THE OCCUPATIONAL ERGONOMICS HANDBOOK
SECOND EDITION

FUNDAMENTALS AND
ASSESSMENT TOOLS FOR
OCCUPATIONAL ERGONOMICS

Edited by
William S. Marras
The Ohio State University
Columbus, Ohio, U.S.A.

Waldemar Karwowski
University of Louisville
Louisville, Kentucky, U.S.A.
Contents

I Fundamentals of Ergonomics

1 A Guide to Certification in Professional Ergonomics ........................................ 1-1
   Dieter W. Jahns

2 Magnitude ofOccupationally-Related Musculoskeletal Disorders ................................ 2-1
   National Research Council Panel on Musculoskeletal Disorders and the Workplace

3 Legal Issues in Occupational Ergonomics ......................................................... 3-1
   George A. Peters and Barbara J. Peters

4 Cost Justification for Implementing Ergonomics Intervention .................................. 4-1
   Maurice Oxenburgh and Pepe Marlow

5 Humans in Work System Environment ................................................................ 5-1
   Holger Luczak, Sven Hinrichsen, and Susane Mutze-Niewohner

6 Human Factors and TQM ...................................................................................... 6-1
   Colin G. Drury

7 User-Centered Design of Information Technology .................................................. 7-1
   V. Kathlene Leonard, Kevin P. Moloney, and Julie A. Jacko

8 Application of Risk Theory in Man-Machine-Environment Systems ....................... 8-1
   Jura J Sinay, Hana Půcaiová, Melichar Kopas, and Milan Oravec

9 Engineering Anthropometry ................................................................................... 9-1
   Karl H.E. Kroemer

10 Human Strength Evaluation .................................................................................... 10-1
    Karl H.E. Kroemer

11 Biomechanical Basis for Ergonomics .................................................................... 11-1
    William S. Marras

12 Fundamentals of Manual Control .......................................................................... 12-1
    Max Mulder, Marinus M Van Paassen, John M. Flack and Richard J. Jagacinski

13 Cumulative Spine Loading ..................................................................................... 13-1
    Jack P. Callaghan

14 Low-Level Static Exertions .................................................................................... 14-1
    Gisela Sjoggaard and Bente Rona Jensen
II Assessment Tools

34 Overview of Ergonomic Assessment .................................................. 34-1
Chris Hamrick
35 Low Back Injury Risk Assessment Tools
Gary Mirka and Gwanseob Shin

36 Cognitive Task Analysis — A Review
Paul Salmon, Neville Stanton, Guy Walker, and Damian Green

37 Subjective Scales of Effort and Workload Assessment
B. Sherehiy and W. Karwowski

38 Rest Allowances
Stephan Konz

39 Wrist Posture in Office Work
Mircea Fagarasu and Shrawan Kumar

40 PLIBEL — A Method Assigned for Identification of Ergonomics Hazards
Kristina Kemmlert

41 The ACGIH TLV® for Hand Activity Level
Thomas J. Armstrong

42 REBA and RULA: Whole Body and Upper Limb Rapid Assessment Tools
Sue Hignett and Lynn McAtamney

43 An Assessment Technique for Postural Loading on the Upper Body (LUBA)
Dohyung Kee and Waldemar Karwowski

44 The Washington State SHARP Approach to Exposure Assessment
Stephen Bao, Barbara Silverstein, Ninica Howard, and Peregrin Spielholz

45 Upper Extremity Analysis of the Wrist
Andris Freivalds

46 Revised NIOSH Lifting Equation
Thomas R. Waters

47 Psychophysical Approach to Task Analysis
Patrick G. Dempsey

48 Static Biomechanical Modeling in Manual Lifting
Don B. Chaffin and Charles B. Woolley

49 Industrial Lumbar Motion Monitor
William S. Marras and W. Gary Allread

50 The ACGIH TLV® for Low Back Risk
William 5. Marras and Chris Hamrick
