

Oxford Handbook of Methods in Positive Psychology

Edited by

Anthony D. Ong
Manfred H. M. van Dulmen

OXFORD
UNIVERSITY PRESS

2007

Contents

Foreword	v		
<i>C. R. Snyder and Shane J. Lopez</i>			
Contributors	xv		
Introduction	xvii		
Major Content Areas Addressed by Chapters	xxi		
Part I. Intraindividual Variability			
P-Technique Factor Analysis			
1. P-Technique Factor Analysis as a Tool for Exploring Psychological Health	3		
<i>Constance J. Jones</i>			
2. Stepping Into the Light: Modeling the Intraindividual Dimensions of Hedonic and Eudaemonic Well-Being	12		
<i>Anthony D. Ong, John L. Horn, and David A. Walsh</i>			
Part II. Intraindividual Change			
Dynamic Factor Analysis			
3. The Structure of Daily Positive Affect for Persons With Parkinson's Disease: A Dynamic Factor Analysis	29		
<i>Kim Shifren and Karen Hooker</i>			
4. Application of Dynamic Factor Analysis to Affective Processes in Dyads	41		
<i>Emilio Ferrer</i>			
Part III. Interindividual Differences: Measurement Issues			
Structural Equation Modeling			
5. Multivariate Statistical Strategies for Construct Validation in Positive Psychology		61	
<i>Fred B. Bryant, Scott P. King, and Colette M. Smart</i>			
6. Understanding Hope: A Review of Measurement and Construct Validity Research		83	
<i>Lisa M. Edwards, Kevin L. Rand, Shane J. Lopez, and C. R. Snyder</i>			
7. Methodological Issues in the Assessment of the Affective Component of Subjective Well-Being		96	
<i>Ulrich Schimmack</i>			
8. Using Structural Equation Models to Validate Measures of Positive Emotions		111	
<i>Richard E. Lucas</i>			
9. The Application of Structural Equation Modeling and Item Response Theory to Cross-Cultural Positive Psychology Research		126	
<i>Shigehiro Oishi</i>			
10. Using the Combined Etic-Emic Approach to Develop a Measurement of Interpersonal Subjective Well-Being in Chinese Populations		139	
<i>Samuel M. Y. Ho and Mike W. L. Cheung</i>			

Measurement Invariance			
11. Assessing Factorial Invariance in Cross-Sectional and Longitudinal Studies	153	21. Wisdom as a Classical Human Strength: Psychological Conceptualizations and Empirical Inquiry	306
<i>Daniel E. Bontempo and Scott M. Hofer</i>		<i>Ute Kunzmann and Antje Stange</i>	
12. Dolce Far Niente: The Positive Psychology of Personality Stability and Invariance	176	22. Hardiness as a Dispositional Resource: Methods of Conceptualizing the Construct	323
<i>Robert R. McCrae, Antonio Terracciano, and Brigitte Khoury</i>		<i>K. A. Wallace and C. S. Bergeman</i>	
13. Measuring Emotional Intelligence: Promises, Pitfalls, Solutions?	189	Part IV. Interindividual Differences in Intraindividual Variability	
<i>Gerald Matthews, Moshe Zeidner, and Richard D. Roberts</i>		Spectral Analysis and Item Response Models	
Experimental Methods		23. Within-Person Covariation Analysis: Applications to the Study of Affect	339
14. Experimental Approaches to Individual Differences and Change: Exploring the Causes and Consequences of Extraversion	205	<i>Randy J. Larsen</i>	
<i>John M. Zelenski</i>		24. Using Item Response Models to Analyze Change: Advantages and Limitations	349
15. Understanding Individual and Age Differences in Well-Being: An Experimental Attention-Based Approach	220	<i>Judith Glück and Christiane Spiel</i>	
<i>Derek M. Isaacowitz</i>		25. Exploring Cyclic Change in Emotion Using Item Response Models and Frequency Domain Analysis	362
16. Psychophysiological Approaches to the Study of Laughter: Toward an Integration With Positive Psychology	233	<i>Sy-Miin Chow, Kevin J. Grimm, Frank Fujita, and Nilam Ram</i>	
<i>Paul G. Devereux and Kathi L. Heffner</i>		Dynamic Systems Analysis	
17. Some Measurement Issues in the Study of Affect	250	26. Dynamical Modeling for Studying Self-Regulatory Processes: An Example From the Study of Religious Development Over the Life Span	380
<i>Alice M. Isen and Amir Erez</i>		<i>Michael E. McCullough and Steven M. Boker</i>	
Behavior Genetics		27. Understanding the Adjustment to Widowhood: Using Dynamical Systems to Assess and Predict Trajectories of Well-Being	395
18. Natural Experiments: What Behavioral Genetic Approaches Can Tell Us About Human Potential	266	<i>Toni L. Bisconti and C. S. Bergeman</i>	
<i>C. S. Bergeman and Anthony D. Ong</i>		28. Application of Dynamic Systems Analysis to Dyadic Interactions	409
19. Cultural Aspects of Quantitative Genetic Investigations	282	<i>Diane H. Felmlee</i>	
<i>Keith E. Whitfield and Dwayne T. Brandon</i>		29. Nonlinear Dynamics of Positive Psychology: Parameters, Models, and Searching for a Systems Summum Bonum	423
Integrating Quantitative and Qualitative Approaches		<i>David Schulberg</i>	
20. Methodological Issues in Positive Psychology and the Assessment of Character Strengths	292		
<i>Nansook Park and Christopher Peterson</i>			

**Part V. Interindividual Differences
in Intraindividual Change**

30. Multilevel Models of Change:
Fundamental Concepts and
Relationships to Mixed Models
and Latent Growth-Curve
Models 439
*Scott E. Maxwell and
Stacey S. Tiberio*
- Latent Growth Analysis
31. Application of Latent Growth
Analyses to Health Outcomes
of Adolescent Girls 453
*Paolo Ghisletta and
Penelope K. Trickett*
32. The Use of Growth-Curve
Modeling in Estimating Stability
and Change in Well-Being
Over Time 467
*Daniel K. Mroczek and
Paul W. Griffin*
33. Understanding Journeys: Growth-
Curve Analysis as a Tool for
Studying Individual Differences
in Change Over Time 477
*Julie K. Norem and
Jasmina Burdzovic Andreas*
- Hierarchical Linear Modeling
34. Assessing the Ebb and Flow
of Daily Life With an Accent
on the Positive 487
*Alex J. Zautra, Glenn G. Affleck,
Mary C. Davis, Howard Tennen,
and Robert Fasman*
35. Using Experience Sampling and
Multilevel Modeling to Study
Person-Situation Interactionist
Approaches to Positive
Psychology 501
William Fleeson
36. Differentiation of the Distributions
of Inspiration and Positive Affect
Across Days of the Week:
An Application of Logistic
Multilevel Modeling 515
Todd M. Thrash
37. Multilevel Modeling of Motivation:
A Self-Determination Theory Anal-
ysis of Basic Psychological Needs 530
*Kirk Warren Brown and
Richard M. Ryan*
38. Individual and Situational Factors
Related to the Experience of Flow in
Adolescence: A Multilevel Approach 542
*Jennifer A. Schmidt,
David J. Shernoff, and
Mihaly Csikszentmihalyi*
39. Multilevel Modeling of Social
Interactions and Mood in Lonely
and Socially Connected Individuals:
The MacArthur Social
Neuroscience Studies 559
*Louise C. Hawkey,
Kristopher J. Preacher, and
John T. Cacioppo*
40. Positive Processes in Close Relation-
ships Across Time, Partners, and
Context: A Multilevel Approach 576
*Shelly L. Gable and
Jennifer G. La Guardia*
- Latent-Class Models
41. Latent-Class Models for Analyzing
Variability and Change 591
Michael Eid
42. Detecting Population Heterogeneity
in Stability and Change in Sub-
jective Well-Being by Mixture
Distribution Models 608
Michael Eid and Rolf Langeheine
- Index 633
