Use of representations in reasoning and problem solving: an overview 1
LIEVEN VERSCHAPPEN, ERIK DE CORTE, TON DE JONG, AND JAN ELEN

PART I
Theoretical and empirical analyses of psychological processes in thinking and learning with representations 9

1 Creative thinking and problem solving with depictive and descriptive representations 11
WOLFGANG SCHNOTZ, CHRISTIANE BAADTE, ANDREAS MÜLLER, AND RENATE RASCH

2 Instructional considerations in the use of external representations: the distinction between perceptually based depictions and pictures that represent conceptual models 36
STELLA VOSNIADOU

3 Critical thinking about biology during web page reading: tracking students’ evaluation of sources and information through eye fixations 55
LUCIA MASON AND NICOLA ARIASI
4 Representational flexibility in linear-function problems: a choice/no-choice study
ANA ACEVEDO NISTAL, WIM VAN DOOREN, GERALDINE CLAREBOUT, IAN ELEN, AND LIEVEN VERSCHAFFEL

5 Representations and proof: the case of the Isis problem
BRIAN GREER, DIRK DE BOCK, AND WIM VAN DOOREN

6 Secondary school students’ availability and activation of diagrammatic strategies for learning from texts
MICHAEL SCHNEIDER, CATRIN RODE, AND ELSBETH STERN

PART II
Development of representational tools and evaluation of their effects on student learning

7 Conceptual change in learning electricity: using virtual and concrete external representations simultaneously
TOMI JAAKKOLA, SAMI NURMI, AND ERNO LEHTINEN

8 Using static and dynamic visualisations to support the comprehension of complex dynamic phenomena in the natural sciences
PETER GERJETS, BIRGIT IMHOF, TIM KÜHL, VANESSA PFEIFFER, KATHARINA SCHEITER, AND SVEN GEMBALLA

9 The role of external representations in learning combinatorics and probability theory
BAS KOLLOFFEL, TESSA H. S. EYSINK, AND TON DE JONG

10 Symbolising and the development of meaning in computer-supported algebra education
KOENO GRAVEMEIJER, MICHEL DOORMAN, AND PAUL DRIJVERS

11 The ‘numbers are points on the line’ analogy: does it have an instructional value?
XENIA VAMVAKOUSSI
12 Use of external representations in science: prompting and reinforcing prior knowledge activation
   SANDRA A. J. WETZELS, LIESBETH KESTER, AND JEROEN J. G. VAN MERRIÉNBOER

13 Visualisation of argumentation as shared activity
   GIJSBERT ERKENS, JEROEN JANSSSEN, AND PAUL A. KIRSCHNER
