NEURAL CONTROL OF SPACE CODING AND ACTION PRODUCTION

EDITED BY

C. PRABLANC
D. PÉLISSON
Y. ROSSETTI

Unité 534, INSERM Espace et Action, 16 Avenue Doyen Lépine, 69500 Bron, France
Contents

List of Contributors ................................................................. v
Preface ......................................................................................... ix
Acknowledgements ........................................................................ xi

Section I. Gaze Control

1. Cortical control of ocular saccades in humans: a model for motricity
   C. Pierrot-Deseilligny, R.M. Miiri, C.J. Ploner, B. Gaymard and
   S. Rivaud-Péchoux (Paris, France, Bern, Switzerland and Berlin,
   Germany) .................................................................................. 3

2. Effects of lesions of the cerebellar oculomotor vermis on eye movements in
   primate: binocular control
   M. Takagi, R. Tamargo and D.S. Zee (Niigata, Japan and Baltimore,
   MD, USA) .................................................................................. 19

3. Single cell signals: an oculomotor perspective
   D.L. Sparks and N.J. Gandhi (Houston, TX, USA) ......................... 35

4. On the feedback control of orienting gaze shifts made with eye and head
   movements
   D. Guitton, A. Bergeron, W.Y. Choi and S. Matsuo (Montreal, QC,
   Canada) .................................................................................... 55

5. Control of saccadic eye movements and combined eye/head gaze shifts by the
   medio-posterior cerebellum
   D. Pélisson, L. Goffart and A. Guillaume (Bron, France) .............. 69

6. Neural activity in the primate superior colliculus and saccadic reaction times in
   double-step experiments
   L. Lünenburger, W. Lindner, K.-P. Hoffmann (Bochum, Germany) .. 91

7. Neural control of 3-D gaze shifts in the primate
   E.M. Klier, J.C. Martinez-Trujillo, W.P. Medendorp, M.A. Smith and
   J.D. Crawford (Toronto, ON, Canada) ........................................ 109
Section II. Motor Programming and Control

8. From ‘acting on’ to ‘acting with’: the functional anatomy of object-oriented action schemata
   S.H. Johnson and S.T. Grafton (Hanover, NH, USA) ....................... 127

9. Interactions between ocular motor and manual responses during two-dimensional tracking
   K.C. Engel and J.F. Soechting (Minneapolis, MN, USA) ................. 141

10. Neural control of on-line guidance of hand reaching movements
    C. Prablanc, M. Desmurget and H. Gréa (Bron, France) ............... 155

11. Internal forward models in the cerebellum: fMRI study on grip force and load force coupling
    M. Kawato, T. Kuroda, H. Imamizu, E. Nakano, S. Miyauchi and T. Yoshioka (Kyoto and Hyogo, Japan) ......................... 171

12. A multisensory posture control model of human upright stance
    T. Mergner, C. Maurer and R.J. Peterka (Freiburg, Germany and Portland, OR, USA) .................................................. 189

13. Role of sensory information in updating internal models of the effector during arm tracking
    J.-L. Vercher, F. Sarès, J. Blouin, C. Bourdin and G. Gauthier (Marseille, France) ....................................................... 203

Section III. Normal and Pathological Spatial Representations

14. Delayed reaching and grasping in patients with optic ataxia
    A.D. Milner, H.C. Dijkerman, R.D. McIntosh, Y. Rossetti and L. Pisella (Stockton-on-Tees, UK, Utrecht, The Netherlands and Bron, France) .............................................................. 225

15. Conscious visual representations built from multiple binding processes: evidence from neuropsychology
    G.W. Humphreys (Birmingham, UK) ........................................ 243

16. Modulation and rehabilitation of spatial neglect by sensory stimulation
    G. Kerkhoff (Munich, Germany) ............................................. 257

17. Bottom-up transfer of sensory–motor plasticity to recovery of spatial cognition: visuomotor adaptation and spatial neglect
    G. Rode, L. Pisella, Y. Rossetti, A. Farnè and D. Boisson (Bron and Lyon, France) ....................................................... 273
18. Anosognosia for left-sided motor and sensory deficits, motor neglect and sensory hemiinattention: is there a relationship?
   G. Vallar, G. Bottini and R. Sterzi (Milan and Pavia, Italy) ........... 289

Subject Index ................................................................. 303
