Ras Signaling and Therapies
Amy Young, Jesse Lyons, Abigail L. Miller, Vernon T. Phan, Irma Rangel Alarcon, and Frank McCormick

I. Introduction: The Ras Superfamily and Their Regulators 1
II. The Raf/MAPK Pathway 3
III. Ras and the PI3K Pathway 5
IV. Cellular Signals that Block Ras Pathways 7
V. Ras and Neurofibromatosis 11
VI. Therapeutic Opportunities 12

References 14

PI3K/PTEN Signaling in Angiogenesis and Tumorigenesis
Bing-Hua Jiang and Ling-Zhi Liu

I. Introduction of PI3K/PTEN Signaling Pathway 20
II. Angiogenesis Regulated by VEGF, Angiopoietins, and PI3K Activation 24
III. Genetic Aberrations of PI3K, PTEN, and AKT in Cancer 27
IV. Roles of PI3K and AKT in Regulating Angiogenesis 28
V. PI3KPTEN Controls Angiogenesis through Increasing HIF-1 and VEGF Expression 33
VI. The Downstream Signaling Molecules Mediated by PI3K/PTEN in Regulating Tumor Growth and Angiogenesis 35
VII. Inhibition of PI3K Signaling Pathway for Cancer Treatment and Prevention 39
VIII. Concluding Remarks 46

**Histone Demethylases and Cancer**
Sotirios C. Kampranis and Philip N. Tsichlis

I. Introduction 103
II. Histone Methylation and Chromatin Structure 108
III. Histone Methylation and Cancer 126
IV. Histone Demethylases as Therapeutic Targets 151
V. Concluding Remarks 152
References 153

**Sirtuins and p53**
Ingeborg van Leeuwen and Sonia Lain

I. Introduction 171
II. Sirtuins and Disease 177
III. Sirtuins Levels and Activity in Cancer Cells 178
IV. Sustained SirT1 Depletion and Genomic Instability 179
V. Small-Molecule Sirtuin Inhibitors: Activity in Preclinical Models for Cancer 180
VI. Sirtuin Inhibition and p53 182
VII. Discussion on Sirtuin Inhibition as a Therapeutic Approach 185
References 187

**Oxidative Stress and Lymphocyte Persistence: Implications in Immunotherapy**
Shikhar Mehrotra, Dimitrios Mougiakakos, C. Christian Iohansson, Christina Voelkel-Johnson, and Rolf Kiessling

I. Introduction 198
II. Oxidative Stress 200
III. Lymphocyte Subsets, Immune Functions, and Persistence 203
IV. Mechanisms for Differential Susceptibility 209
V. Redox Regulation and Signaling 212
VI. Rescue of Lymphocytes from Oxidative Stress-Induced Apoptosis 215
