FACTOR ANALYSIS AT 100
Historical Developments and Future Directions

Edited by

Robert Cudeck
The Ohio State University

and

Robert C. MacCallum
University of North Carolina at Chapel Hill
Contents

Preface ix
Acknowledgments xiii

1 Factor Analysis in the Year 2004: Still Spry at 100 1
   Robert Cudeck

2 Three Faces of Factor Analysis 9
   David J. Bartholomew

3 Remembering L. L. Thurstone 23
   Lyle V. Jones

4 Rethinking Thurstone 35
   R. Darrell Bock

5 Factor Analysis and Its Extensions 47
   Karl G Jöreskog

6 On the Origins of Latent Curve Models 79
   Kenneth A. Bollen

7 Five Steps in the Structural Factor Analysis of Longitudinal Data 99
   John J. McArdle

8 Factorial Invariance: Historical Perspectives and New Problems 131
   Roger E. Millsap and William Meredith

9 Factor Analysis Models as Approximations 153
   Robert C. MacCallum, Michael W. Browne, and Li Cai

10 Common Factors Versus Components: Principals and Principles, Errors and Misconceptions 177
    Keith F. Widaman
CONTENTS

11 Understanding Human Intelligence Since Spearman  
   John L. Horn and John J. McArdle  
   205

12 Factoring at the Individual Level: Some Matters  
   for the Second Century of Factor Analysis  
   John R. Nesselroade  
   249

13 Developments in the Factor Analysis of Individual  
   Time Series  
   Michael W. Browne and Guangjian Zhang  
   265

14 Factor Analysis and Latent Structure of Categorical  
   and Metric Data  
   Irini Moustaki  
   293

15 Rotation Methods, Algorithms, and Standard Errors  
   Robert I. Jennrich  
   315

16 A Review of Nonlinear Factor Analysis  
   and Nonlinear Structural Equation Modeling  
   Melanie M. Wall and Yasuo Amemiya  
   337
