ADVANCES IN BLADDER RESEARCH

Edited by
Laurence S. Baskin

and

Simon W. Hayward
Department of Urology
University of California, San Francisco

Kluwer Academic/Plenum Publishers
New York, Boston, Dordrecht, London, Moscow
# CONTENTS

## Section I. Epithelial-Mesenchymal Interactions in the Bladder

<table>
<thead>
<tr>
<th>Overview of Epithelial-Mesenchymal Interactions in the Bladder</th>
<th>3</th>
</tr>
</thead>
<tbody>
<tr>
<td>Gerald R. Cunha</td>
<td></td>
</tr>
</tbody>
</table>

1. Uroplakins as Markers of Urothelial Differentiation  
   Tung-Tien Sun, Feng-Xia Liang, and Xue-Ru Wu  
   7  

2. Urothelial Tissue Regulation: Unraveling the Role of the Stroma  
   Jennifer Southgate, Patricia Harnden, Peter J. Selby, David F. M. Thomas, and Ludwik K. Trejdosiewicz  
   19  

3. Creation of Bladder Tissue in Vitro and in Vivo: A System for Organ Replacement  
   Anthony Atala  
   31  

4. Reconstruction of the Urinary Bladder by Auto-Augmentation, Enterocystoplasty, and Composite Enterocystoplasty  
   Mary T. Corner, David F. M. Thomas, Ludwik K. Trejdosiewicz, and Jennifer Southgate  
   43  

5. Epithelial-Mesenchymal Interactions in the Bladder: Implications for Bladder Augmentation  
   Laurence S. Baskin, Simon W. Hayward, Michael S. DiSandro, Ying Wu Li, and Gerald R. Cunha  
   49  

   Saverio Sartore, Marleen Roelofs, Angela Chiavegato, Luigi Faggian, and Rafaela Franch  
   63  

7. Replicative Senescence in Human Uroepithelial Cells  
   Jairaj A. Puthenveettil, Melissa S. Burger, and Catherine A. Reznikoff  
   83
8. Ultrastructural Smooth Muscle Ontogeny of the Rat Bladder ........................................................................................................... 93
    Hsi-Yang Wu, Laurence S. Baskin, Carrie Blakey, Joseph Goodman, and
    Gerald R. Cunha

Discussion: Epithelial-Mesenchymal Interactions in the Bladder ................................................................. 103

Section II. Muscle and Extracellular Matrix in the Bladder

Overview of Muscle and Extracellular Matrix in the Bladder ..................................................................................... 117
    Edward J. Macarak

9. Fetal Bladder Physiology .................................................................................................................................................... 121
    Hiep T. Nguyen and Barry A. Kogan

    Intestinal Submucosa Regenerated Urinary Bladder ................................................................................................. 129
    Bradley P. Kropp

11. Contractile Protein Changes in Urinary Bladder Smooth Muscle following
    Outlet Obstruction ........................................................................................................................................... 137
    Samuel Chacko, Michael DiSanto, Chandrakala Menon, Yongmu Zheng,
    Joseph Hypolite, and Alan J. Wein

12. Calcium Ion Homeostasis in Urinary Bladder Smooth Muscle .................................................................................... 155
    Stephen A. Zderic, Chaoliang Gong, Mike Desanto, Joseph Hypolite,
    Joel Hutcheson, Alan J. Wein, and Samuel Chacko

13. Cyclooxygenase-2: A Key Regulator of Bladder Prostaglandin Formation ............................................................ 171
    John M. Park, Jürgen B. Schnermann, and Josephine P. Briggs

14. Role of Angiotensin II in Bladder Smooth Muscle Growth and Function ............................................................... 183
    Earl Y. Cheng, Robert S. Decker, and Chung Lee

15. New Concepts on the Normal and Abnormal Developing Bladder ........................................................................ 193
    Ellen Shapiro

16. Biochemical and Physiological Characterization of the Urinary Bladder in
    Ehlers-Danlos Syndrome .................................................................................................................................... 201
    Catherine M. Deveaud, William A. Kennedy II, Stephen A. Zderic, and
    Pamela S. Howard

17. The Role of Collagen in Bladder Filling .................................................................................................................. 215
    Edward J. Macarak and Pamela S. Howard

Discussion: Muscle and Extracellular Matrix in the Bladder ................................................................................. 225

Section III. Nerves and Pharmacology in the Bladder

Overview of Nerves and Pharmacology in the Bladder ............................................................................................ 237
    Robert M. Levin
<table>
<thead>
<tr>
<th>Section IV. Infection, Immunology, and Interstitial Cystitis in the Bladder</th>
</tr>
</thead>
<tbody>
<tr>
<td>25. Pathophysiology of Bacterial Cystitis</td>
</tr>
<tr>
<td>James A. Roberts</td>
</tr>
<tr>
<td>26. Role of Vaginal Colonization in Urinary Tract Infections (UTIs)</td>
</tr>
<tr>
<td>Anthony J. Schaeffer, Nithya Rajan, E. Thorburn Wright, James L. Duncan,</td>
</tr>
<tr>
<td>Byron E. Anderson</td>
</tr>
<tr>
<td>27. Host Factors in Susceptibility to Urinary Tract Infections</td>
</tr>
<tr>
<td>Ann Stapleton</td>
</tr>
<tr>
<td>28. Induction of Nitric Oxide Synthase with Urinary Tract Infections</td>
</tr>
<tr>
<td>Marcia A. Wheeler, Shannon D. Smith, and Robert M. Weiss</td>
</tr>
</tbody>
</table>
29. Interferon Alpha for the Treatment of Superficial Bladder Cancer
   John Naitoh, John Franklin, Michael A. O'Donnell, and Arie S. Belldegrun

Discussion: Infection, Immunology, and Interstitial Cystitis in the Bladder

Section V. Cancer of the Bladder

Overview of Cancer of the Bladder
   S. W. Hayward

30. Urokinase (u-PA) and the u-PA Receptor: Modulation of in Vitro Invasiveness of
    Human Bladder Cancer Cell Lines
   M'Liss A. Hudson and L. Michelle McReynold

31. The Role of Matrix Metalloproteinases in an in Vitro Model of Bladder Tumor
    Invasion
   Catherine Booth, Patricia Harnden, Peter J. Selby, Ludwik K. Trejdosiewicz,
   and Jennifer Southgate

32. DNA Methylation in Development of Bladder Cancer
   Peter A. Jones

33. Cellular Proliferation and Cell-Cell Cycle Regulatory Proteins as Prognostic
    Markers for Transitional Cell Carcinoma of the Bladder
   Gary D. Grossfeld, Michael Muscheck, John P. Stein, Karen Chew,
   Richard J. Cote, David A. Ginsberg, Frederic M. Waldman, and
   Peter R. Carroll

34. Urothelial Differentiation and Bladder Cancer
   Monica Liebert, Daniel Gebhardt, Christopher Wood, I-Ling Lee Chen,
   Jeffrey Ellard, Daniel Amancio, and H. Barton Grossman

35. Complexity, Retinoid-Responsive Gene Networks, and Bladder Carcinogenesis
   Robert E. Hurst, Przemyslaw Waliszewski, Mirosława Waliszewska,
   Rebecca B. Bonner, Doris M. Benbrook, Arindam Dar, and
   George P. Hemstreet, III

36. Tumor Cell Motility: A Novel Therapeutic Target in Bladder Carcinoma,
    Experimental and Clinical Results
   T. Otto, G. Lümmen, A. Be, H. Rübben, and A. Raz

Discussion: Cancer of the Bladder
