Acknowledgements ........................................................................................................... xiii

Preface ............................................................................................................................... xv

Chapter 1  Introduction: The Main Focuses of This Work .............................................. 1

Chapter 2  Understanding and Defining the Euthanasia Phenomenon......................... 9
    1. Identifying ethical and moral values within the euthanasia phenomenon ...................... 10
    2. The distinctive elements of an instance of euthanasia ................................................. 20
    3. Defining euthanasia: the constitutive elements of a 'good death' ................................. 30
    4. Identifying the level of distinction between ending life through the withdrawal of treatment and ending life through the administration of lethal treatment ................................................................. 49
    5. Conclusions ............................................................................................................. 62

Chapter 3  ‘Allowing’ Death: Withdrawing Treatment From the Permanently Unconscious Patient ................................................................................................................. 65
    1. The present law surrounding the withdrawal of treatment from permanently unconscious patients ................................................................. 65
    2. A critical analysis of the law surrounding the practice of
withdrawing medical treatment from patients in PVS

3. Conclusions

Chapter 4 Autonomous Death: The Competent Patient and Advance Directives

1. The current law surrounding the competent individual’s refusal of treatment or request that treatment be withdrawn
2. A critical analysis of the law surrounding a competent patient’s refusal of treatment or request that treatment be withdrawn
3. Advance directives
4. Conclusions

Chapter 5 Administering Death: Voluntary Euthanasia Through the Administration of Lethal Treatment

1. The present law surrounding the practice of voluntary euthanasia where the doctor administers lethal treatment (VEDALT)
2. Analysing ethical and moral arguments for and against the legalisation of VEDALT
3. Outlining proposals for legal reform
4. Conclusions

Chapter 6 Alternative Legal and Societal Conceptions of Euthanasia: A Comparative Analysis of Euthanasia Laws in the Netherlands and the Northern Territory of Australia

1. The laws surrounding euthanasia in the Netherlands and the Northern Territory of Australia
2. Social backgrounds and policy decisions behind the laws
surrounding euthanasia .................................................. 244

3. A critique of the Dutch law and the provisions of the
Rights of the Terminally Ill Act ........................................ 263

4. Conclusions ................................................................ 286

Chapter 7 Conclusion and Implications of This Work .................. 289

Appendix The Findings of An Empirical Study Upon Perceptions of the
Euthanasia Phenomenon Held By a Sample of Individuals and Groups Within
UK Society ...................................................................... 303

1. Samples and method .................................................. 304

2. Results ........................................................................ 307

3. Concluding analysis ..................................................... 319

Table of Cases .................................................................. 325

Table of Legislation .......................................................... 329

Selected Bibliography ....................................................... 331

Index ............................................................................. 345
