LATENT GROWTH CURVE MODELING

Kristopher J. Preacher
University of Kansas

Aaron L. Wichman
Ohio State University

Robert C. MacCallum
University of North Carolina at Chapel Hill

Nancy E. Briggs
University of Adelaide
CONTENTS

About the Authors vii
Series Editor’s Introduction viii
Acknowledgments x

1. Introduction 1
   Overview of the Book 3
   Latent Growth Curve Modeling:
     A Brief History and Overview 4
   Model Specification and Parameter Interpretation 5
   The Scaling of Time 10
   Asynchronous Measurement 13
   Assumptions 14
   Parameter Estimation and Missing Data 15
   Model Evaluation and Selection 18
   Statistical Power 20

2. Applying LGM to Empirical Data 22
   Data 22
   Software 23
   Overview of Model-Fitting Strategy 24
   Model 0: The Null Model 25
   Model 1: Random Intercept 26
   Model 2: Fixed Intercept, Fixed Slope 28
   Model 3: Random Intercept, Fixed Slope 30
   Model 4: Random Intercept, Random Slope 31
   Model 5: Multiple-Groups Analysis 34
   Model 6: The Conditional Growth Curve Model 35
   Model 7: Parallel Process Model 38
   Model 8: Cohort-Sequential Designs 42
   Model 9: Time-Varying Covariates 46
   Model 10: Polynomial Growth Curves 50
   Model 11: Unspecified Trajectories 52
   Summary 53
3. **Specialized Extensions**
   - Growth Mixture Models
   - Piecewise Growth
   - Modeling Change in Latent Variables
     - With Multiple Indicators
   - Structured Latent Curves
   - Autoregressive Latent Trajectory Models
   - Categorical and Ordinal Outcomes
   - Modeling Causal Effects Among Aspects of Change
   - Summary

4. **Relationships Between LGM and Multilevel Modeling**
   - MLM for Repeated-Measures Data
   - Model Specification
   - Parameter Estimation
   - Model Evaluation
   - Areas of Overlap Between MLM and LGM
   - Areas of Differentiation Between MLM and LGM
   - Software

5. **Summary**

**Appendix**
