Current Topics in Developmental Biology

Volume 62

Developmental Vascular Biology

Edited by

Gerald P. Schatten
Director, PITTSBURGH DEVELOPMENTAL CENTER
Deputy Director, Magee-Women's Research Institute
Professor and Vice-Chair of Ob-Gyn-Reproductive Sci. & Cell Biol.-Physiology
University of Pittsburgh School of Medicine
Pittsburgh, PA 15213

Contents

Contributors xi
Preface xiii

1 Blood Vessel Signals During Development and Beyond
Ondine Cleave

I. Introduction 2
II. Vascular Development 2
III. Vascular Cell-Cell Interactions 3
IV. Cell Biology of ECs 4
V. Heterogeneity of ECs 8
VI. EC Interactions During Development 9
VII. EC Interactions in Adult Tissues 21
VIII. Evidence Against a Requirement for Endothelial Signals 26
IX. Conclusions and Perspectives 27

References 29

2 HIFs, Hypoxia, and Vascular Development
Kelly L. Covello and M. Celeste Simon

I. Introduction 37
II. Oxygen-Regulated Gene Expression 38
III. HIF in Developmental O2 Homeostasis 42
IV. HIF and Disease 44
V. Conclusion 47

References 47
Blood Vessel Patterning at the Embryonic Midline
Kelly A. Hogan and Victoria L. Bautch

I. Introduction  56
II. Vascular Development and Patterning  56
III. Signaling Pathways Implicated in Vascular Patterning  61
IV. Axial Structures Implicated in Vascular Patterning  67
V. Conclusions and Future Directions  75
References  77

Wiring the Vascular Circuitry: From Growth Factors to Guidance Cues
Lisa D. Urness and Dean Y. Li

I. Introduction  87
II. Basic Signaling Pathways Required for Forming Blood Vessels  88
III. The Formation of Arterial and Venous Networks  90
IV. Effects of Local Cues on Arterial–Venous Identity  95
V. Genetic Evidence for Vascular Guidance  96
VI. Vascular Endothelial Growth Factors Are Attractive Guidance Cues  98
VII. Guidance as a Balance of Attractive and Repulsive Cues  100
VIII. Neural Guidance Pathways  100
IX. Neural and Vascular Guidance Mechanisms Share Common Signaling Pathways  104
X. Neuro-Vascular Development as Interdependent Processes  108
XI. Independent Versus Interdependent Guidance of Vessels and Nerves  112
XII. Future Directions in Vascular Guidance  113
XIII. Summary  113
References  114

Vascular Endothelial Growth Factor and Its Receptors in Embryonic Zebrafish Blood Vessel Development
Katsutoshi Goishi and Michael Klagsbrun

I. Introduction  128
II. Vascular Growth Factors  128
VI. Expression Patterns of VEGF in Mice Reveal Other Distinct Biological Functions 203
VII. The Role of VEGF During Heart Septation 204
VIII. VEGF: a Connector Between the Developing Vascular and Neuronal System 205
IX. A Role for VEGF in Arterial EC Specification 207
X. Normal Ontogenesis but Abnormal Remodeling of PAAs in Mice Lacking VEGF164 207
XI. Association of VEGF Gene Variations with Cardiovascular Defects in DGS 211
XII. Conclusion 215
References 215

Development of Coronary Vessels
Mark W. Majesky

I. Introduction 225
II. Formation of the Proepicardium 226
III. Formation of the Epicardium 228
IV. Vasculogenesis in the Subepicardium 231
V. Role of Growth Factors in Coronary Vasculogenesis 233
VI. Epicardial to Mesenchymal Transformation (EMT) 234
VII. Epicardial EMT Leads to Changes in Gene Expression 237
VIII. Bidirectional Epicardial-Myocardial Signaling 239
IX. Establishment of a Coronary Circulation: Making Connections to the Aorta 241
X. Maturation of Coronary Vessels and Formation of a Tunica Media 243
XI. Development of the Coronary Lymphatic Vessels 246
XII. Coronary Vessel Anomalies 247
XIII. Coronary Development and Disease 249
References 250

Identifying Early Vascular Genes Through Gene Trapping in Mouse Embryonic Stem Cells
Frank Kuhnert and Heidi Stuhlmann

I. Introduction 261
II. Gene Discovery Through Mutagenesis Screens: Chemical Mutagenesis Versus Gene Trap Mutagenesis 262
