PART VIII Cell Function and Differentiation

35. Analysis of Mitochondria by Flow Cytometry
   Martin Poot and Robert H. Pierce
   I. Introduction 118
   II. Materials and Methods 121
   III. Critical Aspects 125
   References 126

36. Analysis of RNA Synthesis by Cytometry
   Peter Ostrup Jensen, Jacob Larsen, and Jorgen K. Larsen
   I. Introduction 129
   II. Background 130
   III. Methods for Analysis of 5'-Bromouridine Incorporation and DNA Content 131
   IV. Results of Labeling RNA with 5'-Bromouridine 134
   V. Applications 136
   References 137
37. Flow Cytometry of Erythropoiesis in Culture: Bivariate Profiles of Fetal and Adult Hemoglobin
   Ralph M. Böhmer
   I. Introduction
   II. Details of the Method
   III. Sample Experiments
   IV. Problems and Limitations
   References

38. Flow Cytometric Analysis of Human Hemopoietic Progenitor Differentiation by Assessing Cell Division Rate and Phenotypic Profile
   Luca Pierelli, Giovanni Scambia, and Andrea Fattorossi
   I. Introduction
   II. Background
   III. Critical Aspects of Methodology
   IV. Functionally Distinct Circulating Hemopoietic Progenitor Subsets Can Be Assessed during Cytokine-Driven Differentiation
   V. Concluding Remarks
   References

PART IX Experimental Oncology

39. Cytometry of Antitumor Drug–Intracellular Target Interactions
   Paul J. Smith and Marie Wiltshire
   I. Introduction
   II. General Classification of Cytotoxic Anticancer Agents
   III. Establishment of Quality Control Parameters
   IV. Drug–DNA Interactions
   V. Conclusions
   References

40. Monitoring of Cellular Resistance to Cancer Chemotherapy: Drug Retention and Efflux
   Awtar Krishan
   I. Introduction and Background
   II. Applications
   III. Cell Lines, Efflux, Multiple Drug Resistance Drugs, and Blockers
   IV. Staining Protocols
   V. Critical Aspects
   VI. Controls, Standards, and Instruments
   VII. Results and Conclusions
   References
41. Resistance of Tumor Cells to Chemo- and Radiotherapy Modulated by the Three-Dimensional Architecture of Solid Tumors and Spheroids
   Ralph E. Durand and Peggy L. Olive
   I. Introduction and Historical Perspective 211
   II. Background 213
   III. Methods 215
   IV. Results and Discussion 217
   V. Conclusions and Future Directions 227
   References 228

42. Analysis of DNA Damage in Individual Cells
   Peggy L. Olive, Ralph E. Durand, Judit P. Banáth, and Peter J. Johnston
   I. Introduction 235
   II. The Development of the Single Cell Gel Electrophoresis/Comet Assay 236
   III. Comet Preparation and Analysis 238
   IV. Types of Damage Detected by the Comet Assay 242
   V. Using DNA Damage to Predict Cell Survival in Complex Systems 244
   VI. Future Directions 246
   References 247

43. Cytometric Methods to Analyze Ionizing-Radiation Effects
   William D. Wright, Isabelle Lagroye, Peng Zhang, Robert S. Malyapa, and Joseph L. Roti Roti
   I. Introduction 251
   II. Applications 252
   III. Methods for Measuring DNA Damage on a Cell-by-Cell Basis 253
   IV. Summary 267
   References 267

44. Cytometric Methods to Analyze Thermal Effects
   Robert P. VanderWaal, Ryuji Higashikubo, Mai Xu, Douglas R. Spitz, William D. Wright, and Joseph L. Roti Roti
   I. Introduction 269
   II. Application 270
   III. Methods to Measure Nuclear and Nuclear Matrix Protein Content 271
   IV. Identification of Altered DNA Replication Patterns Following Heat Shock 276
   V. Nuclear Localization of hsp70 278
   VI. Prooxidant Measurement 280
   VII. Results 281
   References 285
PART X Clinical Oncology

45. Multiparameter Data Acquisition and Analysis of Leukocytes by Flow Cytometry

Carleton C. Stewart and Sigrid J. Stewart

I. Introduction 289
II. Correlated List Mode Data 290
III. Verification of Instrument Performance 293
IV. Optical Filtration and Spectral Compensation 295
V. Multiparameter Data Analysis 308
VI. Summary 311
   References 311

46. Immunophenotyping of Hematological Malignancies by Laser Scanning Cytometry

Richard J. Clatch

I. Immunophenotyping of Leukemia and Lymphoma: General Considerations 313
II. Description of Laser Scanning Cytometry 316
III. Immunophenotyping by Laser Scanning Cytometry 316
IV. Extensions of the Method 327
V. Conclusions 340
   References 340

47. Immunophenotyping of Acute Leukemia: Utility of CD45 for Blast Cell Identification

J-P. Vial and F. Lacombe

I. Introduction 344
II. Background 344
III. Methods 345
IV. Results and Comparison with Other Methods 348
V. Critical Aspects of the Methodology 352
VI. Pitfalls and Misinterpretation of the Data 353
VII. Future Directions 355
   References 357

48. Cell Proliferation Markers in Human Solid Tumors: Assessing Their Impact in Clinical Oncology

Maria Grazia Daidone, Aurora Costa, and Rosella Silvestrini

I. Introduction 359
II. Proliferation Markers 361
III. Biological Studies 365
IV. Clinical Studies 366
V. Conclusions on First Generation Translational Studies with Proliferation Markers
   References 378

PART XI Microorganisms and Infectious Diseases

53. Flow Cytometric Analysis of Microorganisms
   S. A. Sincock and J. Paul Robinson
   I. Introduction 511
   II. Experimental Approaches 514
   III. Applications in Medical and Food Microbiology 526
   IV. Conclusion 531
   References 532

54. Staining and Measurement of DNA in Bacteria
   Harald B. Steen
   I. Introduction 539
   II. Basic Considerations 540
   III. Experimental Methods 543
   IV. Standards and Controls 548
   References 550

55. Flow Cytometric Monitoring of Bacterial Susceptibility to Antibiotics
   Mette Walberg and Harald B. Steen
   I. Introduction 553
   II. Fluorescent Dyes 554
   III. Uptake of Fluorescent Dyes 555
   IV. Effects of Antibiotics 558
   V. Assessment of Drug Effects 558
   VI. Applications of Flow Cytometry to Medical Microbiology 563
   References 563

56. Flow Cytometry for Evaluation and Investigation of Human Immunodeficiency Virus Infection
   Thomas W. Mc Closhrey
   I. Introduction 567
   II. Application of Flow Cytometry to Monitor HIV Infection 568
   III. Application of Flow Cytometry to Investigate HIV Disease 582
   IV. Conclusions 584
   References 584

Index 593
Volumes in Series 609
PART I Principles of Cytometry and General Methods
1. A Brief History of Flow Cytometry and Sorting  
   Myron R. Melamed

2. Principles of Flow Cytometry: An Overview  
   Alice L. Givan

3. Laser Scanning Cytometry  
   Louis A. Kamentsky

4. Principles of Confocal Microscopy  
   J. Paul Robinson

5. Optical Measurements in Cytometry: Light Scattering, Extinction, Absorption, and Fluorescence  
   Howard M. Shapiro

6. Flow Cytometric Fluorescence Lifetime Measurements  
   Harry A. Crissman and John A. Steinkamp

7. Principles of Data Acquisition and Display  
   Howard M. Shapiro

8. Time as a Flow Cytometric Parameter  
   Larry Seamer and Larry A. Sklar

9. Protein Labeling with Fluorescent Probes  
   Kevin L. Holmes and Larry M. Lantz

PART II Cell Preparation
10. Preparation of Cells from Blood  
    J. Philip McCoy, Jr.
11. Cell Preparation for the Identification of Leukocytes
Carleton C. Stewart and Sigrid J. Stewart

12. Strategies for Cell Permeabilization and Fixation in Detecting Surface and Intracellular Antigens
Steven K. Koester and Wade E. Bolton

PART III Standardization, Quality Assurance
13. Stoichiometry of Immunocytochemical Staining Reactions
James W. Jacobberger

14. Standardization and Quantitation in Flow Cytometry
Robert A. Hoffman

PART IV Cell Proliferation
15. Methods to Identify Mitotic Cells by Flow Cytometry
Gloria Juan, Frank Traganos, and Zbigniew Darzynkiewicz

16. Cell Cycle Kinetics Estimated by Analysis of Bromodeoxyuridine Incorporation
Nicholas H. A. Terry and R. Allen White

17. Flow Cytometric Analysis of Cell Division History Using Dilution of Carboxyfluorescein Diacetate Succinimidyl Ester, a Stably Integrated Fluorescent Probe
A. Bruce Lyons, Jhagvaral Hashold, and Philip D. Hodgkin

18. Antibodies against the Ki-67 Protein: Assessment of the Growth Fraction and Tools for Cell Cycle Analysis
Elmar Endl, Christiane Hollmann, and Johannes Gerdes

19. Detection of Proliferating Cell Nuclear Antigen
Jørgen K. Larsen, Göran Landberg, and Göran Roos

20. Lymphocyte Activation Associated Antigens
Andrea Fattorossi, Alessandra Battaglia, and Cristiano Perlini
PART V Cell Death/Apoptosis

21. Analysis of Mitochondria during Cell Death
   Andrea Cossarizza and Stefano Salvioni

22. Cytometry of Caspases
   Steven K. Koester and Wade E. Bolton

23. Analysis of Apoptosis in Plant Cells
   Iona E. Weir

24. Difficulties and Pitfalls in Analysis of Apoptosis
   Zbigniew Darzynkiewicz, Elżbieta Bedner, and Frank Traganos

PART VI Cell–Cell, Cell–Environment Interactions

25. Analysis of Cell Migration
   Nicole Dodge Zantek and Michael S. Kinch

26. Three-Dimensional Extracellular Matrix Substrates for Cell Culture
   Sherry L. Voytik-Harbin

27. Three-Dimensional Imaging of Extracellular Matrix and Extracellular Matrix–Cell Interactions
   Sherry L. Voytik-Harbin, Bartłomiej Rajwa, and J. Paul Robinson

28. Cytometric Analysis of Cell Contact and Adhesion
   Michael S. Kinch

   Emma T. Bowden, Peter J. Coopman, and Susette C. Mueller
