Serge N. Timasheff

GRADUATE DEPARTMENT OF BIOCHEMISTRY
BRANES UNIVERSITY
WALTHAM, MASSACHUSETTS

1977

ACADEMIC PRESS New York San Francisco London
A Subsidiary of Harcourt Brace Jovanovich, Publishers
Table of Contents

Contributors to Volume XLVII: ix
Preface: xiii
Volumes in Series: xv

Section I. Amino Acid Analysis
1. Subnanomole-Range Analysis
   P. E. Hare
2. Improved Ion-Exchange Resins
   James R. Benson
3. Internal Standards for Amino Acid Analysis
   James F. Riordan and Roger W. Giese
4. Complete Hydrolysis of Polypeptides with Insolubilized Enzymes
   Garfield P. Royer, James F. Riordan, and Frederick A. Liberatore
5. High-Performance Liquid Chromatography of Amino Acid Derivatives
   Carl L. Zimmerman and John J. Pisano
6. The Use of Logarithmic Plots of Electrophoretic Mobilities of Peptides
   R. E. Offord

Section II. End Group Methods
7. Carboxypeptidase C
   Harald Tscheppe
8. Carboxypeptidase Y in Sequence Determination of Peptides
   Rikimaru Hayashi

Section III. Chain Separation
9. Gel Filtration
   C. H. W. Hirs

Section IV. Cleavage of Disulfide Bonds
10. Reductive Cleavage of Cystine Disulfides with Tributylphosphine
    Urs Th. Rüegg and Josef Rudinger
11. Alkylation of Cysteine Thiols with 1,3-Propane Sultone
    Urs Th. Rüegg and Josef Rudinger
12. Reductive Cleavage of S-Sulfo Groups with Tributylphosphine
    Urs Th. Rüegg

Section V. Selective Cleavage by Chemical Methods
13. Cleavage at Cysteine after Cyanation
    George R. Stark
14. Cleavage at Asn-Gly Bonds with Hydroxylamine
    Paul Bornstein and Gary Balian
15. Cleavage at Aspartyl-Prolyl Bonds
    Michael Landon
16. Phthalalization of Amino Groups
    J-F. Pechère and R. Bertrand
<table>
<thead>
<tr>
<th>Section VI. Selective Cleavage with Enzymes</th>
</tr>
</thead>
<tbody>
<tr>
<td>18. Cleavage at Arginine Residues by Clostripain</td>
</tr>
<tr>
<td>19. Specific Hydrolysis by Trypsin at Alkaline pH</td>
</tr>
<tr>
<td>20. Applications of Thermolysin in Protein Structural Analysis</td>
</tr>
<tr>
<td>21. Cleavage at Glutamic Acid with Staphylococcal Protease</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Section VII. Separation of Peptides</th>
</tr>
</thead>
<tbody>
<tr>
<td>22. Two-Dimensional Thin-Layer Methods</td>
</tr>
<tr>
<td>23. Separation of Peptides on Phosphocellulose and Other Cellulose Ion Exchangers</td>
</tr>
<tr>
<td>24. Chromatography on Microbore Columns</td>
</tr>
<tr>
<td>25. Automated Micro Procedures for Peptide Separations</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Section VIII. Sequence Analysis</th>
</tr>
</thead>
<tbody>
<tr>
<td>27. Microsequence Analysis in Automated Spinning-Cup Sequenators</td>
</tr>
<tr>
<td>28. Peptide Methodology with Braunitizer Reagents</td>
</tr>
<tr>
<td>29. New Supports in Solid-Phase Sequencing</td>
</tr>
<tr>
<td>30. Coupling Techniques in Solid-Phase Sequencing</td>
</tr>
<tr>
<td>31. Alternative Reagents in Sequential Degradation on Solid-Phase Supports</td>
</tr>
<tr>
<td>32. Solid-Phase Sequencing in Spinning-Cup Sequenators</td>
</tr>
<tr>
<td>33. High-Sensitivity Sequence Determination of Immobilized Peptides and Proteins</td>
</tr>
<tr>
<td>34. Improved Manual Sequencing Methods</td>
</tr>
<tr>
<td>35. Solid-Phase COOH-Terminal Sequential Degradation</td>
</tr>
<tr>
<td>36. Regeneration of Amino Acids from Anilinothiazolinones</td>
</tr>
<tr>
<td>37. Identification of Anilinothiazolinones after Rapid Conversion to Nα-Phenylthiocarbamylamino Acid Methylamides</td>
</tr>
<tr>
<td>38. Automated Conversion of Anilinothiazolinones into PTH Derivatives</td>
</tr>
</tbody>
</table>
39. Analysis of Dipeptides by Gas Chromatography-Mass Spectrometry and Application to Sequencing with Dipeptidyl Aminopeptidases

HARRY C. KRUTZSCH AND JOHN J. PISANO

391

Section IX. Chemical Modification

40. Novel Sulfhydryl Reagents

GEORGE L. KENYON AND THOMAS W. BRUCE

407

41. Modification of Histidyl Residues in Proteins by Diethylpyrocarbonate

EDITH WILSON MILES

431

42. Modification of Tryptophan to Oxindolylalanine by Dimethylsulfoxide-Hydrochloric Acid

WALTER E. SAVIGE AND ANGELO FONTANA

442

43. Interconversion of Methionine and Methionine Sulfoxide

WALTER E. SAVIGE AND ANGELO FONTANA

453

44. Cleavage of the Tryptophanyl Peptide Bond by Dimethylsulfoxide-Hydrobromic Acid

WALTER E. SAVIGE AND ANGELO FONTANA

459

45. Reductive Alkylation of Amino Groups

GARY E. MEANS

469

46. Active-Site-Directed Reagents of Glycolytic Enzymes

FRED C. HARTMAN AND I. LUCILE NORTON

479

Section X. Methods of Peptide Synthesis

47. The Synthesis of Peptides by Homogeneous Solution Procedures

PANAYOTIS G. KATSOYANNIS AND GERALD P. SCHWARTZ

501

48. Solid Phase Peptide Synthesis

MARILYN S. DOSCHER

578
