CHEMICALS VIA HIGHER PLANT BIOENGINEERING

Edited by

Fereidoon Shahidi
Memorial University of Newfoundland
St. John, Newfoundland, Canada

Paul Kolodziejczyk
POS Pilot Plant Corporation
Saskatoon, Saskatchewan, Canada

John R. Whitaker
University of California
Davis, California

Agustín López Munguía
Institute of Biotechnology-UNAM
Cuernavaca, Morelos, Mexico

and

Glenn Fuller
USDA/ARS
Albany, California

Kluwer Academic / Plenum Publishers
New York, Boston, Dordrecht, London, Moscow
## CONTENTS

1. Novel Chemicals from Plants via Bioengineering .................................................. 1  
   Paul P. Kolodziejczyk and Fereidoon Shahidi

2. Recent Progress in Agricultural Biotechnology and Opportunities for Contract  
   Research and Development ................................................................. 5  
   Paul P. Kolodziejczyk and Paul Fedec

3. Manipulation of Plant Oil Composition for the Production of Valuable Chemicals  
   Denis J. Murphy .................................................................................. 21

4. Biosynthesis of Ricinoleate in Castor Oil ............................................................... 37  
   Thomas A. McKeon, Jiann-Tsyh Lin, and Allan E. Stafford

5. Monoterpenes in Essential Oils .......................................................................... 49  
   Herminia Loza-Tavera

6. Biochemical and Molecular Tools for the Production of Useful Terpene Products  
   from Pepper (*Capsicum annuum*) ............................................................ 63  
   Edmundo Lozoya-Gloria

7. Towards the Production of Salt-Tolerant Crops .................................................... 77  
   B. J. Barkla, R. Vera-Estrella, and O. Pantoja

8. Combinatorial Chemistry and Its Applications in Agriculture and Food ............... 91  
   Dominic W. S. Wong and George H. Robertson

9. Biological Nitrogen Fixation and Future Challenges of Agriculture ..................... 107  
   Federico Sánchez, Luis Cárdenas, and Carmen Quinto

10. Molecular Strategies to Improve the Nutritional Quality of Legume Proteins .... 117  
    Benito O. de Lumen, Alfredo F. Galvez, M. Jamela Revilleza, and  
    Deanne C. Krenz

11. Molecular Farming of Industrial Proteins from Transgenic Maize ..................... 127  
    Elizabeth E. Hood, Ann Kusnadi, Zivko Nikolov, and John A. Howard
12. Improvements in Human Health through Production of Human Milk Proteins in Transgenic Food Plants
Takeshi Arakawa, Daniel K. X. Chong, Charles W. Slattery, and William H. R. Langridge

13. Food Plant-Delivered Cholera Toxin B Subunit for Vaccination and Immunotolerization
Takeshi Arakawa, Jie Yu, and William H. R. Langridge

14. Autoantigens Produced in Plants for Oral Tolerance Therapy of Autoimmune Diseases
Shengwu Ma and A. M. Jevnikar

15. Production of Food Related Colorants by Culture of Plant Cells
A. Jiménez-Aparicio and G. Gutiérrez-López

16. Production of Recombinant Blood Factors in Transgenic Plants
Manfred Theisen

17. Recent Progress in Biotechnology of Mexican Medicinal Plants
Ma. Luisa Villarreal, Pilar Nicasio, Gabriela Rojas, Laura Alvarez, and Rodolfo Quintero

18. Chemicals from Roots, Hairy Roots, and Their Application
B. Canto-Canché and V. M. Loyola-Vargas

Index

277
