Clinical Proteomics

Methods and Protocols

Edited by

Antonia Vlahou

Biomedical Research Foundation,
Academy of Athens, Athens, Greece

Humana Press
Preface ........................................................................................................... v
Acknowledgments ............................................................................................ vii
Contributors ................................................................................................... xiii

1. Overview and Introduction to Clinical Proteomics ................................. 1
   Young-Ki Paik, Hoguen Kim, Eun-Young Lee,
   Min-Seok Kwon, and Sang Yun Cho

PART I: SPECIMEN COLLECTION FOR CLINICAL PROTEOMICS
2. Specimen Collection and Handling: Standardization of Blood
   Sample Collection ................................................................................... 35
   Harald Tammen

3. Tissue Sample Collection for Proteomics Analysis ............................... 43
   Jose I. Diaz, Lisa H. Cazares, and O. John Semmes

PART II: CLINICAL PROTEOMICS BY 2DE AND DIRECT
MALDI/SELDI MS PROFILING
4. Protein Profiling of Human Plasma Samples
   by Two-Dimensional Electrophoresis .................................................... 57
   Sang Yun Cho, Eun-Young Lee, Hye-Young Kim, Min-Jung
   Kang, HyoYoung-Joo Lee, Hoguen Kim, and Young-Ki Paik

5. Analysis of Laser Capture Microdissected Cells
   by 2-Dimensional Gel Electrophoresis .................................................. 77
   Daohai Zhang and Evelyn Siew-Chuan Koay

6. Optimizing the Difference Gel Electrophoresis (DIGE)
   Technology ............................................................................................. 93
   David B. Friedman and Kathryn S. Lilley

7. MALDI/SELDI Protein Profiling of Serum
   for the Identification of Cancer Biomarkers ....................................... 125
   Lisa H. Cazares, Jose I. Diaz, Rick R. Drake, and O. John Semmes

8. Urine Sample Preparation and Protein Profiling
   by Two-Dimensional Electrophoresis and Matrix-Assisted Laser
   Desorption Ionization Time of Flight Mass Spectroscopy .......... 141
   Panagiotis G. Zerefos and Antonia Vlahou
9. Combining Laser Capture Microdissection and Proteomics Techniques
   Dana Mustafa, Johan M. Kros, and Theo Luider

PART III: CLINICAL PROTEOMICS BY LC-MS APPROACHES
10. Comparison of Protein Expression by Isotope-Coded Affinity Tag Labeling
    Zhen Xiao and Timothy D. Veenstra
11. Analysis of Microdissected Cells by Two-Dimensional LC-MS Approaches
    Chen Li, Yi-Hong, Ye-Xiong Tan, Jian-Hua Ai, Hu Zhou, Su-Jun Li, Lei Zhang, Qi-Chang Xia, Jia-Rui Wu, Hong-Yang Wang, and Rong Zeng
12. Label-Free LC-MS Method for the Identification of Biomarkers
    Richard E. Higgs, Michael D. Knierman, Valentina Gelfanova, Jon P. Butler, and John E. Hale
13. Analysis of the Extracellular Matrix and Secreted Vesicle Proteomes by Mass Spectrometry
    Zhen Xiao, Thomas P. Conrads, George R. Beck, Jr., and Timothy D. Veenstra

PART IV: CLINICAL PROTEOMICS AND ANTIBODY ARRAYS
14. Miniaturized Parallelized Sandwich Immunoassays
    Hsin-Yun Hsu, Silke Wittemann, and Thomas O. Joos
15. Dissecting Cancer Serum Protein Profiles Using Antibody Arrays
    Marta Sanchez-Carbayo

PART V: STATISTICS AND BIOINFORMATICS IN CLINICAL PROTEOMICS DATA ANALYSIS
16. 2D-PAGE Maps Analysis
    Emilio Marengo, Elisa Robotti, and Marco Bobba
17. Finding the Significant Markers: Statistical Analysis of Proteomic Data
    Sebastien Christian Carpentier, Bart Panis, Rony Swennen, and Jeroen Lammertyn
18. Web-Based Tools for Protein Classification
    Costas D. Paliakasis, Ioannis Michalopoulos, and Sophia Kossida
19. Open-Source Platform for the Analysis of Liquid Chromatography-Mass Spectrometry (LC-MS) Data ............. 369
   Matthew Fitzgibbon, Wendy Law, Damon May, Andrea Detter, and Martin McIntosh

   Ray L. Somorjai

Index ................................................................................................................................................. 397
