## Contents

List of Contributors ............................................................... v
Preface ...................................................................................... vii

**Section I. Conceptual Foundations of Cultural Neuroscience**

1. Controlled studies of chimpanzee cultural transmission  
   V. Horner and F.B.M. de Waal (Atlanta, GA, USA) .................. 3

2. Brain in macro experiential context: biocultural co-construction of lifespan neurocognitive development  
   S.-C. Li (Berlin, Germany) ...................................................... 17

3. Anthropology and cultural neuroscience: creating productive intersections in parallel fields  
   R.A. Brown and R. Seligman (CA, IL, USA) .......................... 31

4. The brain in culture and culture in the brain: a review of core issues in neuroanthropology  
   J.F. Dominguez D., E.D. Lewis, R. Turner and G. Egan  
   (Victoria, Australia and Leipzig, Germany) ......................... 43

**Section II. Cultural Neuroscience of Attention and Perception**

5. Cultural constraints on music perception and cognition  
   S.J. Morrison and S.M. Demorest (Seattle, WA, USA) .............. 67

6. Culture and attention: evidence from brain and behavior  
   S. Ketay, A. Aron and T. Hedden (NY, MA, USA) .................. 79

**Section III. Cultural Neuroscience of Cognition**

7. Culture sculptures the perceptual brain  
   J.O. Goh and D.C. Park (IL, TX, USA) ................................. 95

   M.J. Boivin and B. Giordani (MI, USA) .................................. 113

9. Cultural influences on memory  
   A.H. Gutchess and A. Indeck (MA, USA) ............................... 137
10. Numbers in the cultural brain
   Y.-Y. Tang and Y. Liu (Dalian, China and OR, FL, USA) .................................... 151

11. Cultural neurolinguistics
   C. Chen, G. Xue, L. Mei, C. Chen and Q. Dong (Irvine, LA, USA and Beijing, China) 159

Section IV. Cultural Neuroscience of Social Cognition

12. Culture in the mind's mirror: how anthropology and neuroscience can inform a model of the neural substrate for cultural imitative learning
   E.A.R. Losin, M. Dapretto and M. Iacoboni (Los Angeles, CA, USA) ................... 175

13. The cultural neuroscience of person perception
   J.B. Freeman, N.O. Rule and N. Ambady (MA, USA) ......................................... 191

14. Understanding the self: a cultural neuroscience approach
   S. Han and G. Northoff (China and Magdeburg, Germany) .............................. 203

15. Cultural effects on the neural basis of theory of mind
   C.K. Frank and E. Temple (CA, NH, USA) ..................................................... 213

Section V. Cultural Neuroscience of Emotion and Well Being

16. Culture and social support: neural bases and biological impact
   D.K. Sherman, H.S. Kim and S.E. Taylor (Santa Barbara, Los Angeles, CA, USA) . 227

Section VI. Applications of Cultural Neuroscience

17. Neuroeconomics: in search of the neural representation of brands
   M. Schaefer (Magdeburg, Germany) ............................................................... 241

18. "Neuroarchaeology": exploring the links between neural and cultural plasticity
   L. Malafouris (Cambridge, UK) ................................................................. 253

19. Cultural neuroscience and psychopathology: prospects for cultural psychiatry
   S. Choudhury and L.J. Kirmayer (Berlin, Germany and Quebec, Canada) .......... 263

Section VII. Conclusion

20. Cultural neuroscience: a once and future discipline
   J.Y. Chiao (Evanston, IL, USA) ................................................................. 287

Subject Index ........................................................................................................ 305
