

AN INTRODUCTION TO
**MOLECULAR
NEUROBIOLOGY**

ZACH W. HALL
With 11 Contributors

SINAUER ASSOCIATES, INC. • PUBLISHERS
Sunderland, Massachusetts

THE COVER

In situ hybridization of a sympathetic ganglion cell with ^{35}S -labeled poly(U) to reveal the distribution of poly A-mRNA. Silver grains are found over the cell body and dendrites but not over the axon. From D. A. Bruckenstein, P. J. Lein, D. Higgins and R. T. Freneau, Jr. 1990. *Neuron* 5: 809-819.

CONTENTS IN BRIEF

1	The Cells of the Nervous System	1
	ZACH W. HALL	
PART ONE SIGNALING IN THE NERVOUS SYSTEM		
2	Electrical Signaling	33
	PETER B. SARGENT	
3	Ion Channels	81
	ZACH W. HALL	
4	Chemical Messengers at Synapses	119
	RICHARD H. SCHELLER AND ZACH W. HALL	
5	The Nerve Terminal	148
	ZACH W. HALL	
PART TWO THE CELL BIOLOGY OF NEURONS AND GLIA		
6	G Proteins and Receptors in Neuronal Signaling	181
	ELLIOTT M. ROSS	
7	Second Messengers and Neuronal Function	207
	MARY B. KENNEDY	
8	The Neuronal Cytoskeleton	247
	RON D. VALE, GARY BANKER, AND ZACH W. HALL	
9	Myelin and Myelination	281
	GREG LEMKE	
PART THREE NEURONAL DEVELOPMENT		
10	Gene Regulation in the Nervous System	313
	GREG LEMKE	
11	Molecular Control of Neural Development	355
	DAVID J. ANDERSON	
12	Process Outgrowth and the Specificity of Connections	388
	PAUL H. PATTERSON	
13	Neuron-Target Interactions	428
	PAUL H. PATTERSON	
PART FOUR COMPLEX INTERACTIONS OF NEURONS AND NEURONAL DISORDERS		
14	Cellular and Molecular Mechanisms of Neuronal Plasticity	463
	MARY B. KENNEDY AND EVE MARDER	
15	Molecular Approaches to Diseases of the Nervous System	496
	XANDRA O. BREAKFIELD	

CONTENTS

The Contributors	xi
Preface	xii
1 The Cells of the Nervous System	1
An Introduction to Neurons	2
Signaling in Neurons	5
Neuronal Cell Biology	8
Glia	15
The Organization of Neurons within the Nervous System	17
Development of the Nervous System	25
PART ONE SIGNALING IN THE NERVOUS SYSTEM	
2 Electrical Signaling	33
Ion Permeability and the Membrane Potential	33
Resting Potential	41
Box A Intracellular Recording	43
Box B The Donnan Equilibrium	44
Action Potentials	49
Box C Voltage Clamp	52
Box D Patch Clamping	56
Synaptic Potentials	67
The Release of Neurotransmitters	73
3 Ion Channels	81
Ion Permeability of Membranes	82
Box A Gap Junctions	86
Ligand-Gated Ion Channels	89
Box B Fish Electric Organs: A Neurochemist's Dream	90
Box C Xenopus Oocytes: The Synapse in an Egg	101
Voltage-Regulated Channels	105
4 Chemical Messengers at Synapses	119
Fast and Slow Chemical Transmission	120
Identification and Localization of Neurotransmitters	124
Box A Hypothalamic Releasing Factors	128
Box B Opiates and Their Receptors	129
Synthesis and Storage of Peptide Transmitters	134
Box C CGRP: A Novel Neuropeptide Discovered by Cloning	140
Physiological Actions of Peptides	142
5 The Nerve Terminal	148
Preparation: Transmitter Synthesis and Storage	149
Transmitter Release and Its Control	158
Box A Mechanisms of Fusion in Non-Neural Systems	166
Recovery: Transmitter Inactivation and Vesicle Recycling	172

PART TWO THE CELL BIOLOGY OF NEURONS AND GLIA

6	G Proteins and Receptors in Neuronal Signaling	181
	Receptors Catalyze the Activation of G Proteins by GTP	182
	Box A Receptor-Catalyzed Nucleotide Exchange: The Beauty of Noncovalent Catalysis	184
	G Proteins Are Heterotrimers Whose α , β , and γ Subunits Have Both Independent and Interactive Functions	186
	Box B A Superfamily of GTP-Binding Proteins Performs Diverse Cellular Functions	188
	G Protein-Coupled Receptors: Transmitting Information across the Plasma Membrane	189
	Box C A Mechanism for Receptor-Mediated Inhibition of G Protein Activation	189
	Box D Classification of Receptors: Types and Subtypes, K_d 's and Clones	192
	Effector Proteins: Enzymes, Channels, or Transporters that Regulate the Metabolism of Second Messengers	193
	G Proteins Are the Basis of a Branched Signal-Processing Network	199
	Box E Nucleotide Analogs, Toxins, and Fluoride Ion are Valuable Probes of G Protein-Mediated Signaling	200
	Desensitization: Complex Feedback Regulation of Complex Pathways	202
7	Second Messengers and Neuronal Function	207
	The Cyclic Nucleotides	209
	Box A A Regulatory Motif of Protein Kinases	212
	Box B cGMP and the Response to Light	216
	Messengers Produced by Hydrolysis of Phosphatidyl Inositol 4, 5-Bisphosphate	218
	Calcium Ion	221
	Box C The Structure of Calmodulin	228
	Box D Phosphorylation of Synapsin I and Transmitter Release	230
	Eicosanoids	236
	Protein Tyrosine Kinases	236
	Protein Phosphatases	237
	Regulation through Multiple Second Messenger Pathways	240
8	The Neuronal Cytoskeleton	247
	Cytoskeletal Components and Their Assembly in Neurons	248
	Transport of Macromolecules	256
	Box A The Power of Video Microscopy	260
	Neurite Extension and Growth Cone Motility	262
	Neuronal Polarity and Specialized Domains	270
9	Myelin and Myelination	281
	Myelin Structure and Formation	282
	Myelin Function and Neural Evolution	286
	Myelin Genes and Myelin Genetics	287
	Box A Mutational Analysis of Neural Development in the Mouse	292
	The Differentiation of Myelin-Forming Cells	302
	Box B Immunoselection and Neuroimmunology	303

PART THREE NEURONAL DEVELOPMENT

- 10 Gene Regulation in the Nervous System 313
- A Hierarchy of Gene Regulation 314
 - Transcription 317
 - Box A *Sequence-Specific DNA Binding Assays: Footprints, Gel Shifts, and the Like* 320
 - Transcription Factors as Signal Transducers 322
 - Box B *Transfection-Based Transcription Assays* 328
 - Box C *From Enhancer to Transcription Factor* 330
 - Transcription Factors and Neural Development 335
 - Pre-mRNA Splicing 343
- 11 Molecular Control of Neural Development 355
- The Molecular Control of Neuronal Identity 356
 - Box A *Making Cells Blue* 358
 - Box B *Genetic Mosaic Analysis* 364
 - Control of Cell Number during Neural Development 369
 - Control of the Timing of Cell Differentiation in the Nervous System 374
 - Pattern Formation and the Spatial Control of Cell Differentiation 375
 - Box C *Enhancer Traps: Cell Markers and Mutations at One Blow* 376
 - Box D *Pattern Formation in the Drosophila Embryo* 382
- 12 Process Outgrowth and the Specificity of Connections 388
- Guidance of Outgrowth 389
 - Box A *Sperry's Legacy* 390
 - Box B *Redundancy in the Control of Neurite Growth* 402
 - Specificity of Connections 410
- 13 Neuron-Target Interactions 428
- Synapse Formation 428
 - Control of Neural Phenotype 438
 - Neuronal Life and Death: Trophic Factors 443
 - Box A *Rita Levi-Montalcini and the Discovery of NGF* 446

PART FOUR COMPLEX INTERACTIONS OF NEURONS AND NEURONAL DISORDERS

- 14 Cellular and Molecular Mechanisms of Neuronal Plasticity 463
- The Motor Rhythms of the Crustacean Stomatogastric Ganglion 463
 - Short-Term and Long-Term Synaptic Modulation in a Reflex Pathway of the Sea Hare, *Aplysia* 474
 - Box A *Modulation of a Potassium Channel by the cAMP-Dependent Protein Kinase* 480
 - Long-Term Potentiation in the Mammalian Hippocampus 484

Genetic Diseases of the Nervous System 497

Box A Lod Score Analysis 505

Box B Molecular Diagnostics Leads to Cancer Cure 510

Animal Models 513

Box C Street Drugs Provide Clues to Parkinson Disease 516

Box D A Heroic Woman and a Horrible Disease 518

Box E Homologous Recombination in Yeast and Mice 522

Genetic Therapies 526

Index 531
