### Country Reports

1. **Belgium**  
   *Prof. Dr. Frans Vanistendael*

   1. Introduction  
   2. Influence of commercial accounting  
   3. General tax measures which stimulate environmental protection  
      3.1 Taxpayers  
      3.2 Tax base  
         3.2.1 General measures which may also stimulate environmental protection  
         3.2.2 Rules of evidence  
      3.3 Tax rates and credits  
         3.3.1 General measures which may also stimulate environmental protection  
         3.3.2 Rules of evidence  
      3.4 Practicability and procedural rules  
      3.5 *Compatibility with European Community (EC) law*  
      3.6 Influence on competition  
   4. General rules with respect to environmental liabilities  
      4.1 Tax base  
         4.1.1 Impact of liabilities and provisions  
         4.1.2 Rules of evidence  
      4.2 Practicability and procedural rules  
      4.3 Compatibility with EC law
5. Specific tax incentives for environmental protection 8
   5.1 Taxpayers 8
   5.2 Tax base 8
      5.2.1 Specific provisions to stimulate environmental protection 8
      5.2.2 Rules of evidence 10
   5.3 Tax rates and credits 10
   5.4 Practicability and procedural rules 11
   5.5 Compatibility with EC law 11
   5.6 Impact on competition 11
6. Specific tax rules with respect to environmental liabilities 11
   6.1 Tax base 11
      6.1.1 Impact on environmental liabilities on tax base 11
      6.1.2 Rules of evidence 12
   6.2 Practicability and procedural rules 13
   6.3 Compatibility with EC law 13

2. France
   Prof. Dr. Cyrille David and Benoît Bohnert

1. What is the environment? 15
2. Different forms of regulations and/or taxation 15
3. When does interaction between the environment and taxation occur? 17
4. Fiscal measures to stimulate environmental protection 18
   4.1 Regulations to stimulate environmental protection 18
      4.1.1 Accelerated or free depreciation of investments in energy-efficient and/or environmentally-friendly assets 18
      4.1.2 Fiscal profits and/or tax credits with respect to investments in energy-efficient and/or environmentally-friendly assets 19
      4.1.3 Fiscal incentives (exemptions or tax credits) for investors who invest in environmentally-friendly projects 20
      4.1.4 Exemption with respect to profits out of forestry 21
      4.1.5 Replacement reserve/roll-over relief with respect to investments in scientific research 21
   4.2 Conclusion 21
5. Do the regulations cause problems in practice? 22
   5.1 Do the regulations cause problems in practice with respect to their legal coherence? 22
5.2 Do the regulations cause problems in practice with respect to their applicability in practice? 22
5.3 Do the regulations cause problems in practice with respect to legal protection? 23
6. Are there indications that the regulations and case law in France are not compatible with EC law (Art. 87 EC Treaty)? 24
7. Some information about the influence about the above mentioned regulations on the competitive regulations between companies in France 24
8. Fiscal liabilities with respect to environmental legislation 25
8.1 Introduction 25
8.2 In what respect do liabilities with respect to environmental legislation influence the fiscal profit determination by companies in France? 26
8.2.1 Debts 26
8.2.2 Provisions 26
8.2.3 Fiscal reserves 27
9. Important questions with respect to the above mentioned liabilities 27
9.1 Is the creation of a fiscal debt/provision/reserve only possible in the situation where an entrepreneur is under court order to pay the costs for soil sanitation? 27
9.2 Is the creation of a fiscal debt/provision/reserve only possible in case a legal procedure has been started? 27
9.3 Is the creation of a fiscal debt/provision/reserve only possible in the situation where the pollution was caused (even if no legal procedure has yet been started)? 27
9.4 Must the possibility to create a fiscal environmental debt/provision have been caused by the business activities of the entrepreneur himself or herself? 28
9.5 Can the fiscal debt/provision cover the costs of pollution from the past? 28
9.6 Can tax deductible provisions or debts be entered in the balance sheet by a business even if they date from costs incurred (but not deducted) a long time ago or are there limits to this possibility of deduction? 28
9.7 What evidence should be produced by the entrepreneur to create an environmental debt/provision in his or her fiscal balance sheet? 29
9.8 Is it possible to form an environmental debt/provision only in the fiscal balance sheet and not in the commercial balance sheet? 29
9.9 Which costs can be attributed to the environmental debt/provision? 29
9.10 Do the above mentioned legal possibilities to form (fiscal) environmental debts/provisions/reserves cause problems in practice with respect to their legal coherence? 30
9.11 Do the above mentioned legal possibilities to form (fiscal) environmental debts/provisions/reserves cause problems in practice with respect to their applicability in practice? 31
10. Are there any indications that the regulations and case law are not compatible with EC law 32

3. Germany
Prof. Dr. Albert J. Rädler and Alexander Winkler

1. Introduction 33
2. The relationship between tax and commercial accounting 34
   2.1 Introduction 34
   2.2 Liabilities in tax computation 34
      2.2.1 Reserves 34
      2.2.2 Provisions 34
         2.2.2.1 Restrictions with respect to the possibilities to set up provisions for contingent losses 34
         2.2.2.2 Ecological aspects 35
      2.2.3 Debts 35
3. Case study 35
   3.1 Introduction 35
   3.2 Cases 35
      3.2.1 The entrepreneur has been sentenced by a court to clean up the soil; estimated costs are XEU1 million 35
      3.2.2 An independent investigation has shown that the soil has been polluted by the entrepreneur 36
         3.2.2.1 Date of maturity 36
         3.2.2.2 Real existence of a legal future liability 36
         3.2.2.3 Amount 36
      3.2.3 An entrepreneur has started a gas station and at the moment the soil is not polluted 37
         3.2.3.1 Temporal maturity 37
         3.2.3.2 Real existence of a legal future liability 37
         3.2.3.3 Amount 37
4. Fiscal measures to stimulate environmental protection 37
   4.1 Introduction 37
## Contents

4.2 Accelerated investments  
4.2.1 Environmental object (commodity/investment)  
- § 7 d II EstG  
4.3 Environmental subsidies  
4.3.1 Direct subsidies for ecological investments  
4.3.1.1 Subsidies for investments in more environmentally-friendly power plants  
4.3.2 Subsidized loans  
4.3.2.1 European Recovering Programme (ERP) environmental protection and energy-saving programme  
4.3.2.2 Energy programme

### 4. Italy

*Prof. Dr. Franco Gallo, Prof. Dr. Fabio Marchetti and Claudia Gregori*

1. Introduction  
2. The relationship between fiscal and commercial accounts in Italy  
3. Fiscal measures to stimulate environmental protection  
   3.1 General fiscal measures to stimulate environmental protection  
   3.2 Specific fiscal measures to stimulate environmental protection  
4. Fiscal liabilities with respect to environmental legislation  
   4.1 General fiscal liabilities with respect to environmental legislation  
5. Conclusions on direct taxation  
   5.1 Anticipated depreciation  
   5.2 Incentives for research and advanced technology

### 5. The Netherlands

*Prof. Dr. Peter H.J. Essers*

1. Introduction  
2. Environmental direct tax legislation with respect to enterprises  
   2.1 Introduction  
   2.2 The relationship between fiscal and commercial accounts in the Netherlands  
      2.2.1 Fiscal versus commercial accounts  
      2.2.2 Total profit and annual profit  
      2.2.3 Sound business practice
Environmental Policy and Direct Taxation in Europe

2.2.3.1 Introduction 51
2.2.3.2 Principles of sound business practice 51

2.3 Environmental measures with respect to the total profit 53
2.3.1 Forestry exemption 53
2.3.2 Energy investment deduction 53

2.4 Environmental measures with respect to the annual profits 53
2.4.1 Accelerated depreciation 53
2.4.2 Environmental liabilities 54
2.4.2.1 General aspects of fiscal liabilities in the Netherlands 54
2.4.2.2 Environmental liabilities on the fiscal balance sheet 57

3. Environmental tax legislation with respect to investors in ‘green projects’ 61
4. Other environmental tax measures 61

6. Spain
Prof. Dr. Tulio Rosembij and Dr. Angel Baena

1. General 63
1.1 The influence of commercial accounting on taxation 63
2. Possibilities to create liabilities in the fiscal balance sheet in general 64
3. Other fiscal measures in Spanish income tax which stimulate (or may stimulate) environmental protection 65
3.1 Measures that indirectly stimulate environmental protection 65
3.2 Specific fiscal measures to stimulate environmental protection 66
4. Application of the general rules on fiscal liabilities on situations of entrepreneurs which carry on a business on polluted soil 67

7. United Kingdom
Prof. Dr. David Williams

1. The position in the United Kingdom 69
2. Fiscal measures to stimulate environmental protection 70
2.1 Abolition of tax charge on forestry (1988) 70
2.2 Waste disposal 70
2.3 Scientific research 71
2.4 Charities assisting environmental objectives 71
2.5 Motor cars 72
3. Fiscal liabilities with respect to environmental legislation 72
8. General Conclusions

Prof. Dr. Peter H.J. Essers

1. The goal of the investigation 75
2. Fiscal measures in income tax meant to stimulate environmental protection 75
2.1 Inventory 75
2.2 Practical problems 78
2.3 Compatibility with EC law 79
2.4 Effectiveness of the regulations 80
2.5 General conclusions with respect to fiscal measures meant to stimulate environmental protection 81
3. Fiscal liabilities with respect to environmental legislation 83
3.1 Inventory 83
3.2 General conclusions with respect to fiscal environmental liabilities 88

Environmental Taxes and Charges in the Single Market:
A Communication from the Commission 91
