15 Matrix Photochemistry of Small Ring Compounds .................................................. 15-1
  Ian R. Dunkin
16 Photochemical Isomerization of Cycloalkenes ..................................................... 16-1
  Tadashi Mori and Yoshihisa Inoue
17 The Photochemical Reactivity of the Norbornadiene-Quadricyclane System ....... 17-1
  Alexander D. Dubonosov, Vladimir A. Bren, and Vladimir I. Minkin
18 Copper(I)-Catalyzed Inter- and Intramolecular [2 + 2]-Photocycloaddition
   Reactions of Alkenes.............................................................................................. 18-1
  Subrata Ghosh
19 Photochemical Synthesis of Cyclophanes ............................................................ 19-1
  Jun Nishimura, Yosuke Nakamura, Takuji Yamazaki, and Seiichi Inokuma
20 The Dimerization of Cinnamic Acid Derivatives .............................................. 20-1
  Dario M. Bassani
21 Photochemical Dimerization of Acenaphthylene and Related Compounds ........... 21-1
  Naoki Haga and Katsumi Tokumaru
22 Photochemical Synthesis of Cage Compounds ................................................... 22-1
  Teruo Shinmyozu, Rika Nogita, Motoko Akita, and Chultack Lim
23 Photochemical Approaches to the Synthesis of [n]Prismanes ............................ 23-1
  Teruo Shinmyozu, Rika Nogita, Motoko Akita, and Chultack Lim
24 Photochemistry of Allenes .................................................................................... 24-1
  Toshio Shimizu
25 Photooxygenation of 1,3-Dienes............................................................................ 25-1
  Waldemar Adam, Sara Bosio, Anna Bartoschek, and Axel G. Griesbeck
26 Hula-Twist: A Photochemical Reaction Mechanism Involving Simultaneous
   Configurational and Conformational Isomerization ........................................... 26-1
  Robert S.H. Liu and George S. Hammond
27 Conformer-Specific Photochemistry in the Vitamin D Field .............................. 27-1
  Jack Saltiel, Lenuta Cires, and Andrzej M. Turek
28 Photochemical Reaction of Fullerenes and Fullerene Derivatives ....................... 28-1
  Andreas Kleineweischede and Jochen Mattay
29 The Photo-Bergman Cycloaromatization of Enediynes .................................... 29-1
  Graham B. Jones and Keith C. Russell
30 The Photochemical Reactivity of the Allenyl-V nyl Methane System ............... 30-1
  Takashi Tsuno and Kunio Sugiyama
31 Photochemistry of V nylidenecyclopropanes ................................................... 31-1
  Kazuhiko Mizuno and Hajime Maeda
32 Photochemistry of Heteroarene-Fused Barrelenes .......................................... 32-1
  Chun-Chen Liao and Rama Krishna Peddinti
33 Cyclization of Stilbene and its Derivatives ............................................................... 33-1
Andrew Gilbert
34 Synthesis of Heterocycles by Photocyclization of Arenes ........................................ 34-1
Norbert Hoffmann
35 Photochromism of Diarylethene Derivatives ......................................................... 35-1
Kingo Uchida and Masahiro Irie
36 Photoprocesses in Polymethine Dyes: Cyanines and Spiropyran-Derived
Merocyanines ........................................................................................................... 36-1
Helmut Görner and Alexander K. Chibisov
37 Photochemical Aromatic Substitution .................................................................. 37-1
Canan Karapire and Siddik Icli
38 Photodehalogenation of Aryl Halides ................................................................... 38-1
Leah Schutt and Nigel J. Bunce
39 Photochemistry of Hydroxyarenes ...................................................................... 39-1
Matthew Lukeman and Peter Wan
40 The Photochemical Nucleophile-Olefin Combination, Aromatic Substitution
( Photo-NOCAS) Reaction ........................................................................................ 40-1
Dino Mangion and Donald R. Arnold
41 Intra- and Intermolecular Cycloadditions of Benzene Derivatives .................... 41-1
Andrew Gilbert
42 Photo-Fries Reaction and Related Processes ....................................................... 42-1
Miguel Angel Miranda and Francisco Galindo
43 Photochemistry of Aryl Diazonium Salts, Triazoles and Tetrazoles ................. 43-1
James Grimshaw
44 Photochemical Reactivity of Azides ...................................................................... 44-1
Götz Bucher
45 Oxidation of Aromatics .......................................................................................... 45-1
Angelo Albini and Maurizio Fagnoni
46 The Photochemistry of Substituted Benzenes: Phototranspositions and the
Photoadditions of Alcohols ...................................................................................... 46-1
James A. Pincock
47 The Photostimulated S1 Process: Reaction of Haloarenes with Carbanions ...... 47-1
Roberto A. Rossi and Alicia B. Penenory
48 Photochemical Decarbonylation of Ketones: Recent Advances and Reactions
in Crystalline Solids ................................................................................................. 48-1
Miguel A. Garcia-Garibay and Luis M. Campos
49 Carbene Formation in the Photochemistry of Cyclic Ketones ......................... 49-1
S. M. Roberts
