Detailed Contents

Chapter 1  Introduction to Criminal Justice Research Methods:  
Theory and Method  1
Scientific Research in Criminal Justice  1
Common Sense and Nonsense  3
Why Study Research Methods in Criminal Justice?  5
The Emergence of Science and Criminal Justice  6
Probabilistic Nature of Science  7
Proper Conduct of Critical Inquiry  8
  Exhibit 1.1 Merton’s “Matthew Effect” in Science  9
Approaches to Theory and Method in Criminal Justice  10
Pure versus Applied Research  12
Qualitative and Quantitative Research  14
Researchese: The Language of Research  16
  Concepts  16
  Operationalization  17
  Variables  17
  Dependent and Independent Variables  17
  Theories/Hypotheses  18
Examples of the Research Process  18
  Recidivism among Juvenile Offenders  20
General Steps in Empirical Research in Criminal Justice  21
Problem Formulation: Selection of Research Problem  21
Problem Formulation: Specification of Research Problem  23
  Exhibit 1.2 Feminist Perspectives and Research Methods  24
  Exhibit 1.3 PAVNET Online  26
Summary  27
Key Concepts  28
Review Questions  29

Chapter 2  Ethics in Criminal Justice Research  30
Ethical Horror Stories  30
  Biomedical Examples  30
  Social Science Examples  32
  Researcher Fraud and Plagiarism  34
  Exhibit 2.1 Legendary Research Scams  35
The Researcher’s Role  35
Research Targets in Criminal Justice  37
Ethical Relativism  37
Ethics and Professionalism  38
Related Rival Causal Factors 75

**Hawthorne Effect** 75

**Halo Effect** 75

**Post Hoc Error** 76

**Placebo Effect** 76

Other Rival Causal Factors in Criminal Justice Field Experiments 77

**Diffusion of Treatment** 77

**Compensatory Equalization of Treatment** 77

**Local History** 77

**Masking Effects** 78

**Contamination of Data** 78

**Erosion of Treatment Effect** 78

**Criterion Problems** 78

Experimental Designs 79

The Classic Experimental Design 80

Some Criminal Justice Examples of the Classic Experimental Design 82

**Candid Camera** 82

**Scared Straight** 82

**Community Policing** 83

**Exhibit 3.1 The Kansas City Gun Experiment** 84

Other Experimental Designs 86

**Posttest-Only Control Group Design** 86

**Solomon Four-Group Design** 87

Preexperimental Designs 87

**One-Group Ex Post Facto Design** 88

**One-Group Before-After Design** 89

**Two-Group Ex Post Facto Design** 89

Cross-Sectional and Longitudinal Designs 90

**Exhibit 3.2 The Cycle of Violence and Victims of Child Abuse** 91

**Exhibit 3.3 The Project of Human Development** 92

Quasi-Experimental Designs 93

**Time-Series Designs** 94

**Multiple Interrupted Time-Series Designs** 96

**Counterbalanced Designs** 97

Some Other Criminal Justice Examples of Variations of the Experimental Model 97

**The Provo and Silverlake Experiments** 97

**Exhibit 3.4 Evaluations of Shock Incarceration** 99

The Kansas City Preventive Patrol Experiment 100

The Minneapolis Domestic Violence Experiment 100

The Experiment as a Data-Gathering Strategy 102

**Advantages of Experiments** 103

**Disadvantages of Experiments** 104

Summary 105

Key Concepts 106

Review Questions 106
Chapter 4  An Introduction to Alternative Data-Gathering Strategies and the Special Case of Uniform Crime Reports

Alternative Data-Gathering Strategies  107
Social Surveys  109
Participant Observation  110
Life History and Case Studies  111
Unobtrusive Measures  111
The Special Case of Uniform Crime Reports  112
The Crime Index  114
Crime Rate  114
Cautions in the Use of UCR Data  115
Factors Affecting the UCR  118
Related UCR Issues  120
UCR Redesign  121
National Incident-Based Reporting System  121
NIBRS versus UCR  122

Exhibit 4.1 The National Incident-Based Reporting System (NIBRS)  123

Summary  127
Key Concepts  127
Review Questions  128

Chapter 5  Sampling and Survey Research: Questionnaires  129

Types of Sampling  130
Probability Samples  130
Nonprobability Samples  136
Sample Size  139
Survey Research  140
Some Guidelines for Questionnaire Construction  141
Questionnaire Wording  142
Pretest  146
Organization of the Questionnaire  147
Mail Surveys  147
Advantages of Mail Surveys  149
Disadvantages of Mail Surveys  150
Ways of Eliminating Disadvantages in Mail Surveys  150
Follow-up  151
Offering Remuneration  152
Attractive Format  152
Sponsorship and Endorsements  152
Personalization  153
Shortened Format  153
Good Timing  154
Self-Reported Measures of Crime  155
Some Problems with Self-Report Surveys  156
Strengths of Self-Report Surveys 158
  Reliability 158
  Validity 158
Use of Other Data 159
Use of Other Observers 159
Use of Polygraph 159
“Known Group” Validation 160
Use of Lie Scales 160
Measures of Internal Consistency 161
Use of Interviews 161
Summary 162
Key Concepts 163
Review Questions 163

Chapter 6  Survey Research: Interviews and Telephone Surveys 164

Types of Interviews 165
Advantages of Interviews 167
Disadvantages of Interviews 168
Interviewing Aids and Variations 168

  Exhibit 6.1 Public Opinion Polls 169

General Procedures in Interviews 171
Training and Orientation Session 171
Arranging the Interview 172
Demeanor of Interviewer 172
Administration of the Structured Interview 173
Probing 173
The Exit 174
Recording the Interview 175
Telephone Surveys 176
Advantages and Prospects of Telephone Surveys 176
Disadvantages of Telephone Surveys 176
Computers in Survey Research 177
Random Digit Dialing 178
Techniques Employed in Telephone Surveys 179
Victim Surveys in Criminal Justice 180
National Crime Victimization Survey 181
  Sampling 181
  Panel Design 182
A Comparison of UCR, NCVS, and Self-Report Data 183
Some Problems in Victim Surveys 184
  Cost of Large Samples 185
  False Reports 185
  Mistaken Reporting 185
  Poor Memory 186
  Telescoping 186
  Sampling Bias 186
Chapter 7  Participant Observation and Case Studies  198

A Critique of Experiments and Surveys  199
   Verbal Reports versus Behavior  199
A Defense of Quantitative Research  200
Participant Observation  201
Types of Participant Observation  202
Characteristics of Participant Observation  204
   Objectivity in Research  204
   “Going Native”  206
General Procedures in Participant Observation  207
   Field Notes  207
   Mnemonics  208
   Caution in Use of Other Recording Methods  208
Tips on Participant Observation  209
   Gaining Access  210
   Exhibit 7.1 American Skinheads  211
Gatekeepers  212
   Announcement of Intentions  212
Sampling  212
   Reciprocity and Protection of Identity  213
   Concern for Accuracy  213
Examples of Participant Observation  214
   Exhibit 7.2 Islands in the Streets  215
Advantages of Participant Observation  216
Disadvantages of Participant Observation  216
Case Studies  218
   Life History/Oral History  218
Some Examples of Case Studies  219
   Journalistic Field Studies  219
Single-Subject Designs  220
Summary 222
Key Concepts 223
Review Questions 223

Chapter 8 Unobtrusive Measures, Secondary Analysis, and the Uses of Official Statistics 224

Major Types of Unobtrusive Methods 225
Physical Trace Analysis 226
Use of Available Data and Archives 227
  Secondary Analysis 228
  Personal Documents and Biographies 229
  Examples of Secondary Analysis 231
  Limitations of Official Data 234
  Measuring Hidden Populations 235
  Historical and Archival Data 235
  Content Analysis 237
  Content Analysis by Computer 238
  Meta-Analysis 240
Sources of Existing Data 241
  Exhibit 8.1 Violence Research Data from the National Archive of Criminal Justice Data 244
Observation 244
Disguised Observation 246
Simulations 250
Advantages of Unobtrusive Measures 251
Disadvantages of Unobtrusive Measures 252
Summary 252
Key Concepts 253
Review Questions 254
  Chapter Appendix 8.1 Street Gang Crime in Chicago 255

Chapter 9 Validity, Reliability, and Triangulated Strategies 258

Levels of Measurement 258
Error in Research 261
Reasons for Lack of Validation Studies in Criminal Justice 262
Ways of Determining Validity 263
  Face Validity 264
  Content Validity 265
  Construct Validity 265
  Pragmatic Validity 266
  Convergent–Discriminant Validation/Triangulation 267
Reliability 269
  Test–Retest 270
  Multiple Forms 271
  Split-Half Technique 271
Mythical Numbers 272
  Phantom Army of Addicts 272
The Frequency Distribution 314
Graphic Presentations 315
   Pie Charts 315
   Bar Graphs 315
   Frequency Polygons (Line Charts) 317
   Crime Clocks 319
Table Reading 323
   Why Bother with Tables? 323
   What to Look for in a Table 323
Steps in Reading a Table 325
   Summary of Table 11.3 326
How to Construct Tables 327
Presentation of Complex Data 328
General Rules for Percentaging a Table 329
   Improper Percentaging 330
   An Example of Table Percentaging 332
Elaboration 333
Lying with Statistics 336
Summary 337
Key Concepts 338
Review Concepts 338

Why Study Statistics? 340
Types of Statistics 341
Measures of Central Tendency for a Simple Distribution 341
   Mode 342
   Median 342
   Mean 343
   Pop Quiz 12.1 344
Measures of Dispersion 344
   Range 344
   Standard Deviation (σ) 346
   Pop Quiz 12.2 348
Standard Deviation Units (Z Scores) 349
   Pop Quiz 12.3 350
Chi-Square (χ²) 350
   Calculation of Chi-Square 351
   Caution 353
   Pop Quiz 12.4 353
Chi-Square-Based Measures of Association 353
   Phi Coefficient (φ) and Phi-Square (φ²) 354
   Contingency Coefficient (C) 354
   Cramer's V 355
   Pop Quiz 12.5 355
Nature and Types of Statistics 355
   Nonparametric Statistics 355
Null Hypothesis 356
Tests of Significance 357
The $t$ Test (Difference of Means Test) 357
  Types of $t$ Tests 358
  Pop Quiz 12.6 360
ANOVA (Analysis of Variance) 360
  Calculation of ANOVA 361
  Pop Quiz 12.7 363
Other Measures of Relationship 363
  The Concept of Relationship 363
Correlation Coefficient (Pearson's $r$) 364
  Interpretation of Pearson's $r$ 364
  Calculation of Pearson's $r$ 365
  Statistical Significance of Pearson's $r$ 367
  Pop Quiz 12.8 367
Regression 367
  Pop Quiz 12.9 369
Ordinal Level Measures of Relationship 369
  Spearman's Rho ($r_s$) 369
  Interpretation of Rho 371
  Gamma 371
  Pop Quiz 12.10 373
Multivariate Analysis 374
  Partial Correlation 374
  Multiple Correlation and Regression 374
  Final Quiz 375
Statistical Software 376
Caveat Emptor 376
The Ecological Fallacy 377
Summary 378
Key Concepts 380
Review Questions 380

Chapter 13  Policy Analysis, Evaluation Research, and Proposal Writing 381

Policy Analysis 381
Evaluation Research 382
  Policy Experiments 384
Policy Analysis: The Case of the National Institute of Justice Research Program 385
  NIJ Mission Statement 385
  NIJ Research Priorities 386
A Systems Model of Evaluation Research 386
Types of Evaluation Research 388
  Will the Findings Be Used? 390
  Is the Project Evaluable? 390
  Who Can Do This Work? 392
Steps in Evaluation Research 392
  Problem Formulation 393
  Design of Instruments 393
  Research Design 393
  Data Collection 394
  Data Analysis 395
  Utilization 396
Obstacles to Evaluation Research 397
Murphy's Law in Evaluation Research 397
Researchers and Host Agencies 399

  Exhibit 13.1 Evaluating Intensive Supervision
    Probation/Parole 400
Proposal Writing 402
  Funding Agencies 402
  Grantsmanship 402
  Basic Elements of a Proposal 403
NIJ Proposal Format and Content 408
Evaluation of Research Proposals 410
  NIJ Evaluation of Proposals 411
Summary 411
Key Concepts 412
Review Questions 413

Appendix A  How to Write the Research Report 414
  General Advice 414
Steps in the Research Report 415
  Research Problem and Literature Review 416
  Methodology 416
  Analysis and Findings 417
  Discussion and Conclusions 417
  References 417
  Appendix 418
References 418

Appendix B  Table of Random Numbers 420

Appendix C  An Overview of SPSS/PC+ 422
  File Management 422
    Types of Files 422
    Naming Files 422
    General Information 423
    Creating or Retrieving Files 423
    Saving Files 423
    Executing Programs 424
    Examining the Listing (Output) File 424
    Errors and Warnings 424
    Exiting SPSS/PC+ 424
