Methods in Enzymology

Volume XI

Enzyme Structure

[Part A.]

EDITED BY

C. H. W. Hirs

DEPARTMENT OF BIOLOGY

BROOKHAVEN NATIONAL LABORATORY

UPTON, LONG ISLAND, NEW YORK

1967

ACADEMIC PRESS  New York and London
## Table of Contents

**Contributors to Volume XI** .................................................. v

**Preface** ................................................................................. ix

**Previous Volumes** ................................................................. xvii

**Volumes in Preparation** ......................................................... xviii

### Section I. Amino Acid Analysis and Related Procedures

1. Accelerated Methods
   - Darrel H. Spaceman .................................................................. 3

2. Micro and Submicro Determinations of Amino Acids by Ion-Exchange Chromatography
   - P. B. Hamilton .......................................................................... 15

3. Automatic Computation of Amino Acid Analyzer Data
   - C. H. W. Hirs ........................................................................... 27

4. High-Voltage Paper Electrophoresis
   - W. J. Dexter and E. Bynum ..................................................... 32

5. Thin-Layer Chromatography (TLC) of Amino Acids
   - M. Brenner and A. Niederwieser ............................................. 39

6. Determination of Cystine as Cysteic Acid
   - C. H. W. Hirs ........................................................................... 59

7. Determination of Amide Residues by Chemical Methods
   - Philip E. Wilcox ........................................................................ 63

8. Enzymatic Determination of Glutamine and Asparagine
   - Donald B. Tower ...................................................................... 76

9. Determination of Amino Acids as DNP Derivatives by Automatic Partition Chromatography
   - Leo Keesner, Edward Muntywiler, Grace E. Griffin, and Patricia Quaranta ........................................ 94

10. Radiotracer Methodology with Amino Acid Analyzers
    - R. R. Becker ........................................................................... 108

### Section II. End-Group Analysis

11. Use of Cyanate for Determining NH₂-Terminal Residues in Protein
    - George R. Stark ....................................................................... 125

12. Dansyl Chloride Procedure
    - W. R. Gray ............................................................................ 139
13. Hydrazinolysis
  H. FRANKEL-CORAT AND CHUN MING TSUNG 151

14. Enzymic Hydrolysis with Carboxypeptidases
  RICHARD P. AMBLER 155

Section III. Chain or Subunit Separation

15. Chromatography
  P. DESNUELLE 169

16. Countercurrent Distribution
  ROBERT J. HILL 173

17. Zone Electrophoresis with Polyacrylamide Gel
  AARON M. ALTSCHEL AND WILLIAM J. EVANS 179

18. Separation of Subunits of Proteins by Zone Centrifugation in a Density Gradient
  JOHN C. GERHART 187

Section IV. Cleavage of Disulfide Bonds

19. Performic Acid Oxidation
  C. H. W. HIRS 197

20. Reduction and S-Carboxymethylation of Proteins
  C. H. W. HIRS 199

21. Reduction and S-Alkylation with Acrylonitrile
  THOMAS S. SEIBLES AND LEOPOLD WEIL 204

22. Sulfitolysis
  R. DAVID COLE 206

Section V. Cleavage of Peptide Chains

23. Denaturation of Polypeptide Substrates
  J. CLAUDE BENNETT 211

24. Techniques in Enzymic Hydrolysis
  D. G. SMYTH 214

25. Chromatography of Trypsin to Remove Chymotrypsin, and of Chymotrypsin to Remove Trypsin
  MIREILLE ROVERY 231

26. Treatment of Trypsin with TPCK
  FREDERICK H. CARPENTER 237

27. The Cyanogen Bromide Reaction
  ERICH GROSS 238

28. Cleavage at Aspartic Acid
  JULIUS SCHULTZ 255

29. N→O Acyl Rearrangement
  KOICHI IWAI AND TOSHIO ANDO 263

30. N-Bromosuccinimide Cleavage of Peptides
  L. K. RAMACHANDRAN AND B. WITKOP 283

31. Cleavage of Tyrosyl-Peptide Bonds by Electrolytic Oxidation
  LOUIS A. COHEN AND LEON FAIBLER 299

51. Subtractive Edman Degradation  
52. Sequential Degradation Plus Dansylation  
53. Cystine Peptides

Section VIII. Modification Reactions

54. Reduction and Reoxidation at Disulfide Bonds  
55. Oxidation with Hydrogen Peroxide  
56. Analysis for Methionine Sulfoxides  
57. Photochemical Oxidation  
58. Determination of the Tryptophan Content of Proteins with N-Bromosuccinimide  
59. Tryptophan Involvement in the Function of Enzymes and Protein Hormones as Determined by Selective Oxidation with N-Bromosuccinimide  
60. Tryptophan Involvement in Binding Sites of Proteins and in Enzyme-Inhibitor Complexes as Determined by Oxidation with N-Bromosuccinimide  
61. Reactivity toward N-Bromosuccinimide as a Criterion for Buried and Exposed Tryptophan Residues in Proteins  
62. Carboxymethylation  
63. Reactions with N-Ethylmaleimide and p-Mercurobenzoate  
64. Reactions with Reactive Aryl Halides  
65. Reactions with Reactive Alkyl Halides  
66. Acetylation  
67. O-Acetyltirosine  
68. Succinylation  
69. Reaction with N-Carboxy-α-amino Acid Anhydrides  
70. Guanidination of Proteins  
71. Analysis for Homocitrulline  
72a. Modification of Proteins with Cyanate  
72b. Analysis for Homocitrulline
CONTENTS

73. Amidination
    M. L. Ludwig and M. J. Hunter 505

74. Esterification
    Philip E. Wilcox 605

75. Bifunctional Reagents
    Finn Wold 617

76a. Preparation of Ribonuclease S and Its Component Parts, S-Peptide and S-Protein
    Marilyn S. Doscher 640

76b. Limited Proteolysis by Exopeptidases
    John T. Potts, Jr. 648

Section IX. Specific Modification Reactions

77. Preparation of β-Glycerophosphate Aldolase and β-Glyceryl Transaldolase
    C. Y. Lai, P. Hoffe, and B. L. Horuker 667

78. Preparation of Reduced Phosphorylase by Use of Sodium Borohydride
    Paul H. Straussbauch, ALEN B. Kent, JERRY L. Hedrick, and Edmond H. Fischer 671

79. Preparation of Apophosphorylase b by Use of Deforming Agents
    Shmuel Shaltiel, JERRY L. Hedrick, and Edmond H. Fischer 675

80. Site-Specific Reagents for Chymotrypsin and Trypsin
    E. Shaw 677

81. Organophosphorus Compounds
    J. A. Cohen, R. A. Oosterbaan, and F. Berends 685

82. Analysis for O-Phosphorylserine
    Norwood K. Schaffer 702

83. Sulfonylation with Sulfonyl Halides
    Allen M. Gold 708

Section X. Investigation of Conformational Changes

84. Examination of Titration Behavior
    Yasuhiro Nomaki and Charles Tanford 715

85. Hydrogen Exchange
    Giovanni Di Sabato and Martin Ottesen 734

86. Difference Spectroscopy
    T. T. Herskovits 748

87. Fluorescence Measurements
    Ludwig Brand and Bernhard Without 776

88. Environmentally Sensitive Groups Attached to Proteins
    H. R. Horton and D. E. Kosshland, Jr. 856

   I. Dansyl Chloride (1-Dimethylaminonaphthalene-5-sulfonyl Chloride)
    H. R. Horton and D. E. Kosshland, Jr. 857

   II. 2-Bromosacetamido-4-nitrophenol
    M. E. Kihtly and D. E. Kosshland, Jr. 866

I. Dansyl Chloride (1-Dimethylaminonaphthalene-5-sulfonyl Chloride)
II. 2-Bromosacetamido-4-nitrophenol

II. 2-Bromosacetamido-4-nitrophenol
