PROGRESS IN BRAIN RESEARCH

VOLUME 162

NEUROBIOLOGY OF HYPERTHERMIA

EDITED BY

HARI SHANKER SHARMA

Laboratory of Cerebrovascular Research, Department of Surgical Sciences, Division of Anaesthesiology and Intensive Care Medicine, University Hospital, Uppsala University, SE-75185 Uppsala, Sweden

ELSEVIER

Contents

List of Contributors .......................................................... v
Preface .................................................................................. ix

Section I. Fever and Hyperthermia

1. The onset of fever: new insights into its mechanism
   C.M. Blatteis (Memphis, TN, USA) ........................................ 3

2. Eicosanoids in non-febrile thermoregulation
   D.M. Aronoff and A.A. Romanovsky (Ann Arbor, MI and Phoenix, AZ, USA) .... 15

Section II. Physiological Mechanisms in Hyperthermia

3. Exercise and heat stress: cerebral challenges and consequences
   L. Nybo (Copenhagen, Denmark) ......................................... 29

4. Neuropsychological determinants of exercise tolerance in the heat
   S.S. Cheung (Halifax, NS, Canada) ...................................... 45

Section III. Drugs and Hyperthermia

5. Thermophysiological responses to hyperthermic drugs: extrapolating from rodent to human
   C.J. Gordon (Research Triangle Park, NC, USA) ...................... 63

6. Neuroleptic malignant syndrome and serotonin syndrome
   K. Nisijima, K. Shioda and T. Iwamura (Tochigi-Ken and Gifu, Japan) ........ 81

Section IV. Therapeutic Hyperthermia and Consequences

7. Radio frequency electromagnetic fields: mild hyperthermia and safety standards
   J.A. D'Andrea, J.M. Ziriax and E.R. Adair (Brooks City-Base, TX and Hamden, CT, USA) .... 107
8. The effect of induced hyperthermia on the immune system
   A. Dieing, O. Ahlers, B. Hildebrandt, T. Kerner, I. Tamm, K. Possinger and P. Wust
   (Berlin, Germany) ................................................................. 137

9. Cerebral pathophysiology and clinical neurology of hyperthermia in humans
   O.L. Cremer and C.J. Kalkman (Utrecht, The Netherlands) ......................... 153

Section V. Hyperthermia and Brain Pathology

10. Methods to produce hyperthermia-induced brain dysfunction
    H.S. Sharma (Uppsala, Sweden) .................................................. 173

11. Hyperthermia and central nervous system injury
    W.D. Dietrich and H.M. Bramlett (Miami, FL, USA) .......................... 201

12. Physiological and pathological brain hyperthermia
    E.A. Kiyatkin (Baltimore, MD, USA) ........................................... 219

13. Nanoparticles aggravate heat stress induced cognitive deficits, blood–brain barrier disruption, edema formation and brain pathology
    H.S. Sharma and A. Sharma (Uppsala, Sweden) ............................... 245

Section VI. Neurochemicals and Hyperthermia

14. Neuropeptides in hyperthermia
    F. Nyberg and M. Hallberg (Uppsala, Sweden) .................................. 277

15. Interaction between amino acid neurotransmitters and opioid receptors in hyperthermia-induced brain pathology
    H.S. Sharma (Uppsala, Sweden) .................................................. 295

Section VII. Hyperthermia and Gene Expression

16. Exertional heat illness and human gene expression
    L.A. Sonna, M.N. Sawka and C.M. Lilly (Baltimore, MD, Natick and Worcester, MA, USA) .................. 321

17. Cellular mechanisms of neuronal damage from hyperthermia
    (Miami, FL, USA) ...................................................................... 347

18. Heat acclimation and cross-tolerance against novel stressors: genomic–physiological linkage
    M. Horowitz (Jerusalem, Israel) .................................................... 373
Section VIII. Heat Shock Proteins in Hyperthermia

19. Heat shock protein expression in brain: a protective role spanning intrinsic thermal resistance and defense against neurotropic viruses
   M.A. Buccellato, T. Carsillo, Z. Traylor and M. Oglesbee (Columbus, OH, USA) 395

20. Cerebral neurons and glial cell types inducing heat shock protein Hsp70 following heat stress in the rat
   A. Pavlik and I.S. Aneja (Safat, Kuwait) ......................................................... 417

21. Heat shock proteins and the heat shock response during hyperthermia and its modulation by altered physiological conditions
   M. Horowitz and S.D.M. Robinson (Jerusalem, Israel) ................................. 433

Section IX. Hyperthermia and Cerebrospinal Fluid

22. Changes in CSF composition during heat stress and fever in conscious rabbits
   M. Frosini (Siena, Italy) ................................................................................... 449

23. Blood-cerebrospinal fluid barrier in hyperthermia
   H.S. Sharma and C.E. Johanson (Uppsala, Sweden and Providence, RI, USA) . . . 459

Section X. Heat Stroke and Hyperthermia

24. Heat stroke and cytokines
   L.R. Leon (Natick, MA, USA) ........................................................................ 481

25. Oxidative stress and ischemic injuries in heat stroke
   C.-K. Chang, C.-P. Chang, S.-Y. Liu and M.-T. Lin (Taipei, Taiwan) ............ 525

Subject Index ........................................................................................................... 547
