Second Supplements to the 2nd Edition of

RODD'S CHEMISTRY OF
CARBON COMPOUNDS

A modern comprehensive treatise

Edited by
MALCOLM SAINSBURY
School of Chemistry, The University of Bath,
Claverton Down, Bath BA2 7AY, England

Second Supplement to

VOLUME IV HETEROCYCLIC COMPOUNDS

Part I: Six-membered Heterocyclic Compounds with Two Hetero-Atoms from Group V of the Periodic Table: the Pyridazine and Pyrimidine Groups.

Part J: Six-membered Heterocyclic Compounds with Two Hetero-Atoms from Group V of the Periodic Table: the Pyrazine Group, Phenoxazine, Phenothiazine, Phenazine and Sulphur Dyes. Six-membered Heterocyclic Compounds with Three or More Hetero-Atoms.

Contributors to this Volume

R. BOLTON
Department of Chemistry, University of Surrey, Guildford,
Surrey GU2 5XH, England

C.J. GRANVILLE SHAW
Department of Chemistry, Brunel University, Uxbridge UB8 3PH, England

D. HURST
Kingston University, Penrhyn Road, Kingston upon Thames KT1 2EE,
Surrey, England

K.J. McCULLOUGH
Department of Chemistry, Heriot Watt University, Edinburgh EH14 4AS,
Scotland, U.K.

L.K. MEHTA
Department of Chemistry, Brunel University, Uxbridge UB8 3PH, England

S. JOHNE
Friedensstrasse 60, D-06749 Bitterfeld, Germany

D.F. O'SHEA
Department of Chemistry, University College Dublin,
Belfield, Dublin 4, Republic of Ireland

P.J. PARRICK
Department of Chemistry, Brunel University, Uxbridge UB8 3PH, England
Six-membered Heterocyclic Compounds with Two Hetero-Atoms from Group V of the Periodic Table: the Pyridazine and Pyrimidine Groups, the Pyrazine Group, Phenoxazine, Phenothiazine, Phenazine and Sulphur Dyes. Six-membered Heterocyclic Compounds with Three or More Hetero-Atoms

List of contributors ......................................................... v
Preface ................................................................. vii
List of common abbreviations and symbols used ................................... xiii

Chapter 42. Pyridazines, Cinnolines, Benzocinnolines and Phthalazines
by J. PARRICK, C.J. GRANVILLE SHAW AND L.K. MEHTA

1. Pyridazines .......................................................... 1
   (a) Methods of synthesis ................................................. 1
      (i) From arylhydrazones, 1 – (ii) Cyclisations using hydrazines and hydrazones, 3 – (iii) Cycloadditions reactions, 10 – (iv) From other heterocyclic compounds, 12 – (v) Microwave techniques, 14 –
   (b) Reactions ................................................................. 15
   (c) Complexes with metal ions ............................................. 28
   (d) Physical properties and spectra ...................................... 30
   (e) Biological activity .................................................... 32
   (f) Herbicides ............................................................. 40
   (g) Miscellaneous applications .......................................... 41
2. Cinnoline and its derivatives ........................................... 42
   (a) Methods of synthesis ................................................... 42
      (i) From diazonium salts, 42 – (ii) From phenylhydrazones, 42 –
         (iii) Replacement of fluorine, 43 – (iv) Addition reactions, 44 –
         (v) By formation of the N–N bond, 45 – (vi) From γ-ketoesters or cyclohexan-1,3-diones, 45 –
      (b) Physical properties .................................................. 46
      (c) Reactions ............................................................. 47
3. The benzocinnolines ..................................................... 49
   (a) Benzo[c]cinnoline ...................................................... 49
      (i) Methods of preparation, 49 – (ii) Physical properties, 50 – (iii) Reactions, 51 –
      (b) Benzo[f]cinnolines ................................................... 52
      (c) Benzo[h]cinnolines ................................................... 52
4. Phthalazine and its derivatives ......................................... 53
   (a) Methods of synthesis ................................................... 53
      (i) From phthalic acid derivatives, 53 – (ii) From cycloaddition reactions, 54 – (iii) From amidines, 57 –
      (b) Physical properties ................................................... 57
      (c) Reactions of the heterocycle ...................................... 59
Chapter 43. Pyrimidines and Quinazolines
by D.T. Hurst

1. Introduction ........................................... 71
2. Pyrimidines ........................................... 72
   (a) Properties and structural aspects .................. 72
   (b) Synthesis ........................................ 72
   (c) Reactions of pyrimidines .......................... 79
      (i) Substitution, 79
      (ii) Metallation reactions, 84
      (iii) Ring transformations and miscellaneous reactions of pyrimidines, 87

3. Quinazolines .......................................... 91
   (a) Properties and structural aspects ................ 91
   (b) Synthesis ........................................ 91
   (c) Reactions ...................................... 95

Chapter 44. Pyrazines and Related Ring Structures
by K.J. McCullough

1. Pyrazines, 1,4-diazines ............................... 99
   (a) Introduction .................................... 99
   (b) Physical and spectroscopic properties .......... 101
   (c) General methods of synthesis ..................... 101
   (d) Pyrazine, its homologues and derivatives ......... 102
      (i) Pyrazine, alkyl-, alkenyl-, alkynyl- and aryl-pyrazines, 102
      (ii) Halopyrazines, 110
      (iii) Aminopyrazines, alkylthiopyrazines and related derivatives, 111
      (iv) Pyrazinols (pyrazinones), alkoxypyrazines, alkylthiopyrazines and related derivatives, 111
      (v) Pyrazine N-oxides, 113
      (vi) Pyrazinonic acids and related derivatives, 115
      (vii) Cyanopyrazines, 116
      (viii) Pyrazine C-nucleosides, 119
   (e) Reduced pyrazines ................................ 121
      (i) Dihydropyrazines, 121
      (ii) Tetrahydropyrazines, 127
      (iii) Hexahydropyrazines (piperazines), 128
      (iv) Ketopiperazines, 133
      (v) Miscellaneous fused pyrazines, 137

2. Quinoxalines, benzopyrazines ....................... 137
   (a) Introduction .................................... 137
   (b) Physical and spectroscopic properties .......... 138
   (c) General methods of synthesis ..................... 139
2. Tetrazines ................................................................. 254
   (a) 1, 2, 3, 4- and 1, 2, 3, 5-Tetrazines ....................... 254
       (i) Synthesis and structure, 254 –
   (b) 1,2,4,5-Tetrazines (s-tetrazines) ....................... 256
       (i) Synthesis and structure, 256 – (ii) Reactions of 1,2,4,5-tetrazines, 258 –
   (c) Verdaizls ......................................................... 262
3. Pentazine and hexazene ............................................. 263
   (II) Nitrogen with Sulphur and/or Oxygen .................... 265
      1. Sulphur–nitrogen rings .................................. 265
      2. Oxygen–nitrogen rings .................................. 268
      3. Oxygen–nitrogen–sulphur rings ....................... 271
   (III) Oxygen, Sulphur Rings ..................................... 272
      1. Trioxanes and oxygen–sulphur rings ................. 272
      2. Tri- and Tetrathianes .................................. 273
Guide to the Index ..................................................... 277
Index ................................................................. 279
