Non-Condon Correction to Franck-Condon Values of Second-order Reduction Factors: The Cubic $T$ Term

Faten Al-Hazmi, Victor Z. Polinger, Janette L. Dunn, Colin A. Bates, Elie A. Moujaes and Michel Abou-Ghantous

1. Introduction 170
2. General background to cubic $T \otimes T$ JT systems 171
3. Definitions of second-order vibronic RFs 172
4. The basis of the FC approximation 174
5. Evaluation of the RFs $K^{(2)}_{u}(T_i \otimes T_i)$ for the $T \otimes T$ JT system using the FC approximation 174
6. Non-Condon corrections of the FC values 176
7. Discussion 181
   - Acknowledgements 181
   - References 182

Embedding of the $K_{10}$ Graph on a Surface with Seven Cross-caps and the Icosahedral $H \otimes 2h$ Jahn–Teller Surface

Erwin Lijnen and Arnout Ceulemans

1. Introduction 184
2. The polyhedral representation 184
3. Why a polyhedral representation is useful 186
4. The interconversion paths on the linear $H \otimes (g \oplus 2h)$ JT surface 187
5. Polyhedral embedding of the interconversion graphs for the trigonal minima 189
6. Discussion and conclusions 196
   - Acknowledgements 197
   - Appendix A: Embeddings of the complement that keep the equivalence of the ten vertices 197
   - References 198

II. Molecular Systems: Hydrocarbons

H. Köppel, I. Bäldia and P. G. Szalay

1. Introduction 200
2. Theoretical framework 201
3. The multi-mode JT effect in the $\tilde{X} \tilde{2}E_{1g}$ state 204
4. Simultaneous JT and PJT interactions in the $\tilde{D} \tilde{2}E_{1u} - \tilde{E} \tilde{2}B_{2g}$ system 210
5. Concluding remarks 215
   - Acknowledgements 216
   - References 216
Symmetry Aspects of Distortivity in \( \pi \) Systems

P. W. Fowler
