Genetic Dissection of Neural Circuits and Behavior

Stephen F. Goodwin
1 Genetic Dissection of Neural Circuits and Behavior in *Mus musculus* 1
Robbert Havekes and Ted Abel

I. Conventional Gene Targeting Strategies 2
II. Spatially Restricted Gene Manipulation 5
III. The Use of Dominant Negative Inhibitors to Manipulate Gene Function 10
IV. Conditional Manipulation of Gene Function 11
V. Pharmacogenetic Approaches 16
VI. Optogenetic Approaches 22
VII. Visualization of Brain Structure and Function 24
VIII. The Challenges Facing Genetic Approaches in the Mouse 28
References 32

2 Worm Watching: Imaging Nervous System Structure and Function in *Caenorhabditis elegans* 39
Jeremy Dittman

I. Introduction 40
II. Real-Time Indicators of Neuronal Activity 43
III. Monitoring Intracellular Calcium 45
IV. Imaging Presynaptic Terminals 49
V. Imaging Postsynaptic Compartments 54
VI. Imaging Proxies for Neuropeptide Secretion 58
VII. Bimolecular Fluorescence Complementation in the Worm 60
VIII. Methods for Immobilizing the Worm 61
IX. Femtosecond Lasers and Nanosurgery on the Worm 65
X. Designing the Ideal Optical Probe 67
XI. Conclusions and Prospects 70
References 70
3 Mapping and Manipulating Neural Circuits in the Fly Brain
Julie H. Simpson

I. Introduction 80
II. Spatial Targeting of Neuron Types 86
III. Imaging Neurons 92
IV. Functional Imaging: Watching Neuronal Activity 95
V. Control of Neural Activity 100
VI. Quantitative Behavioral Assays 113
VII. Conclusions 118
References 121

4 A Network of G-Protein Signaling Pathways Control Neuronal Activity in C. elegans
Borja Perez-Mansilla and Stephen Nurrish

I. Introduction 146
II. Mapping Intracellular Neural Networks within C. elegans Motoneurons 151
References 178
