religious Persecution of Scholars in Europe
REFERENCE 2: Religionists' Approval of Science
ADDITIONAL NOTE (1) Differences between Moralogy and Religion
ADDITIONAL NOTE (2) The Meaning of "I Am My Own Lord"
ADDITIONAL NOTE (3) Concerning Human Attachment in Relation to the Meaning of "I Am My Own Lord"

CHAPTER TWO Moralogy and the Perfection of Human Life 99

I The Need for a True Solution to the Problems of Life 101
II Methods of Obtaining Happiness 101
III The Relation between the Practice of Morality and Its Effects 102
III. i On Methods of Practising Morality 102
III. ii The Conditions of Practising Morality 103
IV The Ideal of Morality and a Criterion for Practising Morality 105
V Moralogy and Various Conditions for Practising Morality 106
VI The Progress of Civilization and the Degree of Happiness That Mankind Enjoys 106

CHAPTER THREE The Given Causes of Man's Division into Classes 109

I The Meaning of Man's Division into Classes 111
II Relations between the Solar System, the Earth and Man; and Relations within Mankind 111

REFERENCE 1: The Web of Life
REFERENCE 2: Connection Based on the Circular Law; the Nonexistence of Absolute Superiority
REFERENCE 3: On the Idea and Examples of Solidarity
REFERENCE 4: Macrocosm and Microcosm

III The Origin and Development of Man 116

REFERENCE 1: Darwin's Theory of Evolution
REFERENCE 2: The Disappearance of the Doctrine of Special Creation
CONTENTS

REFERENCE 5: *Huxley's Theory of Man's Evolution*
REFERENCE 4: *Excavations Concerning the Origin of Man*
REFERENCE 5: *The Human Species*
REFERENCE 6: *A Theory on the Origin of Man*
REFERENCE 7: *A Genealogical Chart of Man and the Primates, and a Chronological Table of the Earth*
REFERENCE 8: *The Fact of Universal Mutuality and the Origin of the Species, with Comments on the Monism and Pluralism of the Human Race*

ADDITIONAL NOTE (4) *On the Evolution of Man*

IV The Relation between Man and Nature ........................................ 124
REFERENCE 1: *The Effect of Physical Environment and Social Environment*
REFERENCE 2: *The Relation between Seasons and Bodily Power and Health*
REFERENCE 3: *The Relation between Natural Energy and Men*

V The Influence of Society .............................................................. 129
REFERENCE: *An Explanation of Nature and Nurture*

VI Heredity ....................................................................................... 130
VI. i The Laws and Procedures of Heredity .................................... 130
VI. ii The Relation of Heredity with Continuous and Discontinuous Variations ................................................................. 136

ADDITIONAL NOTE (6) *Bud Variation*

VI. iii Mental Heredity ....................................................................... 138
VI. iv Theories on Acquired Character ........................................... 140
REFERENCE 1: *Actual Cases of Acquired Character Not Being Hereditary*
REFERENCE 2: *The Opinion that Acquired Character Is Not Hereditary Is General but Not Absolute.*

VI. v The Theory that Acquired Character Is Also Hereditary .......... 145
VI. v. 1 General Remarks ................................................................. 145
VI. v. 2 A Theory in Support of the Inheritance of Acquired Characters from the Viewpoint of Ontogeny and Phylogeny ............. 148
VI. v. 3 Facts of Heredity from the Viewpoint of Historical Statistics ............................................................. 149
VI. v. 4 Facts Concerning Heredity Revealed in One's Family Line 152
VI. v. 5 Facts Concerning Heredity in the Royal Families of Europe 158
VI. v. 6 Physiological and Psychological Explanation Concerning the Inheritance of Acquired Character ...................................... 162

VI. v. 7 Theories Concerning the Inheritance of Acquired Character, and Their Great Influence on Society ............................................ 164

VI. vi Germinal Heredity and Social Heredity ................................ 164

VII Eugenics and Euthenics .............................................................. 171
VII. i Eugenics .................................................................................. 171
VII. ii Euthenics ................................................................................ 172
CONTENTS

VII. iii The Effects of Eugenics and Euthenics on Human Happiness ........................................... 173

VIII Fatalism and the Theory of the Freedom of Will ......................................................... 173

CHAPTER FOUR Acquired Causes in The Making of Human Classes ..................... 175

I The Origin of Psychology and the History of Its Research Methods ................................................ 177

REFERENCE: On the Methods of Psychology

II Comparative Psychology, Animal Psychology, Child Psychology, Abnormal Psychology, Criminal Psychology, Social Psychology, Folk Psychology and Community Psychology .................................................. 180

REFERENCE 1: On the Relation between the Behaviour and Mentality of Man and Animals

REFERENCE 2: On the Aim and Method of Animal Psychology and the Errors of the Behaviourists

REFERENCE 3: On Child Psychology, Abnormal Psychology and Criminal Psychology

REFERENCE 4: On Folk Psychology, and Partly on Child Psychology and Animal Psychology

REFERENCE 5: On Social Psychology

REFERENCE 6: On Folk Psychology and Group Psychology

III Gradations in the Mental Development of Man and Animals as Inferred from Their Behaviour ................................................ 185

REFERENCE 1: The Method of Trial and Error, Tropism, Reflex Movements, Instinctive Action, Intelligence and Reason

REFERENCE 2: Amoebae and Monera

REFERENCE 3: Whether or Not Any Plant Has a Mind

IV Spiritualism, Materialism, Interactionism and Psychophysical Parallelism ..................... 189

REFERENCE 1: On Greek Spiritualism

REFERENCE 2: On Greek Materialism

REFERENCE 3: On Modern Interactionism

REFERENCE 4: On the Origin of Psychophysical Parallelism

V Psychophysical Parallelism, or the Double Aspect Theory; Its Substance and Objections against It ................................................ 192

REFERENCE 1: Scholars' Opinions on Psychophysical Parallelism

REFERENCE 2: Psychophysical Parallelism or the Double Aspect Theory

REFERENCE 3: The Merits of Psychophysical Parallelism

REFERENCE 4: Criticism on Psychophysical Parallelism

VI Physiological Psychology and Experimental Psychology ...... 198

REFERENCE 1: The Theory of Lotze
CONTENTS

REFERENCE 2: *Physiological Psychology*
REFERENCE 3: *Experimental Psychology*

VII The Results of Experiments Concerning the Interaction of Mind and Body ........................................... 201

VII. i Introduction ........................................... 201
VII. ii Glandular Psychology Expected ........................................... 201
VII. iii (a) Progress in the Method of Experimental Psychology ........................................... 202
REFERENCE 1: *Qualitative and Quantitative Experiments*
REFERENCE 2: *The Method of Impression and the Method of Expression*
REFERENCE 3: *Wundt's Tridimensional Theory of Feelings*
REFERENCE 4: *Criticism on Wundt's Tridimensional Theory of Feelings*

VII. iii (b) Apparatus for Experimental Psychology ........................................... 208
VII. iv Kinds of Expressions—External and Internal—of Emotion, Inclusive of Thought ........................................... 209
VII. v Emotional Expression ........................................... 210
REFERENCE: *The History of the Study of Emotional Expression*

VII. vi Emotions and the Viscera ........................................... 212
VII. vii Emotion and Thought Affecting the Circulation of Blood and Respiration ........................................... 213
VII. viii The Effects of Emotion on Hormones ........................................... 216
VII. ix The Effects of Emotion on the Amount of Sugar in the Blood ........................................... 217
VII. x Chemical Effects Produced by Emotion ........................................... 218
VII. xi The Effects of Emotion on the Lacteal Secretion ........................................... 219
VII. xii The Effects of Emotion on Digestion ........................................... 220
VII. xiii The Effects of Joyful Emotions ........................................... 222
VII. xiv Mental and Physical Fatigue and Its Results ........................................... 223
VII. xv The Effects of Repentance on the Body ........................................... 224
VII. xvi The Results of Acute Tension or Excitement ........................................... 225
VII. xvii The Effects of Excitement, Temporary, Continual or Accumulative ........................................... 229
REFERENCE: *The Result of the Wrath of God and of the Sages*

VII. xviii Explanations Concerning Mental or Religious Healing ........................................... 230
VII. xix Further Notes on Psychotherapy ........................................... 231
VII. xx The Evils of Excessive Evaluation of the Results of Mental or Physical Activity ........................................... 234
ADDITIONAL NOTE (7) *On Pian Que's Six Incurabilities*

VIII Empiricism in China, India and Japan Concerning the Relation between Mental Activity and Body ........................................... 236

IX The James-Lange Theory ........................................... 238
REFERENCE 1: *The Cause Theory and the James-Lange Theory*
REFERENCE 2: *The Doctrine of Empathy*

X Mind Governs Matter ........................................... 241
X. i (a) The Absurdity of Materialism and Spiritualism

REFERENCE: Extreme Materialism

X. i (b) An Explanation of Those Cases in Which Matter Stimulates the Body and Mind or, in Which the Body Controls the Mind (Important for Man's Existence by Way of Warning)

X. ii The Absurdity of Materialism Explained from the Viewpoint of the Regulative Principle

REFERENCE 1: The Constitutive Principle and the Regulative Principle
REFERENCE 2: The Twelve Tables of Rome

ADDITIONAL NOTE (9) Further Explanation on the Constitutive Principle and the Regulative Principle

X. iii The Absurdity of Materialism Explained from the Viewpoint of the Classification of Sciences

X. iv Theories That Deny the Possibility of Explaining the Phenomenon of Life in an Organic Body by Means of Inorganic Science Alone

REFERENCE: Further Quotations from Ribot and Thilly

Χ. v The Superiority of Human Mental Power Recognized by the Study of General Psychology and Community Psychology, Including Social Psychology

XI A Scientific Explanation of the Acquired Causes of Human Classes

CHAPTER FIVE The Fundamental Principle Concerning the Spiritual and Material Life of Mankind

I The Content of So-Called Mental Activity

ADDITIONAL NOTE (9) A Supplement to Emerson's Explanation of the Destiny of Abraham Lincoln

II A Distinction between Essentials and Non-essentials

III The Doctrine Concerning the Unity of Knowledge and Morality as Found in Socratism, Christianity, Buddhism, Confucianism and Ancient Japanese Thought

IV Scientific Verification Concerning the Unity of Knowledge and Morality

V The Unity of Knowledge and Morality

VI What Kind of Knowledge Accords with Morality?

CHAPTER SIX Observations on How Man's Past Mental Activity Has Caused His Present Physique, Ways of Life and Future Destiny

I Introduction

II Anthropological Observations

II. i The Nature of Anthropological Sciences
II. ii  The Development of Nerves and the Brain .................................. 275
II. iii  A Comparison of Human and Animal Brains, Skulls and
         Physical Characteristics ................................................. 275
II. iv  A Comparison of the Human Embryo and Foetus and
         Animal Embryos ............................................................. 284
II. v   Similarities in Human and Animal Infancy ............................... 285
II. vi  Differences in the Mental Aspects of Man and Animals .............. 285

REFERENCE: On the Changes in Instinct and Intellect Both in Man
         and Animals

ADDITIONAL NOTE (10) Differences between Man and Animals in
         Mental Aspect

ADDITIONAL NOTE (11) Distinctions between Man and Animals

II. vii Whether the Difference between Man and Animals Is One of
       Degree or One of Kind ................................................. 293
II. viii Human Race and Type .................................................. 294
II. ix  Knowledge, Morality and Destiny among Uncivilized Races ....... 296
III  Observations in the Light of the History of Civilization ............. 299
III. i  Whether Civilization Is a Product of Nature or a Product
        of Man ........................................................................... 299
III. ii Civilization Is the Result of the Accumulation of Human
       Power, That Is, Human Intellect and Morality,
       and Their Function. ............................................................ 301
III. iii The Importance of Emotional Elements in the Development
        of Mankind ..................................................................... 304
III. iv Scholars' Classification of the Stages of Human Progress,
       Such as Savagery, Barbarism, Civilization and Culture .......... 305
III. v  The Level of Civilization and the Type of Man ....................... 308
IV  Criminological Observation ...................................................... 308
IV. i  The Social Value of Criminology ........................................... 308
IV. ii The Classic School and the Positive School of Criminology;
       the Founder of the Positive School .................................... 311
IV. iii An Outline of Lombroso's Theory and Criticism
       Concerning It ..................................................................... 313
IV. iv  The Main Points of Enrico Ferri's Theory ............................... 315
IV. v  Criminals, Immoral Persons Having the Same Motives as
       Criminals, and Atavism ..................................................... 318
IV. vi  The Criminal Type and Kinds of Criminals ............................. 321
IV. vii Criminals Left Unpunished ................................................ 323
IV. viii The Purpose of the New Criminology ................................ 323
IV. ix  Criminal Anthropology and Criminal Sociology ..................... 323
      V  Phrenological Observations .............................................. 325
VI  Morality and the Countenance of Mankind ................................ 331
VII Scientific Verification of the Teachings of the Sages and
     Wise Men ........................................................................... 332
CHAPTER SEVEN  Investigations into Instinct, Knowledge, Morality, Social Constitution, the Nature of Civilization, and the Happiness of Mankind, with Regard to Their Interrelations
.................................................................................................................. 333
 I Facts Attesting to the Existence of Instinct, Intelligence, and the Moral Faculty for Self- and Group-Preservation, in Mankind and among Living Things in General .................. 335
   I. i Progress in the Concept of Self-Preservation and Self-Development ........................................... 335
   I. ii Anthropophagy or Cannibalism ................................................................................................. 336
   I. ii. 1 The Origins of Anthropophagy and Cannibals in the World ........................................... 336
   I. ii. 2 The Causes of Cannibalism and Its Forms ....................................................................... 336
   I. ii. 3 Aversion to Cannibalism .................................................................................................. 339
   I. ii. 4 Cannibalism Absent Among the Lower Savages .............................................................. 341
   I. iii The Abandonment of the Sick .............................................................................................. 342
   I. iv Abortion and Infanticide .......................................................................................................... 343
   I. v Treatment of the Aged ................................................................................................................ 345
      I. v. 1(a) Killing the Aged ........................................................................................................... 345
      I. v. 1(b) The Maltreatment of the Aged in the Present Age .................................................... 348
      I. v. 2 The Rise of the Custom of Respect for the Aged and the Custom of Filial Piety ....... 349
      I. v. 3 The Origins of the Veneration for the Aged and of Filial Piety ........................................ 353
 ADDITIONAL NOTE (3) Some Advice to the Reader Concerning the Study of Filial Piety
      I. v. 4 The Relation between the Custom of Veneration of the Aged and Human Culture ...... 365
      I. v. 5 The Love of Wife and Children Belongs to the Animal Instinct of Man, while Respect for the Aged Belongs to the Moral Instinct of Man ......................................................... 366
      I. v. 6 Filial Piety Which Is Formal and Which Is Practised in the Narrowest Sense Belongs to Conventional Morality, while Filial Piety Which Is Spiritual and Which Is Practised in the Broadest Sense Belongs to Supreme Morality ........ 367
   I. vi Sacrifice .................................................................................................................................... 367
      I. vi. 1 The Birth of the Idea of Sacrifice ......................................................................................... 367
      I. vi. 2 Instances of Human Sacrifice .......................................................................................... 368
      I. vi. 3 The Progress of Sacrifice in Method and Meaning .............................................................. 372
      I. vii Funereal Human Sacrifice .................................................................................................... 372
      II Theories Demonstrating the Stages from the Instinct of Self-Preservation to Morality ................................................................. 375
   II. i Studies Concerning the Stages from Human Instinct to Morality ........................................... 375
II. ii The Instinct of Self-Preservation and the Moral Instinct ........... 381
II. iii Modern Scientific Theories of Ethics Deriving Morality from the Instinct of Self-Preservation .................................................. 382
II. iii. 1 Utilitarianism ................................................................. 382
II. iii. 2 Evolutional Ethics ......................................................... 383
II. iii. 3 Self-Preservation Is the Fundamental Cause of the Birth of Morality: The Practice of Morality Fails if It Is Not Based on This Idea. .................................................. 385

III The Essence of Morality .......................................................... 387
III. i The Terms Good and Bad, Moral and Immoral are Derived from Comparisons of Human Conduct (i.e., 1. Morality Has No Definite Standard; 2. Progress in the Meaning and Method of Morality). .................................................. 387
III. ii Knowledge May Be Acquired in Isolated Life, while the Birth of Morality Requires Group Life. .................................................. 388
III. iii (a) Both Individual and Group Life Need Adaptation .......... 388
III. iii (b) Instances of Adaptation Required for Individual and Group Life .......................................................... 390
III. iv Morality Is the Custom of the Group; It Is the Method of Existence and Development of the Individual. .................................................. 392
III. v The Origin of Morality Based on Truths Which Are either Above or Other than the Principles of the Origin of Conventional Morality .................................................. 394
III. v. 1 Introduction ................................................................. 394
III. v. 2 Resistance to the Compelling Forces That Aim at the Convenience of the Ruler of the Group .................................................. 394
III. v. 3 The Origin of Deeds That Transcend the Customs of the Group for the Advancement of Mankind; The Value of Such Deeds .................................................. 395

REFERENCE: On the Distinction between Moral Ideas, Immoral Ideas and Non-Moral Ideas, and a Definition of Moral Ideas

III. vi Morality Advances from Compulsory Behaviour to Voluntary Behaviour; from the Heteronomous to the Autonomous. ... 396

IV The Order of Social Composition ............................................. 397
IV. i General Remarks .............................................................. 397
IV. ii The Gregarious Instinct .................................................... 399
IV. iii The Consciousness of Kind, and Homogeneous Association 400
IV. iv The Eating Instinct and the Reproductive Instinct .............. 401
IV. v The Order in Which the Composition of Society Begins with the Family and at Last Reaches the National Organization .... 403
IV. v. 1 Introduction ................................................................. 403
IV. v. 2 Which Was Primary, the Gregarious Life or the Family Life? ... 403
IV. v. 3 The Family as the Protoplasm of Society ....................... 405
IV. v. 4 The Development of Society, from Family to the State:
   Family, House, Gens, Clan, Phratry, Tribe, Race, People,
   and Commonwealth or State ........................................ 411

IV. v. 5 Two Kinds of Theory on the Order of the Composition
   of Society ....................................................................... 413

V Factors of Social Composition ........................................ 413

V. i The Purpose of Society and Heterogeneous Association ...... 413

V. ii The Individual Mind and the Group Mind ..................... 414

V. iii Various Phases of the Group Mind as a Factor in the
   Composition of Society .................................................. 415

V. iv Traditional Filial Piety and Loyalty Based on the Spirit of
   Self-Preservation Is Not Yet Morally Perfect. .................... 423

VI The Idea of Social Solidarity .......................................... 423

VI. i Note to the Reader about This Special Section on Social
   Solidarity ........................................................................ 423

VI. ii The Idea of Solidarity Agrees with the Law of Nature. .... 423

VI. iii The Idea of Social Solidarity in Recent Times ............... 425

VI. iv The Idea of Solidarity in Sociology, Ethics, Politics,
   Jurisprudence and Philosophy ......................................... 428

REFERENCE: The Theory of Solidarity Formulated by Duguit,
            and Studies in Japan by Specialists

VI. v The Idea of Solidarity and Its Application ..................... 433

VII The Value of Knowledge for the Composition and
   Development of Society ................................................. 433

VIII Religion and Education as Motive Powers of
   Social Progress .............................................................. 437

IX The Various Conditions Necessary for the Progress of
   Society—Invention, Discovery, Imitation, Suggestion,
   Sympathy, the Division of Labour, etc. ............................. 439

X The Essence of Social Composition .................................... 442

XI The Interrelation of the Essential Nature of Society, the
   Substance of Civilization and the Happiness of Mankind..... 449

XII The Causes of Social Classes .......................................... 450

ADDITIONAL NOTE (66) The Essence of the Universal Law of Nature,
the Constitutive Principle of Society So-Called in Sociology,
and the Constitutive Principle of Society in Moralogy
