ACADEMIC PRESS
San Diego  London  Boston  New York  Sydney  Tokyo  Toronto
Cover photo credit (paperback edition only): Mitosis in human cells is revealed by fluorescence microscopy showing GFP-labeled chromosomes that have incorporated a histone H2B-GFP fusion protein (green) coupled with immunofluorescence imaging of microtubules (blue) and centromeres (orange). The image was acquired using a Bio-Rad MRC-1024 confocal microscope. Provided by Kevin P. Sullivan.

This book is printed on acid-free paper.

# CONTENTS

Contributors  
Preface  

1. Biophysics of the Green Fluorescent Protein  
_F. G. Prendergast_  
I. Introduction  
II. Protein Folding and the Generation of This Chromophore  
III. The Biophysics of the Fluorescence of GTP  
IV. Resonance Energy Transfer Involving GFP  
V. Summary  
References  

2. Understanding Structure–Function Relationships in the _Aequorea victoria_ Green Fluorescent Protein  
_A. B. Cubitt, L. A. Woollenweber, and R. Heim_  
I. Introduction  
II. Structure  
III. Chromophore Formation  
IV. Effects of Mutations on the Spectroscopic Properties of GFP  
V. Effects of Mutations That Improve Thermosensitivity  
VI. The Development of Enhanced Mutants  
References  

3. Quantitative Imaging of the Green Fluorescent Protein (GFP)  
_D. W. Piston, G. H. Patterson, and S. M. Knobel_  
I. Introduction  
II. Factors That Influence/Limit Quantitation of GFP in Fluorescence Microscopy  
III. Applications of LSCM for Quantitative Imaging of GFP  
IV. Preparation of Purified GFP Samples  
References  

4. Single-Molecule Fluorescence Detection of Green Fluorescence Protein and Application to Single-Protein Dynamics  
_D. W. Pierce and R. D. Vale_  
I. Introduction  
II. Design Considerations for Fluorescence Microscopes for Single-Molecule Detection

13. Visualization of Large-Scale Chromatin Structure and Dynamics Using the \textit{lac} Operator/\textit{lac} Repressor Reporter System

\textit{Andrew S. Belmont, Gang Li, Gail Sudlow, and Carmen Robinett}

I. Introduction
II. Overview of Methodology
III. Construction of the \textit{lac} Operator Repeat
IV. Manipulation of the \textit{lac} Operator Repeats
V. Repressor-NLS and GFP-Repressor-NLS Constructs
VI. Gene Amplification and Cell Cloning
VII. Repressor Staining and Immunodetection of the \textit{lac} Operator Repeat
VIII. \textit{In Vivo} Observation of GFP–Repressor Localization
IX. Phototoxicity Issues
X. Present Results and Future Directions

References

14. Centrosome Dynamics in Living Cells

\textit{Aaron Young, Richard Tuft, Walter Carrington, and Stephen J. Doxsey}

I. Introduction
II. Cloning and Expression of GFP–Pericentrin
III. High-Speed Microscopy
IV. Image Restoration by an Improved Deconvolution Method
V. Imaging Centrosomes
VI. Postimaging Confirmation of Centrosome Integrity and Function

References

15. Transfections of Primary Muscle Cell Cultures with Plasmids Coding for GFP Linked to Full-Length and Truncated Muscle Proteins

\textit{Guissou A. Dabiri, Kenan K. Turnacioglu, Joseph C. Ayoob, Jean M. Sanger, and Joseph W. Sanger}

I. Introduction
II. Construction of GFP-Linked Muscle Proteins
III. Preparation of Embryonic Avian Cardiomyocytes and Skeletal Muscle Myoblasts
IV. Methods of Transfection of Cross-Striated Cells in Culture
V. Transfection of Cross-Striated Muscle Cells with Full-Length cDNA for Sarcomeric Proteins
VI. Microscopic Observations of Live Cells
VII. Postprocessing of Transfected Cells
VIII. Problems Encountered in Cells Transfected with GFP–Sarcomeric Proteins
IX. Overview
