List of Abbreviations xiii

Part I. Clarification of the Current Regime

Chapter One Introduction ................................................................. 3
  1.1. Definition .............................................................................. 3
  1.2. The Mechanism of Remote Sensing .................................... 5
  1.3. Applications ......................................................................... 8
  1.4. Overview of the Historical Development .............................. 9
    1.4.1. Era of Reconnaissance and Weather Monitoring
      by Space Powers: 1957 to 1972 .............................................. 9
    1.4.2. Era of Civil Remote Sensing Programmes
      by Spacefaring Nations: 1972 to mid-1990 ............................ 10
    1.4.3. Era of Commercial and Operational Remote Sensing: Late
      1990 to Present ................................................................. 11
  1.5. The Current Environment Surrounding Remote Sensing Data .... 12

Chapter Two Space Law ................................................................. 17
  2.1. Introduction ......................................................................... 17
  2.2. International Space Law ....................................................... 19
    2.2.1. Toward Formulation of Rules Governing Outer Space ....... 22
    2.2.2. Outer Space Treaty ....................................................... 23
    2.2.3. Overview of the Regime Governing Use and
      Exploration of Outer Space .............................................. 28
    2.2.4. Specific Law for Remote Sensing ................................. 45
### 2.3. National Laws and Policies

- 2.3.1. National Legislation on Space Activities ........................................ 66
- 2.3.2. National Regulations Associated with Remote Sensing .................. 74

### 2.4. Conclusion ....................................................................................... 97

### Chapter Three  Environmental Law ...................................................... 99

- 3.1. Introduction ....................................................................................... 99
- 3.2. The Institutional Framework ............................................................ 101
- 3.3. Legal Norms .................................................................................... 104
  - 3.3.1. General Principles of Environmental Law ...................................... 106
  - 3.3.2. The Examination of Multilateral Environmental Agreements .... 109
- 3.4. How Satellite Remote Sensing can Support Environmental Protection .............................................................. 119
  - 3.4.1. How Remote Sensing can Strengthen Environmental Protection: General Observations ................................................................. 123
  - 3.4.2. How Remote Sensing can Specifically Strengthen the Effects of Multilateral Environmental Agreements ............................ 127
  - 3.4.3. Use of Satellite Imagery as Evidence ........................................... 135
- 3.5. The Need for Improvement to the Legal Regime of Remote Sensing .................... 143
  - 3.5.1. The Problem of Reliability of Satellite Data: Technical Observations ............................................................... 144
  - 3.5.2. The Need for Improvement to the Legal Framework in Association with Data Policy ....................................................... 145
- 3.6. Conclusion ....................................................................................... 147

### Chapter Four  Disaster Management .................................................... 149

- 4.1. Introduction ....................................................................................... 149
- 4.2. Framework of Disaster Management .............................................. 150
  - 4.2.1. Definition .................................................................................... 150
  - 4.2.2. Different Phases of Disaster Management .................................... 151
  - 4.2.3. Actors ....................................................................................... 155
  - 4.2.4. The Current Practice Regarding Disaster Management ............ 158
- 4.3. Legal Framework ............................................................................. 162
  - 4.3.1. The Historical Development ...................................................... 162
  - 4.3.2. The Analysis of Existing Rules .................................................... 165
- 4.4. The Appropriate Legal Model that Fosters Effective Disaster Management .............................................................. 171
  - 4.4.1. The Approach from Human Rights and Humanitarian Law ....... 171
  - 4.4.2. The Approach from the Good Samaritan Principle ..................... 177
## Contents

4.5. Satellite Remote Sensing Applications to Disaster Management and Associated Legal Issues ........................................ 180

4.5.1. The Application of Satellite Remote Sensing in Different Phases of Disaster Management .................................. 181

4.5.2. Operational EO Based Programmes for Disaster Management ........................................................................ 183

4.5.3. Case Study: The 2004 Indian Ocean Tsunami ........................................................................................................ 185

4.5.4. Coordination of Operations Based on Satellite Remote Sensing ........................................................................... 187

4.5.5. Revisit of Legal Principles Surrounding Satellite Remote Sensing ........................................................................ 188

4.5.6. Legal Analysis of a Successful Model Based on the Disaster Charter ........................................................................ 189

4.6. The Need for an Improved Regime .......................................................................................................................... 190

4.6.1. How a Better Coordination with Division of Responsibilities will Enhance Effectiveness ............................................. 190

4.6.2. Issues of Clarification of Liability: Analysis of Lawsuits following Disasters against Volunteers .............................. 191

4.7. Conclusion .................................................................................................................................................................. 194

Part II. Improvements to the Current Framework

Chapter Five Data Policy and Verification of Accuracy and Authenticity ........................................................................ 199

5.1. Introduction ................................................................................................................................................................. 199

5.2. Data Policy Associated with Satellite Images and Derived Products ........................................................................ 201

5.2.1. Access Policies ...................................................................................................................................................... 201

5.2.2. Pricing Policies ...................................................................................................................................................... 204

5.2.3. Observation of Factors Determining Pricing ........................................................................................................ 206

5.3. Distribution Agreements and Conditions Associated with the Use of Data ............................................................ 209

5.3.1. Concept of License Agreement ............................................................................................................................ 210

5.3.2. Rights and Obligations with Regard to Licenses .................................................................................................. 210

5.3.3. Conditions Associated with the Use of Data ........................................................................................................ 211

5.4. Intellectual Property Rights Associated with Satellite Images .................................................................................. 213

5.4.1. Examination of the Current Legal Framework for Intellectual Property Rights ...................................................... 214

5.4.2. Applying Rules of Intellectual Property Rights to Satellite Remote Sensing Data .................................................. 222

5.4.3. The Practice of the EO Data Generator with Regard to Copyright and Database Right and Identification of Gaps and Problems .................................................................................................................. 229

Contents

7.2. Recommendations

7.2.1. Goal of the Regime

7.2.2. Recommendation on Data Policy

7.2.3. Recommendation on Data Verification

7.2.4. Recommendation on Liability

7.3. How the Proposed Recommendations are Applied in Practice

7.4. Contribution to the State-of-the Art Knowledge and Practice

7.5. Further Issues and Future Work to be Done by Others

Annex 1 Principles Relating to Remote Sensing of the Earth from Outer Space

Annex 2 Charter on Cooperation to Achieve the Coordinated Use of Space Facilities in the Event of Natural or Technological Disasters
