Neurobiology of Hearing: The Central Auditory System

Editors

Richard A. Altschuler, Ph.D.
Associate Professor
Kresge Hearing Research Institute
Department of Otolaryngology and
Department of Anatomy and Cell Biology
University of Michigan
Ann Arbor, Michigan

Richard P. Bobbin, Ph.D.
Professor
Department of Otorhinolaryngology and
Biocommunication
Kresge Hearing Research Laboratory of the South
Louisiana State University Medical Center
New Orleans, Louisiana

Ben M. Clopton, Ph.D.
Associate Professor
Kresge Hearing Research Institute
Department of Otolaryngology
University of Michigan
Ann Arbor, Michigan

Douglas W. Hoffman, Ph.D.
Associate Professor
Departments of Psychiatry and Pharmacology
Dartmouth Medical School
Hanover, New Hampshire

Raven Press ☝ New York
Contents

Contributing Authors ............................................................... vii
Preface ...................................................................................... xi
Acknowledgments ....................................................................... xiii

1. The Ascending Auditory Pathways .............................................. 1
   Robert H. Helfert, Colleen R. Snead, and Richard A. Altschuler

2. The Descending Auditory System ............................................... 27
   Kevin M. Spangler and W. Bruce Warr

3. Physiological-Morphological Properties of the Cochlear Nucleus .... 47
   William S. Rhode

4. Processing of Complex Sounds in the Cochlear Nucleus ............... 79
   Murray B. Sachs and Carol C. Blackburn

5. Projections to the Lateral and Medial Superior Olivary Nuclei from the Spherical and Globular Bushy Cells of the Anteroventral Cochlear Nucleus .......................................................... 99
   Nell Beatty Cant

6. Neurotransmitters of Brainstem Auditory Nuclei ......................... 121
   Robert J. Wenthold

7. Superior Olivary Complex: Functional Neuropharmacology of the Principal Cell Types .......................................................... 141
   Donald M. Caspary and Paul G. Finlayson

8. Binaural Cues and Signal Processing in the Superior Olivary Complex .......................................................... 163
   Chiyeko Tsuchitani and Don H. Johnson

   Douglas L. Oliver and Amiram Shneiderman

10. Functional Pharmacology of Inferior Colliculus Neurons .............. 223
    Carl L. Faingold, Greta Gehlbach, and Donald M. Caspary

11. Processing in the Colliculi .......................................................... 253
    David Caird

12. Anatomy of the Medial Geniculate Body .................................... 293
    Jeffery A. Winer

13. Stimulus Processing in the Auditory Cortex .............................. 335
    Dennis P. Phillips, Richard A. Reale, and John F. Brugge
14. Cellular Organization of the Cat's Auditory Cortex....................... 367
   Donald Wong
15. Properties of Sound Localization by Humans .......................... 389
   William A. Yost and Raymond H. Dye
16. Assessment of the Human Central Auditory Nervous System......... 411
   Frank E. Musiek and Jane A. Baran
17. Prosthetic Stimulation of the Central Auditory System ............ 439
   J. M. Miller, J. K. Niparko, and Xiaolin Xue
18. Development and Plasticity of the Ferret Auditory System ........ 461
   David R. Moore
Subject Index .................................................................................. 477
