**PART I: STATE OF THE PROBLEM**

**Chapter 1**  

H.L.F. Saeijs and M.J. van Berkel  

1. Introduction  

2. The state of fresh water worldwide  

2.1 Alarming voices from the international community  

2.2 The problems defined  

3. Escalation of the problems  

3.1 Ten billion people in the world in the year 2100  

3.2 Fresh water supply becoming increasingly expensive  

3.3 Eco-refugees  

3.4 Thirsty cities and economic development  

3.5 Hungry people and thirsty agriculture  

4. Strategy for sustainable river basins in the twenty-first century  

5. Deterioration of the Rhine river basin  

6. The state of fresh water in the Netherlands  

6.1 The Netherlands' dependency on other countries for fresh water  

7. Conclusions  

**Chapter 2**  
*Water Scarcity – Challenges for the Future*  

M. Falkenmark  

1. Introduction  

2. What is the problem?  

2.1 Societal drivers and responses  

2.2 Water-related life support constraints  

2.3 Water's multiple functions in nature and society  

3. Where is the world heading?  

3.1 The impending water crisis  

3.2 Global increase in dispute proneness
### Table of Contents

3.3 Where water is scarce human activities get complicated 30  
3.4 Typical water scarcity profiles 31  
3.5 Dependence on imported water 33  
4. Conflicts of interest 34  
4.1 Categories of water-related disputes 34  
4.2 Problems of sharing the rain over the river basin 37  
5. Future challenges and solutions 38  
5.1 New eco-conflicts 38  
5.2 Need for a paradigmatic shift in the approach to water 39  
5.3 Who owns the rain? 39  

**PART II: INTERNATIONAL WATER LAW**

**Chapter 3**  
**Water Scarcity: Institutional and Legal Responses**  
*Stephan McCaffrey*  
1. Introduction 43  
2. Water scarcity: the nature of the problem 44  
2.1 The world’s water supply 44  
2.2 Population 45  
2.3 Access to water and sanitation 45  
2.4 Urbanization 46  
2.5 Water stress and scarcity 47  
2.6 Human use of water 47  
2.7 Water quality 48  
2.8 The international dimension 48  
3. Strategies to alleviate water scarcity 49  
3.1 Water scarcity and the United Nations 49  
3.2 The role of law 52  
4. Outlook 56  

**Chapter 4**  
**Legal Procedures Applicable to Interstate Conflicts on Water Scarcity: The Gabcikovo Case**  
*Alexandre Kiss*  
1. Introduction 59  
2. The concepts of water scarcity and interstate conflicts 60  
2.1 The relative nature of water scarcity 60  
2.2 The concept of interstate conflicts 61  
3. Procedures to resolve interstate conflicts on water scarcity 62  
3.1 The obligation to cooperate 64  
3.2 Assessment of transboundary effects 64  
3.3 Informing potentially affected states 65  
3.4 Public participation 65  
3.5 The establishment of international commissions 66
Table of Contents

4. A case study: the Gabcikovo case 67
5. Conclusion 72
Annex 76

Chapter 5  The Protection of International Watercourses as Sources of Fresh Water in the Interest of Future Generations 80
Marjon Kroes
1. Introduction 80
2. The ILC draft Articles on the law of the non-navigational uses of international watercourses 81
3. The principle of equitable and reasonable utilization 83
4. The general principle not to cause significant transboundary harm 87
5. The provisions on environmental protection 90
6. Concluding remarks 98

Chapter 6  Securing Access to Safe Drinking Water through Trade and International Migration 100
P.J.I.M. de Waart
1. Water: “a constant quantity” of nature 100
  1.1 A decent social and international order 101
  1.2 Joint responsibility 102
  2. Water as a UN concern 103
    2.1 Access to fresh water 104
    2.2 Absolute poverty 105
    2.3 Quality of life 106
  3. Bringing water to the people: trade 106
    3.1 Human rights in international trade 107
    3.2 Monitoring and supervision 108
  4. Bringing people to the water: migration 109
    4.1 Global human security 110
    4.2 The role of the labour market 111
  5. (Inter)national law in the market place 114
    5.1 Happiness and perfection of states 114
    5.2 (Inter)national good governance 116

PART III: WATER SCARCITY IN SELECTED RIVER BASINS

Chapter 7  The Nile as a Legal and Political Structure 121
Joseph W. Dellapenna
1. Introduction 121
2. The emergence of the Nile River Treaty system 122
Table of Contents

3. The unravelling of the Nile Treaty system 126
4. Crafting a new treaty regime 129
5. Conclusion 133

Chapter 8 Fresh Water as a Source of International Conflicts: The Water Conflicts between Israel, Jordan and the Palestinians 135

Henk Donkers

1. Introduction: International conflicts over water 136
2. The geo-hydrological context of the Israeli-Arab water conflict 138
3. Roots of the conflict and escalation 141
   3.1 The roots of the Israeli-Arab water conflict 141
   3.2 Escalation to the Six-day or June War of 1967 143
4. Israeli water politics with respect to the West Bank 145
5. The water crisis and its solutions 147
   5.1 Solutions 147
6. Peace negotiations and treaties 154
7. Conclusions 157

Chapter 9 Middle East Water Problems: The Jordan River 158

Stephen McCaffrey

1. Introduction 158
2. The Jordan 159
   2.1 The problem 159
   2.2 Possible solutions 159
3. Is international water law of any help? 160
   3.1 Sources: custom and treaties 160
   3.2 Evaluation of the Peace Treaty’s provisions on water 162
4. Final observations 165

Chapter 10 International Law and Water Scarcity in Africa 166

Prof. Dr. C.O. Okidi

1. Introduction 166
2. Water distribution in Africa 167
3. The practice in international water law in Africa 170
   3.1 The Nile Waters Agreement 1959 171
   3.2 1972 OMVS Treaty 172
   3.3 1977 KBO Treaty 173
   3.4 1980 Convention Creating Niger Basin Authority 174
   3.5 1987 Agreement on the Common Zambezi River System 175
   3.6 River basins within broad concerns 175
4. Features of international law as practiced in Africa 177
5. Some supporting measures 178
   5.1 Capacity building 179
   5.2 Financial support 179
   5.3 Governance 180
Table of Contents

PART IV: WATER SCARCITY IN SELECTED REGIONS

Chapter 11  Current Trends in United States Water Law and Policy: Private Property Rights, Public Interest Limitations and the Creation of Markets  183
A. Dan Tarlock

1. Introduction  183
2. The common law of riparian rights  185
3. The law of prior appropriation  187
4. The special case of Indian tribes  189
5. Future allocation issues  190
   5.1 Water markets  190
   5.2 Third parties and the protection of community values  193
6. Conclusion  195

Chapter 12  Liability in Tort for the Detrimental Use of Fresh Water Resources under Dutch Law in Domestic and International Cases  196
Jan M. van Dünne

1. Introduction  196
2. Tort liability for detrimental use of fresh water sources under Dutch law in groundwater drainage cases  198
3. Case law on water pollution, based on neighbour law, water servitude and nuisance  202
4. The comparison of civil law (tort) and public international law with respect to the principles governing wrongful acts causing cross-border pollution  207
5. Conclusions  211

Chapter 13  Liability for Damage to River Beds in The Netherlands  212
Gerrit Betlem

1. Introduction  212
2. The law and policy of clean-up of polluted river beds  213
3. Comparison with liability for contaminated land  215
   3.1 Infringement of property rights  215
   3.2 Contributory negligence  217
4. Recovery of clean-up costs of polluted river beds  219
   4.1 Historic pollution: liability under article 75(5) SPA  219
   4.2 Tort liability  220
   4.3 Strict liability for dangerous substances and waste disposal sites  220
   4.4 The statutory duty of care of the Environmental Protection Act  222
5. Conclusion: cost recovery actions not often feasible  223
Table of Contents

Chapter 14 Disputing Water Rights: Scarcity of Water in Nepal Hill Irrigation 224

1. Introduction 224
2. Historical background 227
3. Legal principles of access, distribution, allocation, operation and management
   3.1 Rights of access 231
   3.2 Distribution 232
   3.3 Maintenance 233
   3.4 Principles, rights and negotiations 233
4. Contesting rights – precarious negotiated orders 234
   4.1 Case 1: The negotiated order of Jivanpur and Badgaon irrigation 234
   4.2 Case 2: From water theft to water right in the Telia Kulo irrigation system 237
5. Conclusions 240

PART V: WATER SCARCITY AND ECONOMIC LAW

Chapter 15 Balancing Free Trade in Water and the Protection of Water Resources in GATT 245
Esther J. de Haan

1. Introduction 245
2. Water as a commodity 246
   2.1 Water’s characteristics 246
   2.2 Economic valuation of water 247
   2.3 Technical developments in transporting water 247
   2.4 What kind of water deliveries can be considered trade in water? 248
3. Transferring water between British Colombia and the USA 249
4. Balancing free water trade and the protection of water resources in GATT 251
5. Restricting water exports for conservation purposes 253
   5.1 The use of export tariffs for water conservation purposes 253
   5.2 The use of quantitative export restrictions for water conservation purposes 254
5.3 Export restrictions for water under NAFTA 257
6. Conclusions 258

Chapter 16 Water Conflicts Between Mexico and the United States: Towards a Transboundary Regional Water Market? 260
Roberto A. Sánchez

1. Introduction 260
2. US–Mexico water resources and conflicts: state of the conflict 262
Table of Contents

2.1 The Colorado River 262
2.2 The Rio Grande/Rio Bravo 264
2.3 Shared groundwater resources 266
3. The institutional framework 268
  3.1 Overview 268
  3.2 NAFTA 269
4. A transboundary water market? 270
  4.1 Formal and informal water markets 271
  4.2 The informal water market and its potential consequences 272
5. Global warming 274
6. Conclusions 275

Chapter 17 Privatization of Drinking Water in Europe 277
Leigh Hancher

1. Introduction 277
2. An internal water market? 278
3. Liberalization and privatization 279
  3.1 The utility sectors: telecommunication, postal services and gas and electricity 279
  3.2 The European water sector 281
  3.3 The relevance of Community law 283
  3.4 Conclusion 285
4. The United Kingdom experiment 286
5. Privatization, foreign investment and national interests 288
6. Conclusion 289

Index 291
