Contents

List of Contributors vi

Chapter 1
An Historical Perspective on Genomic Technologies
D. Galas and S. J. McCormack 1

Chapter 2
Molecular Cytogenetics and Human Genome Function
Pierre P. Massion and Joe W. Gray 11

Chapter 3
Genome Comparison Techniques
Lisa Stubbs 43

Chapter 4
Impact of Transgenic Technologies on Functional Genomics
Cooduvalli S. Shashikant and Frank H. Ruddle 67

Chapter 5
Present and Future of Tags and Labels in High Throughput Genomic Analysis
Jeffrey Van Ness 125

Chapter 6
MAGICChip: Properties and Applications in Genomic Studies
Alexander Kolchinsky and Andrei Mirzabekov 163

Chapter 7
Mass Spectrometry of Nucleic Acids
Zhaojing Meng and Patrick A. Limbach 197

Chapter 8
Detection of Single Nucleotide Polymorphisms
Pui-Yan Kwok 235

Chapter 9
Live Cell Assays: Tools for Functional Genomics
Gregory W. Henkel 279
Chapter 10
Automation and Robotics in Genomics Laboratories
Theodore E. Mifflin, Steven D. Hamilton, Gary W. Kramer, and Robin A. Felder

Chapter 11
Computational DNA Sequence Analysis and Annotation
Hyatt, D. and Uberbacher, E.C.

Chapter 12
Beyond Sequence Similarity, or Sequence Analysis in the Age of the Genome
Itai Yanai, Adnan Derti and Charles DeLisi

Index
