Introduction 1

PART I Conceptual Disputes: Brains as the Locus of Responsibility? 9

1 Neuroscience and the Explanation of Human Action 11
   DENNIS PATTERSON

   MICHAEL S. MOORE

3 Non-Eliminative Reductionism: Not the Theory of Mind Some Responsibility Theorists Want, but the One They Need 71
   KATRINA SIFFERD

4 Intention as Non-Observational Knowledge: Rescuing Responsibility from the Brain 104
   BEBHINN DONNELLY-LAZAROV

5 Efficient Causation and Neuroscientific Explanations of Criminal Action 124
   NICK J. DAVIS

PART II Epistemic Disputes: What Does Neuroscience Tell Law about Responsibility? 141

6 Lying, Deception, and fMRI: A Critical Update 143
   MICHAEL S. PARDO
7 Brain-Based Lie Detection and the Mereological Fallacy: Reasons for Optimism 160
John Danaher

8 Is Brain Reading Mind Reading? 182
Pim Haselager and Giulio Mecacci

Part III Implications for Courts and Defendants 193

9 Unlucky, Bad, and the Space in Between: Why Criminologists Should Think More about Responsibility 195
Peter Raynor

10 Neuroscience and the Criminal Jurisdiction: A New Approach to Reliability and Admissibility in the Courts of England and Wales 210
Joanna Glynn

11 Should Individuals with Psychopathy Be Compensated for Their Fearlessness? (Or How Neuroscience Matters for Equality) 228
Marion Godman

12 The Treatment of Psychopathy: Conceptual and Ethical Issues 244
Elizabeth Shaw
