All Rights Reserved.
No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the Publisher.

The appearance of the code at the bottom of the first page of a chapter in this book indicates the Publisher's consent that copies of the chapter may be made for personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (222 Rosewood Drive, Danvers, Massachusetts 01923), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-2003 chapters are as shown on the title pages. If no fee code appears on the title page, the copy fee is the same as for current chapters.

0074-7696/2003 $35.00

CONTENTS

Contributors ......................................................................................................................... ix

Distribution, Function, and Properties of Leptin Receptors in the Brain
Hisayuki Funahashi, Toshihiko Yada, Ryusuke Suzuki, and Seiji Shioda

I. Introduction ....................................................................................................................... 1
II. Leptin Receptors in Brain ................................................................................................. 7
III. Functional Significance of Leptin on Feeding Regulation in Brain .................................. 16
IV. Concluding Remarks ....................................................................................................... 18
References ........................................................................................................................... 20

Apoptosis and Necrosis in Health and Disease: Role of Mitochondria
Anna-Liisa Nieminen

I. Introduction ....................................................................................................................... 29
II. Overview of Cell Death .................................................................................................... 30
III. Mitochondrial Dysfunction Associated with Necrotic Cell Killing ................................. 32
IV. Mitochondria and Apoptotic Cell Death ......................................................................... 42
V. Concluding Remarks ....................................................................................................... 49
References ........................................................................................................................... 49
Structure-Specific DNA-Binding Proteins
as the Foundation for Three-Dimensional
Chromatin Organization

O. I. Podgornaya, A. P. Voronin, N. I. Enukashvily, I. V. Matveev,
and I. B. Lobov

I. Introduction .................................................................................. 228
II. Telomere-Binding Proteins ................................................................. 229
III. Satellite DNA and Specifically Binding Proteins ............................. 237
IV. MAR- and Satellite DNA-Binding Proteins .................................... 253
V. Conclusion: 3-D Chromatin Structure of the Interphase Nucleus ........ 277
   References ..................................................................................... 279

Index ................................................................................................. 297
