INTERLEUKINS
VITAMINS AND HORMONES
ADVANCES IN RESEARCH AND APPLICATIONS

Editor-in-Chief

GERALD LITWACK
Former Professor and Chair
Department of Biochemistry and Molecular Pharmacology
Thomas Jefferson University Medical College
Philadelphia, Pennsylvania
Former Visiting Scholar
Department of Biological Chemistry
David Geffen School of Medicine at UCLA
Toluca Lake, California

VOLUME 74
CONTENTS

I

IL-3, IL-5, AND GM-CSF SIGNALING:
CRYSTAL STRUCTURE OF THE HUMAN
BETA-COMMON RECEPTOR

JAMES M. MURPHY AND IAN G. YOUNG

I. Background 2
II. The Receptor System for IL-3, IL-5, and GM-CSF 3
III. Structural Features of Class I Cytokine Receptors 3
IV. The Ligands: IL-3, IL-5, and GM-CSF 6
V. The Structure of the Human βc Receptor 8
VI. Formation and Biological Relevance of the βc Homodimer 12
VII. Elucidation of the βc Functional Epitope 13
VIII. Interaction of α-Subunits with GM-CSF, IL-3, and IL-5 15
IX. Interaction of α-Subunits with βc 16
X. The Murine β_{IL-3} Receptor Binds IL-3 via a Functional Epitope
   Analogous to that of βc 17
XI. A Model for βc Receptor Activation 19
References 24

CRYSTAL STRUCTURES AND INHIBITORS OF PROTEINS INVOLVED IN IL-2 RELEASE AND T CELL SIGNALING
KIERON BROWN AND GRAHAM M. T. CHEETHAM

I. Overview 32
II. Importance of IL-2 Release by T Cells and Its Role in Human Disease 32
III. A Paradigm for Blocking IL-2 Release In Vivo: Inhibition of Calcineurin Activity by Cyclosporin and FK-506 34
IV. Molecular Signaling in T Cells: Multiple Opportunities for Therapeutic Intervention 36
V. Inhibition of Protein Kinases Proximal to the TCR 38
VI. Interleukin-2 Tyrosine Kinase: A Novel Downstream Target 45
VII. Conclusions 52
References 53

3
STRUCTURAL STUDIES OF THE INTERLEUKIN-19 SUBFAMILY OF CYTOKINES
ALEXANDER ZDANOV

I. Introduction 62
II. Interferons-λ 1,2,3 (IFN-λ1, IFN-λ2, and IFN-λ3, or IL-29, IL-28A, and IL-28B) 69
III. Cytokine/Receptor Complexes 69
IV. Concluding Remarks 70
References 71

4
INTERLEUKIN-22 AND ITS CRYSTAL STRUCTURE
RONALDO ALVES PINTO NAGEM, JOSÉ RIBAMAR FERREIRA JÚNIOR, LAURE DUMOUTIER, JEAN-CHRISTOPHE RENAUD, AND IGOR POLIKARPOV

I. Interleukin-22 Identification and Gene Expression 78
II. IL-22R1 Identification and Gene Expression 81
III. Physiological Role of IL-22 83
IV. IL-22BP: A Decoy Receptor That Regulates IL-22 84
V. IL-22 Inflammatory System and Disease 86
VI. IL-22 Tertiary and Quaternary Structure Organization 87
VII. IL-22 Signaling Complex 89
References 100

CONTROL OF INTERLEUKIN-2 GENE
TRANSCRIPTION: A PARADIGM FOR INDUCIBLE,
TISSUE-SPECIFIC GENE EXPRESSION
KAREN BUNTING, JUN WANG, AND M. FRANCES SHANNO

I. Interleukin-2: Diverse Roles in Immunity
and Pathogenesis 106
II. IL-2: An Example of a T Cell–Restricted Inducible Gene 109
III. Genomic Regions That Control IL-2 Gene Transcription 110
IV. T Cell Lineage Specificity of IL-2 Gene Expression 113
V. The Role of Chromatin in Controlling IL-2
Gene Transcription 115
VI. Multiple Signals Are Required for Activation of IL-2
Gene Transcription 118
VII. Mechanisms to Repress the IL-2 Gene in T Cells 127
VIII. Conclusions 133
References 134

6

TRANSCRIPTION FACTORS MEDIATING
INTERLEUKIN-3 SURVIVAL SIGNALS
JEFFREY JONG-YOUNG YEN AND HSIN-FANG YANG-YEN

I. Introduction 148
II. Mammalian Orthologs of C. elegans Ces2/Ces1
Proteins 150
III. Regulatory Machinery of the mcl-1 Gene 154
IV. Discussions 156
References 159
INTERLEUKINS AND STAT SIGNALING
S. JAHARUL HAQUE AND PANKAJ SHARMA

I. Interleukins: Structure, Classification, and Mode of Action 166
II. Cytokine Receptors: Structure and Classification 168
III. Functional Cytokine-Receptor Complexes 170
IV. Sharing of Receptor-Subunits by Cytokines 171
V. JAKs: Cytokine Receptor-Associated Protein Tyrosine Kinases 173
VI. Signal Transducers and Activators of Transcription 176
VII. Mechanism of JAK-STAT Signal Transduction 180
VIII. Specificity of Cytokine Signaling 183
IX. Homeostatic Control of Cytokine Production and Cytokine Signaling 184
X. Regulation of Cytokine Synthesis 184
XI. Negative Regulation of Cytokine Signaling 185
XII. STATs in Human Diseases 189
XIII. Perspective 192
References 193

THE NEWEST INTERLEUKINS: RECENT ADDITIONS TO THE EVER-GROWING CYTOKINE FAMILY
QIAN CHEN, HELEN P. CARROLL, AND MASSIMO GADINA

I. The New Interleukins 208
II. Conclusions 224
References 224

THE INTERLEUKIN-1 RECEPTOR FAMILY
DIANA BORASCHI AND ALDO TAGLIABUE

I. Introduction 230
II. IL-1 Receptors 237
III. IL-18 Receptors 240
IV. Receptors That Downregulate Signaling 242
THE IL-17 CYTOKINE FAMILY
SARAH L. GAFFEN, JILL M. KRAMER, JEFFREY J. YU, AND FANG SHE

I. Overview of the IL-17 Family 256
II. Molecular and Structural Aspects of the IL-17 Family 257
III. IL-17A In Vivo 262
IV. Gene Targets and Signal Transduction 268
V. Concluding Remarks 273
References 274

NF-κB AND CYTOKINES
DAGMAR KULMS AND THOMAS SCHWARZ

I. The Cytokine Family 284
II. Nuclear Factor-κB 285
III. NF-κB/Rel Family Members 286
IV. Immune Development, Inflammatory Response, and Disease 288
V. Cytokines and NF-κB in Tumorigenesis and Apoptosis 291
VI. Conclusions 296
References 296

IκB-ζ: AN INDUCIBLE REGULATOR OF NUCLEAR FACTOR-κB
TATSUSHI MUTA

I. Introduction 302
II. Structure of IκB-ζ 303
III. Induction of IκB-ζ by Stimulation of the Innate Immune System 304
THE INHIBITORY EFFECTS OF INTERLEUKIN-1 ON GROWTH HORMONE ACTION DURING CATABOLIC ILLNESS
ROBERT N. COONEY AND MARGARET SHUMATE

I. Introduction 318
II. The Interleukin-1 Family 319
III. Regulation of IL-1 Synthesis 320
IV. IL-1 Bioactivity: Receptors and Cell Signaling 321
V. Biologic Activities of IL-1 322
VI. IL-1 in Disease 322
VII. IL-1 and Protein Catabolism 323
VIII. Growth Hormone: Physiologic and Metabolic Activities 323
IX. Catabolic Illness and GH Resistance 326
X. GHR Expression in GH Resistance 327
XI. Hepatic GH Signaling via the JAK2/STAT5 Pathway 328
XII. GH Signaling by p38/c-Jun/MAPK Pathways 329
XIII. Supressors of Cytokine Signaling: Inhibitors of JAK/STAT Signaling 330
XIV. Inhibition of GH-Inducible Gene Expression by Cytokines (IL-1) 331
XV. Conclusions 332
References 333

THE ROLE OF THE INTERLEUKIN-6/GP130 SIGNALING PATHWAY IN BONE METABOLISM
XIN-HUA LIU, ALEXANDER KIRSCHENBAUM, SHEN YAO, AND ALICE C. LEVINE

I. Introduction 342
II. Effect of IL-6 on Bone Resorption 342
17

CYTOKINES IN TYPE 2 DIABETES

DANIEL R. JOHNSON, JASON C. O'CONNOR, ANSUMAN SATPATHY, 
AND GREGORY G. FREUND

I. Introduction 406
II. Proinflammatory Cytokines in Type 2 Diabetes 408
III. IL-18 and Diabetes 418
IV. Anti-inflammatory Cytokines in Diabetes 418
V. Leptin 421
VI. Conclusions 422
References 423

RELEASE OF INTERLEUKINS AND 
OTHER INFLAMMATORY CYTOKINES BY HUMAN 
ADIPOSE TISSUE IS ENHANCED IN OBESITY 
AND PRIMARILY DUE TO THE NONFAT CELLS

JOHN N. FAI N

I. Introduction: Most Release of Adipokines/Cytokines by Adipose Tissue Is Due to Nonfat Cells 446
II. Comparison of Rodent Versus Human Adipose Tissue 447
III. Interleukin Release by Adipose Tissue 448
IV. Effect of Obesity on Circulating Cytokines and Release by Adipose Tissue 453
V. Visceral Versus Subcutaneous Adipose Tissue as a Source of Adipokines/Cytokines 454
VI. Formation of Adipokines/Cytokines by Adipose Tissue In Vitro as Compared to Connective Tissue, the Nonfat Cells in Adipose Tissue, and Adipocytes 455
VIII. Pathways for Upregulation of Interleukin Release by Human Adipose Tissue 467
References 469
ROLE OF INTERLEUKIN-13 IN CANCER, PULMONARY FIBROSIS, AND OTHER T⁺H₂-TYPE DISEASES
Bharat H. Joshi, Cory Hogaboam, Pamela Dover, Syed R. Husain, and Raj K. Puri

I. Introduction 481
II. IL-13 and Its Receptors 481
III. IL-13R-Mediated Signal Transduction 483
IV. Effect of IL-13 on Tumor Cells 484
V. Targeting IL-13R by IL-13PE Cytotoxin 484
VI. Significance of IL-13Rα2 Expression 486
VII. Regulation of IL-13Rα2 Expression 487
VIII. Clinical Studies with IL-13PE Cytotoxin 487
IX. IL-13 and Chronic Lung Disease 490
X. Activity of IL-13PE in Pulmonary Diseases 490
XA. Asthma and Allergy 490
XB. S. Mansoni Granuloma Formation 492
XC. Pulmonary Fibrosis 493
XI. Concluding Remarks 495
References 496

INTERLEUKINS, INFLAMMATION, AND MECHANISMS OF ALZHEIMER'S DISEASE
David Weisman, Edwin Hakimian, and Gilbert J. Ho

I. Introduction 506
II. The Inflammatory Response in AD 508
III. Interleukins as CNS Modulators of Inflammation 510
IV. Interleukins and the Clinicopathologic Characteristics of AD 510
V. β-Amyloid, Interleukins, and Inflammatory Signaling in AD 517
VI. Interleukins: Therapeutic Implications for AD 520
VII. Conclusions: Future Directions 522
References 523
INTERLEUKIN-2: FROM T CELL GROWTH AND HOMEOSTASIS TO IMMUNE RECONSTITUTION OF HIV PATIENTS
MARKO KRYWORUCHKO AND JACQUES THÈZE

I. Introduction 532
II. IL-2 and Its Receptors 532
III. Physiology and Pathophysiology of IL-2 534
IV. IL-2R-Dependent Signal Transduction Mechanisms 536
V. Role of the IL-2 System in HIV Pathogenesis 538
VI. IL-2 Immunotherapy of HIV Patients 540
VII. Concluding Remarks 541
References 542
