Hedgehog Signaling Protocols

Edited by

Jamila I. Horabin

Associate Professor
Department of Biomedical Sciences
College of Medicine
Florida State University
Tallahassee, Florida, USA
# Contents

Preface ................................................................. v
Contributors ........................................................... xi
Overview ............................................................... xiii

1. Purifying the Hedgehog Protein and its Variants ................. 1
   
   **Darren P. Baker, Frederick R. Taylor, and R. Blake Pepinsky**

2. Application of Sonic Hedgehog to the Developing Chick Limb ... 23
   
   **Eva Tiecke and Cheryl Tickle**

3. Manipulation of Hedgehog Signaling in *Xenopus* by
   Means of Embryo Microinjection and Application
   of Chemical Inhibitors ............................................. 35
   
   **Thomas Hollemann, Emmanuel Tadjuidje, Katja Koebernick, and Tomas Pieler**

4. Isolation of Rat Telencephalic Neural Explants to Assay Shh
   GABAergic Interneuron Differentiation-Inducing Activity .... 47
   
   **Rina Mady and Jhumku D. Kohtz**

5. Genetic Analysis of the Vertebrate Hedgehog-Signaling
   Pathway Using Muscle Cell Fate Specification in the
   Zebrafish Embryo .................................................... 55
   
   **Sudipto Roy**

6. Efficient Manipulation of Hedgehog/GLI Signaling Using
   Retroviral Expression Systems ..................................... 67
   
   **Maria Kasper, Gerhard Regl, Thomas Eichberger, Anna-Maria Frischauf, and Fritz Aberger**

7. Cell Surface Marker and Cell Cycle Analysis, Hedgehog
   Signaling, and Flow Cytometry .................................... 79
   
   **Kristina Detmer and Ronald E. Garner**

8. Detecting Tagged Hedgehog with Intracellular and Extracellular
   Immunocytochemistry for Functional Analysis .................. 91
   
   **Ainhoa Callejo, Luis Quijada, and Isabel Guerrero**

9. Confocal Analysis of Hedgehog Morphogenetic Gradient
   Coupled with Fluorescent *in situ* Hybridization
   of Hedgehog Target Genes ......................................... 105
   
   **Armel Gallet and Pascal P. Théron**
10. RNAi in the Hedgehog Signaling Pathway: pFRiPE, a Vector for Temporally and Spatially Controlled RNAi in *Drosophila* .................................................. 115
   *Eric Marois and Suzanne Eaton*

11. Germline Clone Analysis for Maternally Acting *Drosophila* Hedgehog Components ................................. 129
   *Erica M. Selva and Beth E. Stronach*

12. Clonal Analysis of Hedgehog Signaling in *Drosophila* Somatic Tissues .................................................. 145
   *Christine M. Bankers and Joan E. Hooper*

13. GAL4/UAS Targeted Gene Expression for Studying *Drosophila* Hedgehog Signaling ................................. 161
   *Denise Busson and Anne-Marie Pret*

   *Melanie Stegman and David Robbins*

15. Using Immunoprecipitation to Study Protein-Protein Interactions in the Hedgehog-Signaling Pathway .......... 215
   *Chao Tong and Jin Jiang*

16. Sequence Analyses to Study the Evolutionary History and *Cis*-Regulatory Elements of Hedgehog Genes .... 231
   *Ferenc Müller and Anne-Gaelle Borycki*

Index ......................................................................................... 251
