Table of Legislation xxviii
Introduction xxxv

1. THE SUCCESSIVE REGULATORY MODELS

I. THE STARTING MODEL (UNTIL 1990) 1

   1. History and legislative instruments 3
   2. Key concepts and distinctions 7
      a. Regulatory and operational functions 7
      b. Services and infrastructure 7
      c. Reserved and non-reserved services 9
      d. Access and interconnection 14
   3. Modifications between 1990 and 1996 17

   1. History 19
   2. Alternative infrastructure 20
   3. Legislative instruments 21

IV. THE FULLY LIBERALIZED MODEL (1998–) 22
   1. History and legislative instruments 22
   2. The model of Directive 96/19 24
   3. The model of the new ONP framework 26
   4. Main substantive elements 30
      a. Universal service 31
      b. Interconnection 33
      c. Licensing 34

V. CONCLUSION 35
2. THE “HARD CORE” OF REGULATION AND ARTICLE 86 EC

I. THE INTEGRATION OF ARTICLES 86 AND 95 EC IN THE RUN-UP TO LIBERALIZATION
   A. THE STARTING POSITIONS
      1. The position of the Commission
      2. The position of the Council
      3. The position of the European Parliament

   B. THE COMPROMISE OF DECEMBER 1989

   C. THE LEGAL ASSESSMENT OF THE ECJ

   D. THE USE OF ARTICLE 86(3) EC AS A LEGAL BASIS AFTER 1990

   E. THE INTEGRATION OF ARTICLES 86(3) AND 95 EC IN AN ORIGINAL LEGISLATIVE PROCEDURE
      1. “Liberalization” and “harmonization” directives
         a. The first phase
         b. The second phase
      2. Article 86 EC directives as the hard core of EC telecommunications law
      3. Resulting procedure

   F. CONCRETE EXAMPLES
      1. Universal service
      2. Interconnection
         a. A priori categorizations in Directive 97/33
         b. Implementation in France
         c. Implementation in Germany
      3. Individual licenses
      4. Conclusion

II. THE USE OF ARTICLE 86(3) EC IN A LIBERALIZED ENVIRONMENT
   A. ARTICLE 86(1) EC
      1. Public undertakings
      2. Special and exclusive rights
      3. The need for “mischief” (Zweckmäßigkeite) analysis

   B. ARTICLE 86(2) EC

III. CONCLUSION

3. THE NEW COMPETITION LAW AS APPLIED IN THE TELECOMMUNICATIONS SECTOR

I. SOURCES AND EPISTEMOLOGY
   A. SOURCES OF EC COMPETITION LAW
   B. A MODEL FOR THE LEGITIMACY OF EC COMPETITION LAW
II. RELEVANT MARKET DEFINITION 129
   A. SUBSTITUTABILITY PATTERNS 132
   B. RELEVANT MARKETS IN A NETWORK-BASED INDUSTRY 134
      1. The case-law on the relevant product market in the air transport sector 135
      2. The implications for the telecommunications sector 136
   C. RESULTING APPROACH AND ASSESSMENT OF THE DECISION PRACTICE OF THE COMMISSION 140
      1. An original approach to market definition in telecommunications 140
      2. The decision practice of the Commission 143
         a. General principles set out under the MCR 143
         b. Market definition in the alliance cases 145
            i. Concert (BT/MCI, first phase) 148
            ii. Atlas/GlobalOne 153
            iii. Unisource/Uniworld 159
            iv. BT/MCI II 160
         c. Conclusion 163

III. SUBSTANTIVE PRINCIPLES 165
   A. REFUSAL TO DEAL AND THE "ESSENTIAL FACILITIES" DOCTRINE 165
      1. ECJ case-law on refusal to deal 167
      2. The essential facilities doctrine in United States law 171
      3. The introduction of the essential facilities doctrine in EC competition law by the Commission 179
      4. The reaction of the ECJ and CFI to the essential facilities doctrine 188
      5. A cost-benefit analysis of refusal to deal and essential facility cases 196
      6. From classical to bottleneck cases 203
      7. Conclusion 211
   B. DISCRIMINATION 218
      1. The rise of a new discrimination pattern 218
      2. Discrimination between customers 221
      3. Discrimination between a third-party customer and a subsidiary 225
      4. Conclusion 230
   C. PRICING, CROSS-SUBSIDIZATION AND ACCOUNTING 231
      1. Excessive and predatory pricing 231
      2. Cross-subsidization 235
      3. Costing and accounting in a multi-service sector such as telecommunications 239
         a. Terms of the economic debate surrounding costing and pricing 240
         b. Pricing and costing under the ONP framework 246
c. Pricing and costing in competition law 251
5. Conclusion 258
D. UNBUNDLING 259

IV. COMPETITIVE ASSESSMENT 268
1. General principles concerning multi-market cases 268
2. The competitive assessment in Atlas 275
   a. The markets for cross-border and Europe-wide services 276
   b. The French and German markets for packet-switched data services 277
   c. Overarching concerns 278
3. The competitive assessment in BT/MCI II 280

V. PROCEDURAL AND INSTITUTIONAL FRAMEWORK 283
A. STANDARD ELEMENTS OF THE PROCEDURAL AND INSTITUTIONAL FRAMEWORK 284
1. Procedural and institutional framework by source 284
   a. National sector-specific regulation 284
   b. National competition law 286
   c. EC competition law 287
2. Relationship between those frameworks 288
   a. National competition law and EC competition law 288
   b. National competition law and national regulation 292
   c. EC competition law and national regulation 292
B. MODIFICATIONS RESULTING FROM COMPETITION LAW AS APPLIED IN THE TELECOMMUNICATIONS SECTOR 295
1. Integration of EC competition law and national sector-specific regulation 295
   a. The creation of an area of overlap between EC competition law and national sector-specific regulation 295
   b. The relationship between the Commission and the NRAs 298
2. Use of EC competition law to compensate for gaps in sector-specific regulation 302
   a. The regime of conditions and obligations under EC competition law 303
   b. The distinction between conditions and obligations 308
C. RESULTING PROCEDURAL AND INSTITUTIONAL FRAMEWORK 316

VI. CONCLUSION 316
4. RETHINKING SECTOR-SPECIFIC REGULATION

I. THE LIMITS OF COMPETITION LAW 322
   A. THE GAPS OF COMPETITION LAW 323
      1. Competition in subscriber networks 323
      2. The distribution of intelligence in networks 329
   B. THE CHALLENGES FOR COMPETITION LAW 331
      1. Change in the market structure 331
      2. Convergence 334
      3. Globalization 339
   C. THE DOWNSIDES OF COMPETITION LAW 343
      1. Uniformization 343
      2. Lack of flexibility 347
      3. Opaqueness 349
   D. THE LEGITIMACY OF USING COMPETITION LAW AS THE CORE OF EC TELECOMMUNICATIONS POLICY 353
      1. Instrumentalization of competition law 353
      2. Beyond liberalization 356

II. THE CASE FOR SECTOR-SPECIFIC ECONOMIC REGULATION 359
   A. THE TERMS OF THE CASE 359
   B. THE DUAL ROLE OF TELECOMMUNICATIONS 362
   C. THE CORE REGULATORY MANDATE 368
      1. Supplier access 369
      2. Customer access 374
      3. Transactional access 378
         a. Definition 378
         b. The scope for regulatory intervention 382
            i. Interplay of the preferences of firms 383
            ii. Network effects in a multi-layered industry structure 388
         c. The parameters of regulatory intervention 393
         d. Conclusion 397
   D. THE BALANCE WITH COMPETITION LAW 398

III. SECTOR-SPECIFIC REGULATION AT THE EC LEVEL 403
   1. The need for EC sector-specific regulation 403
   2. Current status 405
   3. Legal basis 407
   4. Institutional implications 413
      a. At the legislative level 413
      b. At the level of individual decisions 414
      c. At the policy-making and policy coordination level 418
      d. Coordination with EC competition law 423
