HETEROCYCLIC COMPOUNDS

Six-membered heterocyclic compounds with (a) a nitrogen atom common to two or more fused rings; (b) one hetero-atom in each of two fused rings. Six-membered ring compounds with two hetero-atoms from Groups VI B, or V B and VI B of the Periodic Table, respectively. Isoquinoline, lupanine and quinolizidine alkaloids.

       (i) Chemical syntheses, 244 – (ii) Biosynthesis, 249 –
14. 1-Phenethylisoquinolines
   a. Simple 1-phenethyltetrahydroisoquinolines 254
   b. Bisphenethyltetrahydroisoquinolines 255
   c. The homoprosaporphines and homoauperphines 255

Chapter 37. Fused Heterocyclic Systems having a Nitrogen Atom in Common to Two or
           More Rings
           by Neil Campbell

1. Indolizines
   a. Indolizine and its derivatives 259
   b. Benzoindolizines 262

2. Quinolizines and their derivatives
   a. Quinolizines 264
   b. Quinolizidine and its derivatives 267
       (i) Quinolizidone and the quinolizidones, 267 – (ii) Benzoquinolizinium ions, 269 –

3. Azepine derivatives containing a bridge nitrogen atom 270

4. Tricyclic compounds with nitrogen common to all three rings
   a. Cyclazines 272
       (iii) Cycl[3.3.3]azine, 274 – (iv) Julolidine and lilolidine, 276 –

5. Bridged ring compounds
   a. Compounds with nitrogen common to two rings 278
   b. Bicyclic systems having a nitrogen bridge 279
   c. Compounds with nitrogen common to three rings 281
       (i) Quinuclidine, 281 –

Chapter 38. Lupinane and Quinolizidine Alkaloids
           by H. C. S. Wood and R. Wrigglesworth

1. Lupinane alkaloids
   a. Bicyclic lupinane alkaloids 286
   b. Phenanthronorlupinane alkaloids 290
   c. Tricyclic lupin alkaloids 292
       (i) Stereochemistry, 294 –
   d. Tetracyclic lupin alkaloids 299
       (i) Anagyrine, lupanine and sparteine alkaloids, 299 – (ii) Matrine-like alkaloids, 319 –

2. Nuphar alkaloids 328

3. Ormosia alkaloids 334

4. Lythraceae alkaloids 338

Chapter 39. Compounds Containing Two Fused Five- and Six-Membered Heterocyclic
           Rings each with One Hetero Atom
           by Neil Campbell

1. Compounds containing two hetero rings fused to an aromatic system 343
   a. Bz-Pyrroloquinolines 343
   b. Phenanthrolines 344
2. Compounds containing two hetero rings fused through adjacent carbon atoms
   a. Furopyridines ........................................... 347
   b. Furoquinolines ....................................... 348
   c. Pyrano[2,3-b]pyridines ............................... 352
      (i) 2H-Pyrano[3,2-b]pyridine and derivatives, 352 – (ii) 1H-Pyrano[4,3-b]pyri-
           dines, 353 – (iii) 2H-Pyrano[3,2-c]pyridines, 354 – (iv) 1H-Pyrano[3,4-c]pyri-
           dines, 354 –
   d. Pyrrolopyridines or azaindoles .................... 355
   e. Carbolines or pyridindoles .......................... 359
   f. Dihydro-furoquinolines and -pyranoquinolines ...... 362
   g. Naphthyridines or diazanaphthalenes ................ 366

Chapter 40. Compounds Containing a Six-Membered Ring having two Hetero-atoms from
Group VI B of the Periodic Table: Dioxanes, Oxathianes and Dithianes
by Malcolm Sainsbury

1. Dioxanes and related compounds ........................................... 375
   a. 1,2-Dioxanes, 1,2-dioxins and related structures ........ 376
   b. 1,3-Dioxanes and related compounds .................... 377
      (i) 1,3-Dioxanes, 377 – (ii) 1,3-Dioxins, 380 – (iii) 2,4-Dihydro-1,3-benzodiox-
          in and related compounds, 380 –
   c. 1,4-Dioxanes and 1,4-dioxins ........................ 382
      (i) 1,4-Dioxanes, 382 – (ii) 1,4-Dioxins, 385 – (iii) 1,4-Benzodioxin and its
derivatives, 385 – (iv) Lignan derivatives, 387 – (v) Polychlorinated dibenzo-1,4-
dioxins, 387 –

2. Dithanes, dithiins and their benzo derivatives ..................... 389
   a. 1,2-Dithianes, 1,2-dithiins and their benzo derivatives ... 389
      (i) 1,2-Dithianes, 389 – (ii) 1,2-Dithiin and derivatives, 390 – (iii) Benzdithiins,
1,3-Dithianes, 2,4-dihydro-1,3-dithiins and their benzo derivatives .... 393
      (i) 1,3-Dithianes, 393 – (ii) 2,4-Dihydro-1,3-dithiins, 399 –
   c. 1,4-Dithiane, 1,4-dithiin and their benzo derivatives ..... 400
      (i) 1,4-Dithiane and simple derivatives, 400 – (ii) 1,4-Dithiins, 403 – (iii) Benzo-
1,4-dithiins, 406 – (iv) Thianthrene and its derivatives, 407 –

3. Oxathianes and oxathiins .............................................. 411
   a. 1,2-Oxathianes and oxathiins .......................... 411
      (i) 1,2-Oxathianes, 411 – (ii) Dihydro 1,2-oxathiins and 1,2-oxathiins, 412
   b. 1,3-Oxathianes .......................................... 414
   c. 1,4-Oxathianes, 2,4-dihydro-1,4-oxathiins and 1,4-oxathiins ...... 415
      (i) 1,4-Oxathianes, 415 – (ii) Dihydro-1,4-oxathiins and 1,4-oxathiins, 418
   d. Benzoxathiins ........................................... 420
      (i) 1,2-Benzoaxathiin derivatives, 420 – (ii) 2,1-Benzoxathiin derivatives, 421
      (iii) 2,3-Benzoxathiin derivatives, 421 – (iv) Dihydro-1,3-benzoxathiins, 422 –
      (v) 2,4-Dihydro-3,1-benzoxathiin derivatives, 422 – (vi) 1,4-Benzoxathiin, 423
      (vii) Phenoaxathiin (phenathioxin or dibenzo-1,4-oxathiin), 424 –

4. Miscellaneous compounds containing selenium or tellurium atoms .... 425
Chapter 41. Compounds Containing a Six-Membered Ring with Two Hetero Atoms from Groups V and VI respectively, of the Periodic Table. Oxazines, Thiazines and their Analogues

by MALCOLM SAINSBURY

1. Oxazines

a. 1,2-Oxazines
(i) 6H-1,2-Oxazines, 427 - (ii) 2H- and 4H-1,2-Oxazines, 429 - (iii) Dihydro- and tetrhydro-1,2-oxazines, 430 -
b. 1,3-Oxazines
(i) 4H-1,3-Oxazines, 432 - (ii) 1,3-Oxazin-1-ium salts, 434 - (iii) Hydro-1,3-oxazines, 437 -
c. 1,4-Oxazines and related compounds
(i) 1,4-Oxazines, 466 - (ii) Dihydro-1,4-oxazines, 447 - (iii) Tetrahydro-1,4-oxazines, 448 - (iv) Oxo-morpholines (morpholones), 453 -

2. Benzoxazines

a. 1,2-Benzoxazines
b. 1,3-Benzoxazines and their hydro derivatives
(i) 2H-1,3-Benzoxazines, 456 - (ii) 4H-1,3-Benzoxazines, 460 -
c. 1,4-Benzoxazines and their hydro derivatives
(i) 1,4-Benzoxazines, 461 - (ii) Dihydro-1,4-benzoxazines, 462 - (iii) Dihydro-1,4-benzoxazines, 463 - (iv) 1H-2,3-Benzoxazines, 465 - (v) 4H-3,1-Benzoxazines and related compounds, 467 -

3. Phenoxazines

a. Methods of synthesis
b. Phenoxazine and its simple derivatives
(i) Nitrophenoxazines, 475 - (ii) Aminophenoxazines, 475 - (iii) 3-Methoxyphenoxazines, 476 - (iv) Phenoxazinocarboxylic acids, 476 - (v) Halogenophenoxazines, 477 - (vi) N-Alkylphenoxazines and N-arylphenoxazines, 477 - (vii) Acylphenoxazines, 479 -
c. Oxidation products of phenoxazines
(i) Phenoxazinones and phenoxazonium salts, 479 -
d. Naturally occurring phenoxazine derivatives

e. Benzophenoxazines and benzophenoxazinones

4. Thiazines and related compounds

a. 1,2-Thiazines and their hydro derivatives
b. 1,3-Thiazines and related compounds
(i) 4H-1,3-Thiazines, 488 - (ii) 1,3-Thiazinin salts, 489 - (iii) Dihydro-2H-1,3-thiazines, 490 - (iv) 5,6-Dihydro-4H-1,3-thiazines and tetrahydro-1,3-thiazines, 493 -
c. 1,4-Thiazines and their hydro derivatives
(i) Thiazines, 495 - (ii) Dihydro-1,4-thiazines, 496 - (iii) Tetrahydro-1,4-thiazines, 498 -

5. Benzothiazines

a. 1,2-2,1- and 2,3-Benzothiazines and their hydro derivatives
(i) 2H-1,2-Benzothiazines, 501 - (ii) 1H-2,1-Benzothiazines, 503 - (iii) HDH-2,3-Benzothiazine derivatives, 503 -
b. 1,3- and 3,1-Benzothiazines and their hydro derivatives
(i) 1,3-Benzothiazines, 504 - (ii) 4H-3,1-Benzothiazine derivatives, 506 -
c. 1,4-Benzothiazines and their hydro derivatives
(i) 2H-1,4-Benzothiazines, 509 - (ii) 2H-1,4-Benzothiazinium salts, 511 - (iii) 2H-1,4-Benzothiazin-3(4H)-ones, 512 - (iv) Phenothiomorpholines, 514 - (v) 4H-1,4-Benzothiazines, 514 -
XIV

CONTENTS

6. Phenothiazines
   a. Methods of synthesis
   b. Physical properties
   c. Chemical properties
      (i) Oxidation, phenothiazinyl radical cation and phenothiazonium (phenazathionium) salts, 521
      (ii) Electrophilic substitution, 524
   d. Phenothiazine derivatives
      (i) Phenothiazine homologues, 527
      (ii) Halogenophenothiazines, 528
      (iii) Nitrophenothiazines, 529
      (iv) N-Alkyl- and N-acyl-derivatives, 529
      (v) Aminophenothiazines, 531
      (vi) Hydroxyphenothiazines, 532
      (vii) 3H-Phenothiazine derivatives, 532
      (viii) Desulphurization of phenothiazines, 534
      (ix) Azaphenothiazines, 534
