List of Contributors ................................................................. v

Foreword by Christopher Reeve ................................................ xi

Preface ......................................................................................... xiii

Section I. Spinal cord injuries in patients

1. Advances in imaging of spinal cord injury: implications for treatment and patient evaluation

   R.M. Quencer (Miami, FL, USA) ............................................... 3

2. A review of the adaptability and recovery of locomotion after spinal cord injury

   H. Barbeau, J. Fung, A. Leroux and M. Ladouceur (Montreal, QC, Canada) ............................... 9

3. Electrical stimulation for therapy and mobility after spinal cord injury

   R.B. Stein, S.L. Chong, K.B. James, A. Kido, G.J. Bell, L.A. Tubman and M. Bélanger (Edmonton, AB and Montreal, QC, Canada) .... 27

Section II. Spinal cord injuries in animal models

4. Cell death in models of spinal cord injury

   M.S. Beattie, G.E. Hermann, R.C. Rogers and J.C. Bresnahan (Columbus, OH, USA) ..................... 37

5. Gray matter repair in the cervical spinal cord

   P.J. Reier, F.J. Golder, D.C. Bolser, C. Hubscher, R. Johnson, G.W. Schrimsher and M.J. Velardo (Gainesville, FL and Houston, TX) ................................................................. 49

6. Spinal cord neural organization controlling the urinary bladder and striated sphincter

   S.J. Shefchyk (Winnipeg, MB, Canada) ........................................ 71

7. Central mechanisms for autonomic dysreflexia after spinal cord injury

   L.C. Weaver, D.R. Marsh, D. Gris, S.O. Meakin and G.A. Dekaban (London, ON, Canada) ................ 83
8. The spinal locomotor CPG: a target after spinal cord injury  
S. Grillner (Stockholm, Sweden) ................................................. 97

9. Activation and coordination of spinal motoneuron pools after spinal cord injury  
A. Prochazka, V. Mushahwar and S. Yakovenko (Edmonton, AB, Canada) ......................................................... 109

10. Propriospinal neurons involved in the control of locomotion: potential targets for repair strategies?  
L.M. Jordan and B.J. Schmidt (Winnipeg, MB, Canada) .............. 125

11. Use of robotics in assessing the adaptive capacity of the rat lumbar spinal cord  
R.D. de Leon, D.J. Reinkensmeyer, W. K. Timoszyk, N.J. London, R.R. Roy and V.R. Edgerton (Los Angeles and Irvine, CA, USA) ... 141

12. The cat model of spinal injury  

Section III. Neuroprotection and transplantation

13. Neurotrauma/neurodegeneration and mitochondrial dysfunction  
M. Frantseva, J.L.P. Velasquez, A. Tonkikh, Y. Adamchik and P.L. Carlen (Toronto, ON, Canada) .............................. 171

14. Secondary injury mechanisms of spinal cord trauma: a novel therapeutic approach for the management of secondary pathophysiology with the sodium channel blocker Riluzole  
G. Schwartz and M.G. Fehlings (Toronto, ON, Canada) ............. 177

15. Strategies for regeneration and repair in spinal cord traumatic injury  
M. Giménez y Ribotta, M. Gaviria, V. Menet and A. Privat (Montpellier, France) .................................................... 191

16. Locomotor recovery in chronic spinal rat: long-term pharmacological treatment or transplantation of embryonic neurons?  
D. Orsal, J.-Y. Barthe, M. Antri, D. Feraboli-Lohnherr, A. Yakovleff, M. Giménez y Ribotta, A. Privat, J. Provencher and S. Rossignol (Paris and Montpellier, France and Montreal, QC, Canada) ... 213

17. Spinal cord contusion models  
W. Young (Piscataway, NJ, USA) ................................................. 231

18. Transplants and neurotrophic factors increase regeneration and recovery of function after spinal cord injury  
B.S. Bregman, J.-V. Coumans, H.N. Dai, P.L. Kuhn, J. Lynskey, M. McAtee and F. Sandhu (Washington DC, USA) .................. 257
19. Bridging the transected or contused adult rat spinal cord with Schwann cell and olfactory ensheathing glia transplants
M.B. Bunge (Miami, FL, USA) ........................................... 275

20. Potent possibilities: endogenous stem cells in the adult spinal cord
A.C. Lipson and P.J. Horner (Seattle, WA, USA) ......................... 283

21. Repairing the damaged spinal cord: a summary of our early success with embryonic stem cell transplantation and remyelination
J.W. McDonald and M.J. Howard (St. Louis, MO, USA) ............ 299

Section IV. Molecular targets to promote axon regeneration in the CNS

22. Chondroitin sulfate proteoglycans in the CNS injury response
D.A. Morgenstern, R.A. Asher and J.W. Fawcett (Cambridge, UK) . 313

23. The extracellular matrix in axon regeneration
B. Grimpe and J. Silver (Cleveland, OH, USA) ......................... 333

24. Increasing plasticity and functional recovery of the lesioned spinal cord
M.E. Schwab (Zurich, Switzerland) ....................................... 351

25. Nogo and the Nogo-66 receptor
A.E. Fournier, T. GrandPre, G. Gould, X. Wang and S.M. Strittmatter (New Haven, CT, USA) ........................................... 361

26. Inactivation of intracellular Rho to stimulate axon growth and regeneration
B. Ellezam, C. Dubreuil, M. Winton, L. Loy, P. Dergham, I. Sellés-Navarro and L. McKerracher (Montreal, QC, Canada and Murcia, Spain) ................................................................. 371

27. A role for cAMP in regeneration during development and after injury
J. Qiu, D. Cai and M.T. Filbin (New York, NY, USA) ................. 381

28. Inosine stimulates axon growth in vitro and in the adult CNS
L.I. Benowitz, D. Goldberg and N. Irwin (Boston, MA, USA) ...... 389

29. T-cell based therapeutic vaccination for spinal cord injury
M. Schwartz and E. Hauben (Rehovot, Israel) .......................... 401

30. Recruiting the immune response to promote long distance axon regeneration after spinal cord injury
S. David (Montreal, QC, Canada) .......................................... 407

31. Spontaneous and neurotrophin-induced axonal plasticity after spinal cord injury
A. Blesch and M.H. Tuszynski (La Jolla, CA, USA) .................... 415
32. Where the rubber meets the road: netrin expression and function in developing and adult nervous systems
   C. Manitt and T.E. Kennedy (Montreal, QC, Canada) .................. 425

33. Reinnervation of the pretectum in adult rats by regenerated retinal ganglion cell axons: anatomical and functional studies
   M. Vidal-Sanz, M. Aviles-Trigueros, S.J.O. Whiteley, Y. Sauvé and R.D. Lund (Murcia and Alicante, Spain, Sheffield, UK and Salt Lake City, UT, USA) ..................................................... 443

34. Seeking axon guidance molecules in the adult rat CNS
   G. Doucet and A. Petit (Montreal, QC, Canada) ......................... 453

Subject Index .................................................................................. 467
