Contents

Preface ........................................................................................................................................... v
Contributors ............................................................................................................................... xiii

PART I. OVERVIEW

1 Structural Basis of Protein–Protein Interactions
   Robert C. Liddington .................................................................................................................. 3

2 Quantitative Analysis of Protein–Protein Interactions
   Keith D. Wilkinson .................................................................................................................... 15

PART II. IN VITRO TECHNIQUES

3 Characterization of Protein–Protein Interactions
   by Isothermal Titration Calorimetry
   Adrian Velazquez-Campoy, Stephanie A. Leavitt, and Ernesto Freire
   .................................................................................................................................................. 35

4 Circular Dichroism Analysis for Protein–Protein Interactions
   Norma J. Greenfield .................................................................................................................. 55

5 Protein–Protein Interaction Analysis by Nuclear Magnetic Resonance Spectroscopy
   Guanghua Gao, Jason G. Williams, and Sharon L. Campbell .................................................. 79

6 Measuring Rhodopsin–G-Protein Interactions by Surface Plasmon Resonance
   John Northup .................................................................................................................................. 93

7 Using Light Scattering to Determine the Stoichiometry of Protein Complexes
   Jeremy Mogridge ....................................................................................................................... 113

8 Sedimentation Equilibrium Studies
   Ian A. Taylor, John F. Eccleston, and Katrin Rittinger .............................................................. 119

9 Analysis of Protein–Protein Interactions by Simulation of Small-Zone Gel Filtration Chromatography
   Rosemarie Wilton, Elizabeth A. Myatt, and Fred J. Stevens ..................................................... 137

10 Fluorescence Gel Retardation Assay to Detect Protein–Protein Interactions
    Sang-Hyun Park and Ronald T. Raines ...................................................................................... 155
11 Fluorescence Polarization Assay to Quantify Protein–Protein Interactions
   Sang-Hyun Park and Ronald T. Raines ........................................... 161
12 Studying Protein–Protein Interactions via Blot Overlay or Far Western Blot
   Randy A. Hall .................................................................................. 167
13 Glutathione-S-Transferase–Fusion Based Assays for Studying Protein–Protein Interactions
   Haris G. Vikis and Kun-Liang Guan .................................................... 175
14 Affinity Capillary Electrophoresis Analyses of Protein–Protein Interactions in Target-Directed Drug Discovery
   William E. Pierceall, Lixin Zhang, and Dallas E. Hughes ............... 187
15 Mapping Protein–Ligand Interactions by Hydroxyl-Radical Protein Footprinting
   Nick Loizos ....................................................................................... 199
16 Use of Phage Display and Polyvalency to Design Inhibitors of Protein–Protein Interactions
   Michael Mourez and R. John Collier .................................................. 213

PART III. DETECTING PROTEIN–PROTEIN INTERACTIONS IN HETEROLOGOUS SYSTEMS
17 A Bacterial Two-Hybrid System Based on Transcriptional Activation
   Simon L. Dove and Ann Hochschild .................................................... 231
18 Using the Yeast Two-Hybrid System to Identify Interacting Proteins
   John Miller and Igor Stagljar ............................................................ 247
19 Analysis of Protein–Protein Interactions Utilizing Dual Bait Yeast Two-Hybrid System
   Ilya G. Serebrinskii and Elena Kotova ............................................. 263
20 The Split-Ubiquitin Membrane-Based Yeast Two-Hybrid System
   Safia Thaminy, John Miller, and Igor Stagljar .................................. 297
21 Reverse Two-Hybrid Techniques in the Yeast Saccharomyces cerevisiae
   Matthew A. Bennett, Jack F. Shern, and Richard A. Kahn ............... 313
22 Mammalian Two-Hybrid Assay for Detecting Protein–Protein Interactions In Vivo
   Jae Woon Lee and Soo-Kyung Lee .................................................... 327
23 Co-Immunoprecipitation from Transfected Cells
   Shane C. Masters ............................................................................... 337
PART IV: PROBING PROTEIN–PROTEIN INTERACTIONS IN LIVING CELLS

24 Microscopic Analysis of Fluorescence Resonance Energy Transfer (FRET)
Brian Herman, R. Venkata Krishnan, and Victoria E. Centonze

25 Monitoring Molecular Interactions in Living Cells Using Flow Cytometric Analysis of Fluorescence Resonance Energy Transfer
Francis Ka-Ming Chan

26 Fluorescence Correlation Spectroscopy: A New Tool for Quantification of Molecular Interactions
Keith M. Berland

27 Confocal Microscopy for Intracellular Co-Localization of Proteins
Toshiyuki Miyashita

28 Mapping Biochemical Networks with Protein-Fragment Complementation Assays
Ingrid Remy and Stephen W. Michnick

29 In Vivo Protein Cross-Linking
Fabrice Agou, Fei Ye, and Michel Veron

PART V. PROTEOMICS-BASED APPROACHES

30 Computational Prediction of Protein–Protein Interactions
John C. Obenauer and Michael B. Yaffe

31 Affinity Methods for Phosphorylation-Dependent Interactions
Greg Moorhead and Carol MacKintosh

32 Two-Dimensional Gel Electrophoresis for Analysis of Protein Complexes
Karin Barnouin

33 Sample Preparation of Gel Electrophoretically Separated Protein Binding Partners for Analysis by Mass Spectrometry
Rainer Cramer, Malcolm Saxton, and Karin Barnouin

34 Quantitative Protein Analysis by Solid Phase Isotope Tagging and Mass Spectrometry
Huilin Zhou, Rosemary Boyle, and Ruedi Aebersold

35 Internet Resources for Studying Protein–Protein Interactions
Shane C. Masters
