**Protection of
Biotechnological Matter
under European
and German Law**

Contents

Preface	V
Abbreviations	XVII
1. Biotechnological Matter	1
1.1 Summary of historical development	1
1.2 Definition of biotechnological matter	2
2. Legal Provisions	3
2.1 European Patent Convention (EPC)	3
2.1.1 Patentability requirements	4
2.1.2 Requirements of the application	7
2.1.3 Priority	8
2.1.4 Scope of protection and effect of a patent	9
2.2 German Patent Law (PatG)	11
2.2.1 Patentability requirements	11
2.2.2 Requirements of the application	13
2.2.3 Priority	14
2.2.4 Scope of protection and effect of a patent	14
2.2.5 Basic differences between the EPC and the PatG	16
2.3 Council Regulation concerning the Creation of a Supplementary Protection Certificate for Medicinal Products (CSPC)	17
2.4 German Utility Model Law (GbmG)	20
2.4.1 Protection requirements	20
2.4.2 Requirements of the application	21
2.4.3 Priority	21
2.4.4 Scope of protection and effect of a utility model	22
2.4.5 Basic differences between the PatG and the GbmG	23
2.5 Council Regulation on Community Plant Variety Rights (CPVR)	23
2.5.1 Substantive protection requirements	23
2.5.2 Formal protection requirements	27
2.5.3 Priority	28
2.5.4 Scope of protection and effect of a plant variety right	29

2.6	German Law on Plant Variety Rights (SortenschG)	30
2.6.1	Substantive protection requirements	31
2.6.2	Formal protection requirements	33
2.6.3	Priority	34
2.6.4	Scope of protection and effect of a plant variety right	35
2.6.5	Basic differences between the CPVR and the SortenschG ..	35
3.	General Aspects on Protection	37
3.1	Protection under the EPC and PatG	37
3.1.1	Non-patentable matter	37
3.1.1.1	Discoveries	37
3.1.1.2	Methods for treatment of the human or animal body by surgery or therapy and diagnostic methods practised on the human or animal body	37
3.1.2	Exceptions to patentability	40
3.1.2.1	Inventions contrary to “ordre public” or morality	40
3.1.2.1.1	“Ordre public”	40
3.1.2.1.2	Morality	41
3.1.2.2	Plant and animal varieties	43
3.1.2.3	Essentially biological processes for the production of plants or animals	45
3.1.3	Requirements for grant	47
3.1.3.1	Novelty, inventive step and industrial application	47
3.1.3.1.1	Naturally occurring products	47
3.1.3.1.2	Products for use in methods for treatment of the human or animal body by surgery or therapy or diagnostic methods practised on the human or animal body	48
3.1.3.1.3	Processes of analogy	48
3.1.3.2	Sufficiency of disclosure	49
3.1.3.2.1	Nucleotide and amino acid sequences	50
3.1.3.2.2	Microorganisms	50
3.1.3.3	Priority	53
3.1.3.4	Person skilled in the art	55
3.1.3.5	Claims	56
3.1.3.5.1	Claim categories	57
3.1.3.5.2	Clarity of claims	58
3.1.3.5.3	Support of claims by description	59
3.1.3.5.4	Claims for medicinal products	60

3.2	Protection under the GbmG	61
3.3	Protection under the CPVR and the SortenschG	62
4.	Protectable Biotechnological Matter	63
4.1	Low molecular products	63
4.1.1	Introduction	63
4.1.2	Protecting low molecular products under the EPC	63
4.1.2.1	Product claims for low molecular products	63
4.1.2.2	Process claims for low molecular products	68
4.1.2.3	Use claims for low molecular products	70
4.1.3	Protecting low molecular products under the PatG	71
4.1.3.1	Product claims for low molecular products	71
4.1.3.2	Process claims for low molecular products	74
4.1.3.3	Use claims for low molecular products	75
4.1.4	Protecting low molecular products under the GbmG	77
4.2	Nucleic acids	77
4.2.1	Introduction	77
4.2.2	Protecting nucleic acids under the EPC	78
4.2.2.1	Discoveries	78
4.2.2.2	Morality and “ordre public”	79
4.2.2.3	Novelty	79
4.2.2.4	Inventive Step	82
4.2.2.5	Sufficiency of disclosure	89
4.2.2.6	Clarity and support of claims	98
4.2.2.7	Product claims for nucleic acids	102
4.2.2.7.1	Product claims characterizing a nucleic acid by functional terms	104
4.2.2.7.2	Product claims characterizing a nucleic acid by part or all of the amino acid sequence of the encoded protein	108
4.2.2.7.3	Product claims characterizing a nucleic acid by part or all of the nucleic acid sequence itself	111
4.2.2.7.4	Product claims characterizing a nucleic acid by parameters .	113
4.2.2.7.5	Product claims characterizing a nucleic acid by reference to a deposited microorganism or deposited DNA	114
4.2.2.7.6	Product claims characterizing a nucleic acid by a process for its preparation	116
4.2.2.7.7	Product claims comprising nucleic acids as essential elements	116

4.2.2.8	Process claims for nucleic acids	118
4.2.2.8.1	Process claims involving genetic engineering	118
4.2.2.8.2	Process claims involving isolation from a natural environment	120
4.2.2.9	Use claims for nucleic acids	121
4.2.3	Protecting nucleic acids under the PatG	122
4.2.3.1	Product claims for nucleic acids	122
4.2.3.1.1	Product claims characterizing a nucleic acid by functional terms	124
4.2.3.1.2	Product claims characterizing a nucleic acid by part or all of the amino acid sequence of the encoded protein	125
4.2.3.1.3	Product claims characterizing a nucleic acid by part or all of the nucleic acid sequence itself	126
4.2.3.1.4	Product claims characterizing a nucleic acid by parameters .	127
4.2.3.1.5	Product claims characterizing a nucleic acid by reference to a deposited microorganism or deposited DNA	128
4.2.3.1.6	Product claims characterizing a nucleic acid by a process for its preparation	129
4.2.3.1.7	Product claims comprising nucleic acids as essential elements	130
4.2.3.2	Process claims for nucleic acids	130
4.2.3.2.1	Process claims involving genetic engineering	130
4.2.3.2.2	Process claims involving isolation from a natural environment	132
4.2.3.3	Use claims for nucleic acids	132
4.2.4	Protecting nucleic acids under the GbmG	133
4.3	Proteins	134
4.3.1	Introduction	134
4.3.2	Protecting proteins under the EPC	134
4.3.2.1	Discoveries	135
4.3.2.2	Methods of treatment	136
4.3.2.3	Morality and “ordre public”	136
4.3.2.4	Novelty	137
4.3.2.5	Inventive step	141
4.3.2.6	Sufficiency of disclosure	149
4.3.2.7	Clarity and support of claims	153
4.3.2.8	Product claims for proteins	157
4.3.2.8.1	Product claims characterizing a protein by functional terms .	159
4.3.2.8.2	Product claims characterizing a protein by parameters	161

4.3.2.8.3	Product claims characterizing a protein by the coding capacity of a certain DNA	161
4.3.2.8.4	Product claims characterizing a protein by its structure	162
4.3.2.8.5	Product claims characterizing a protein by a process for its preparation	165
4.3.2.8.6	Product claims comprising proteins as essential elements ...	166
4.3.2.9	Process claims for proteins	168
4.3.2.9.1	Process claims involving isolation from a natural environment	168
4.3.2.9.2	Process claims involving synthesis by recombinant microorganisms	170
4.3.2.9.3	Process claims involving secretion by hybridomas	173
4.3.2.10	Use claims for proteins	173
4.3.3	Protecting proteins under the PatG	174
4.3.3.1	Product claims for proteins	175
4.3.3.1.1	Product claims characterizing a protein by functional terms .	177
4.3.3.1.2	Product claims characterizing a protein by parameters	177
4.3.3.1.3	Product claims characterizing a protein by the coding capacity of a certain DNA	179
4.3.3.1.4	Product claims characterizing a protein by its structure	179
4.3.3.1.5	Product claims characterizing a protein by a process for its preparation	181
4.3.3.1.6	Product claims comprising proteins as essential elements ...	182
4.3.3.2	Process claims for proteins	183
4.3.3.2.1	Process claims involving isolation from a natural environment	183
4.3.3.2.2	Process claims involving synthesis by recombinant microorganisms	184
4.3.3.2.3	Process claims involving secretion by hybridomas	185
4.3.3.3	Use claims for proteins	186
4.3.4	Protecting proteins under the GbmG	188
4.4	Microorganisms	188
4.4.1	Introduction	188
4.4.2	Protecting microorganisms under the EPC	189
4.4.2.1	Discoveries	190
4.4.2.2	Methods of treatment	191
4.4.2.3	Morality and "ordre public"	191
4.4.2.4	Novelty	191
4.4.2.5	Inventive step	192

4.4.2.6	Sufficiency of disclosure	194
4.4.2.7	Clarity and support of claims	198
4.4.2.8	Product claims for microorganisms	200
4.4.2.8.1	Product claims characterizing a microorganism by functional terms	201
4.4.2.8.2	Product claims characterizing a microorganism by a certain DNA or plasmid	201
4.4.2.8.3	Product claims characterizing a microorganism by parameters	203
4.4.2.8.4	Product claims characterizing a microorganism by a process for its preparation	203
4.4.2.8.5	Product claims characterising a microorganism by its deposit number	204
4.4.2.9	Process claims for microorganisms	205
4.4.2.9.1	Process claims for preparing a microorganism	205
4.4.2.9.2	Process claims involving use of a microorganism	207
4.4.2.10	Use claims for microorganisms	209
4.4.3	Protecting microorganisms under the PatG	210
4.4.3.1	Product claims for microorganisms	211
4.4.3.1.1	Product claims characterizing a microorganism by functional terms	212
4.4.3.1.2	Product claims characterizing a microorganism by a certain DNA or plasmid	213
4.4.3.1.3	Product claims characterizing a microorganism by parameters	214
4.4.3.1.4	Product claims characterizing a microorganism by a process for its preparation	214
4.4.3.1.5	Product claims characterizing a microorganism by its deposit number	215
4.4.3.2	Process claims for microorganisms	216
4.4.3.2.1	Process claims for preparing a microorganism	216
4.4.3.2.2	Process claims involving use of a microorganism	217
4.4.3.3	Use claims for microorganisms	218
4.4.4	Protecting microorganisms under the GbmG	220
4.5	Plants	220
4.5.1	Introduction	220
4.5.2	Protecting plants under the EPC	221
4.5.2.1	Natural plants	222
4.5.2.1.1	Product claims for natural plants	222

4.5.2.1.2	Process claims for natural plants	224
4.5.2.1.3	Use claims for natural plants	227
4.5.2.2	Hybrid plants	228
4.5.2.2.1	Product claims for hybrid plants	228
4.5.2.2.2	Process claims for hybrid plants	230
4.5.2.2.3	Use claims for hybrid plants	232
4.5.2.3	Transgenic plants	232
4.5.2.3.1	Product claims for transgenic plants	232
4.5.2.3.2	Process claims for transgenic plants	237
4.5.2.3.3	Use claims for transgenic plants	243
4.5.2.4	Parts of plants	243
4.5.2.4.1	Highly differentiated parts of plants	245
4.5.2.4.1.1	Product claims for highly differentiated parts of plants	245
4.5.2.4.1.2	Process claims for highly differentiated parts of plants	247
4.5.2.4.1.3	Use claims for highly differentiated parts of plants	249
4.5.2.4.2	Undifferentiated or poorly differentiated parts of plants . . .	250
4.5.2.4.2.1	Product claims for undifferentiated or poorly differentiated parts of plants	250
4.5.2.4.2.2	Process claims for undifferentiated or poorly differentiated parts of plants	253
4.5.2.4.2.3	Use claims for undifferentiated or poorly differentiated parts of plants	254
4.5.2.5	Summary	254
4.5.3	Protecting plants under the PatG	256
4.5.3.1	Natural plants	256
4.5.3.1.1	Product claims for natural plants	256
4.5.3.1.2	Process claims for natural plants	258
4.5.3.1.3	Use claims for natural plants	261
4.5.3.2	Hybrid plants	261
4.5.3.2.1	Product claims for hybrid plants	262
4.5.3.2.2	Process claims for hybrid plants	263
4.5.3.2.3	Use claims for hybrid plants	264
4.5.3.3	Transgenic plants	265
4.5.3.3.1	Product claims for transgenic plants	265
4.5.3.3.2	Process claims for transgenic plants	267
4.5.3.3.3	Use claims for transgenic plants	269
4.5.3.4	Parts of plants	270
4.5.3.4.1	Highly differentiated parts of plants	270
4.5.3.4.1.1	Product claims for highly differentiated parts of plants	270

4.5.3.4.1.2	Process claims for highly differentiated parts of plants	271
4.5.3.4.1.3	Use claims for highly differentiated parts of plants	272
4.5.3.4.2	Undifferentiated or poorly differentiated parts of plants . . .	273
4.5.3.4.2.1	Product claims for undifferentiated or poorly differentiated parts of plants	273
4.5.3.4.2.2	Process claims for undifferentiated or poorly differentiated parts of plants	274
4.5.3.4.2.3	Use claims for undifferentiated or poorly differentiated parts of plants	275
4.5.3.5	Summary	276
4.5.4	Protecting plants under the GbmG	278
4.5.5	Protecting plants under the CPVR	279
4.5.6	Protecting plants under the SortenschG	280
4.6	Animals	280
4.6.1	Introduction	280
4.6.2	Protecting animals under the EPC	281
4.6.2.1	Natural animals	281
4.6.2.1.1	Product claims for natural animals	281
4.6.2.1.2	Process claims for natural animals	283
4.6.2.1.3	Use claims for natural animals	287
4.6.2.2	Transgenic animals	287
4.6.2.2.1	Product claims for transgenic animals	288
4.6.2.2.2	Process claims for transgenic animals	291
4.6.2.2.3	Use claims for transgenic animals	293
4.6.2.3	Parts of animals	294
4.6.2.3.1	Product claims for parts of animals	294
4.6.2.3.2	Process claims for parts of animals	296
4.6.2.3.3	Use claims for parts of animals	299
4.6.2.4	Summary	300
4.6.3	Protecting animals under the PatG	302
4.6.3.1	Natural animals	302
4.6.3.1.1	Product claims for natural animals	302
4.6.3.1.2	Process claims for natural animals	304
4.6.3.1.3	Use claims for natural animals	308
4.6.3.2	Transgenic animals	309
4.6.3.2.1	Product claims for transgenic animals	309
4.6.3.2.2	Process claims for transgenic animals	311
4.6.3.2.3	Use claims for transgenic animals	312
4.6.3.3	Parts of animals	313

4.6.3.3.1	Product claims for parts of animals	313
4.6.3.3.2	Process claims for parts of animals	315
4.6.3.3.3	Use claims for parts of animals	317
4.6.3.4	Summary	318
4.6.4	Protecting animals under the GbmG	320
4.7	Human Body	321
4.7.1	Introduction	321
4.7.2	Protecting the human body under the EPC	321
4.7.2.1	Human body	322
4.7.2.1.1	Product claims for the human body	322
4.7.2.1.2	Process claims for the human body	322
4.7.2.1.3	Use claims for the human body	325
4.7.2.2	Parts of the human body	325
4.7.2.2.1	Product claims for parts of the human body	325
4.7.2.2.2	Process claims for parts of the human body	327
4.7.2.2.3	Use claims for parts of the human body	330
4.7.2.3	Summary	330
4.7.3	Protecting the human body under the PatG	332
4.7.3.1	Human body	332
4.7.3.1.1	Product claims for the human body	332
4.7.3.1.2	Process claims for the human body	333
4.7.3.1.3	Use claims for the human body	335
4.7.3.2	Parts of the human body	336
4.7.3.2.1	Product claims for parts of the human body	336
4.7.3.2.2	Process claims for parts of the human body	338
4.7.3.2.3	Use claims for parts of the human body	340
4.7.3.3	Summary	341
4.7.4	Protecting the human body under the GbmG	343
5.	Scope of Protection	345
5.1	Scope of protection of a patent	346
5.1.1	Contents and interpretation of claims	346
5.1.2	Scope of protection of different claim categories	348
5.1.2.1	Scope of protection of product claims	348
5.1.2.2	Scope of protection of process claims	349
5.1.2.3	Scope of protection of use claims	349
5.2	Scope of protection of a utility model	350
5.3	Scope of protection of a plant variety right	350

Annex

Appendix 1:	Art. 158 EPC	352
Appendix 2:	Rule 27a EPC	352
Appendix 3:	Rules 28 and 28a EPC	353
Appendix 4:	Rule 29 EPC	360
Appendix 5:	Art. 164(1) EPC	361
Appendix 6:	Art. 11 UPOV Convention	362
Appendix 7:	Art. 1(vi) UPOV Convention	363
Appendix 8:	Representation of nucleotide and amino acid sequences in patent applications and filing of sequence listings	363
Appendix 9:	Rules 13 ^{bis} and 13 ^{ter} PCT	409
Appendix 10:	Specific comments on the relevant information on the characteristics of the most important groups of microorganisms	414
Appendix 11:	Instructions regarding the deposit of microorganisms or other propagatable cell material for the purposes of patent procedures	417
Appendix 12:	Sec. 4 PatAnmVO	424
Appendix 13:	Art. 101 CPVR	425
Appendix 14:	Register of cited decisions	425
