Editorial Preface
List of Contributors
Preface to Volume I

1. HISTORICAL PERSPECTIVES
   A.C. BOCCARA AND D. FOUJNIERT
   I. Introduction 4
   II. Experimental Methodology 6
   III. Understanding the Phenomena: Models and Theory 16
   IV. The Main Applications of Photoacoustic and Photothermal Techniques 18
   V. Conclusions and Recommendations 28
   VI. References 30

2. PRINCIPLES OF PHOTOTHERMAL DETECTION IN SOLIDS
   J.C. MURPHY, L.C. AAMODT AND J.W.M. SPICER
   I. Introduction 43
   II. The Temperature Field 46
   III. Influence of Detection Method on Photothermal Observations 77
   IV. Summary 90
   V. References 92

3. PRINCIPLES OF PHOTOTHERMAL SPECTROSCOPY IN FLUIDS
   R. GUPTA
   I. Introduction 96
   II. Temperature Distribution 99
   III. Photothermal Phase-Shift Spectroscopy 104
   IV. Photothermal Deflection Spectroscopy 113
   V. Photothermal Lensing Spectroscopy 129
   VI. Conclusions 146
   VII. References 149

4. PRINCIPLES OF PHOTOACOUSTIC AND PHOTOTHERMAL DETECTION IN GASES

ix
5. PHOTOTHERMAL NONDESTRUCTIVE EVALUATION OF MATERIALS WITH THERMAL WAVES

G. BUSSE AND H.G. WALThER

I. Introduction 207
II. NDE with Thermal Waves 207
III. Basic Properties of Photothermal Signals 212
IV. Examples of Nondestructive (NDE) with Thermal Waves 235
V. Discussion 275
VI. References 284

6. PHOTOTHERMAL IMAGING AND MICROSCOPY

M. MUNIDASA AND A. MANDELIS

I. Introduction 300
II. Basic Theory 300
III. General Principles of Imaging 305
IV. Detection Methods 313
V. Recent Developments 344
VI. Conclusions 357
VII. References 358

7. ENVIRONMENTAL AND CHEMICAL TRACE GAS ANALYSIS BY PHOTOACOUSTIC METHODS

M. SIGRIST

I. Introduction 371
II. Experimental Techniques for Trace Gas Monitoring 373
III. Basic Principles of Photoacoustic Spectroscopy 378
