La Jolla, California
Contents

Foreword ix
Preface xi

1 The Problem of Doping in Sports 1
   I. The Development of Current Programs to Counter Drug Abuse in Sports 6
   II. A Potential New Challenge for Sports: Genetic Doping 8

2 The Scientific Basis for Gene Therapy: A New Concept in Medicine 11
   I. How Human Genetic Disease Occurs and How it is Treated 15
   II. Gene Transfer: A New Approach to Therapy 19
   III. Clinical Delivery: How Therapeutic Gene Transfer Vectors Can Be Introduced into Human Beings 22
   IV. Fine-Tuning the Expression of the Foreign Gene: Not too Much or too Little, Not at the Wrong Time 24
   V. Reversing or Stopping the Effects of Foreign Genes if Things Go Wrong 25

3 Early Gene Transfer Experiments: Problems and Eventual Success 27

4 Gene Transfer in Sports: An Opening Scenario for Genetic Enhancement of Normal "Human Traits" 37
   II. Several Potential Scenarios for Gene-Based Doping 41
   III. Genetic Enhancement 47
   IV. A Special Case Somewhere Between Genetic Enhancement and Genetic Therapy in Sport: Treatment of Disease and Repair of Injury in an Athlete 48
5 Ethics and Oversight in Clinical Trials: Attempts at Gene Doping Would Not Conform to Accepted Ethical Standards 51
   I. The Ethics of Research with Human Subjects 51
   II. Additional Levels of Regulation and Oversight in Gene Therapy Research 58
   III. The Ethical Principles Used by Review Bodies 62

   I. International Regulation of Sport Applications of Genetic Technology 65
   II. Beyond Banbury 76

7 A Scientific Perspective 79
   I. Gene Therapy Is a Reality 79
   II. The Line Between Therapy and Enhancement is Indistinct What Deserves “Treatment”? 82
   III. Repair of Injury is a Special Form of Enhancement in Sports 85
   IV. Misuse of Genetic Science: The Reemergence of Eugenics 85

8 Some Ethical Aspects of “Harm” in Sport 89
   I. Harm and Health: The Individual Athlete 89
   II. Harm to Other Athletes 92
   III. Harm to Society 92

9 The List 95
   S1. Anabolic Agents 96
   S2. Hormones and Related Substances 100
   S3. Beta-2 Agonists 100
   S4. Agents with Antiestrogenic Activity 101
   S5. Diuretics and Other Masking Agents 101
   M1. Enhancement of Oxygen Transfer 102
   M2. Chemical and Physical Manipulation 102
   M3. Gene Doping 102
