List of Contents

Reverse Genetics of Mononegavirales
K.-K. Conzelmann ............................................. 1

Reverse Genetics Systems for the Generation of Segmented Negative-Sense RNA Viruses Entirely from Cloned cDNA G. Neumann and Y. Kawaoka ....................................... 43

Transcription and Replication of Nonsegmented Negative-Strand RNA Viruses S.P.J. Whelan, J.N. Barr and G.W. Wertz ................................................. 61

Orthomyxovirus Replication, Transcription, and Polyadenylation G. Neumann, G.G. Brownlee, E. Fodor and Y. Kawaoka ....................... 121

Escaping from the Cell: Assembly and Budding of Negative-Strand RNA Viruses A.P. Schmitt and R.A. Lamb ............................................. 145

Accessory Genes of the Paramyxoviridae, a Large Family of Nonsegmented Negative-Strand RNA Viruses, as a Focus of Active Investigation by Reverse Genetics Y. Nagai and A. Kato ................................................. 197

Identification and Characterization of Viral Antagonists of Type I Interferon in Negative-Strand RNA Viruses A. García-Sastre .................................................. 249

Toward Novel Vaccines and Therapies Based on Negative-Strand RNA Viruses V. von Messling and R. Cattaneo ............................................. 281

Influenza Vaccines Generated by Reverse Genetics K. Subbarao and J.M. Katz ................................................. 313

Subject Index ................................................. 343
