Electricity Trade in Europe
Review of the Economic and Regulatory Changes

Edited by
Janusz Bielecki and
Melaku Geboye Desta
Table of Contents

Foreword xiii
List of Acronyms xvii

Part I Operational and Economic Aspects 1

1 Electricity Trade: Overview of Current Flows and Infrastructure
Janusz Bielecki 3
1.1 INTRODUCTION 4
1.2 ORGANISATION OF ELECTRICITY MARKETS 6
1.3 INCENTIVES TO TRADE 7
1.4 CURRENT INTER-REGIONAL TRADE 8
1.5 TECHNICAL AND ECONOMIC BARRIERS TO TRADE 11
1.6 INFRASTRUCTURE AND OTHER FACTORS AFFECTING TRADE 13
   1.6.1 Generation capacity 13
   1.6.2 Interconnections 17
   1.6.3 Price differentials 20
1.7 OUTLOOK FOR INTER-REGIONAL TRADE 21

2 European Interconnection: State of the Art 2003
Georges de Montravel 23
2.1 INTERCONNECTED ELECTRIC SYSTEMS: PRESENT STATUS 24
   2.1.1 Historical overview 24
   2.1.2 Main driving forces behind network integration 26
   2.1.3 The main blocks 26
2.2 Recent Developments 31
2.2.1 The driving forces 31
2.2.2 The projects 32
2.3 Conclusions and Recommendations 42
2.3.1 Situation in Albania 42
2.3.2 Incentives for investing in interconnection facilities 42
2.3.3 Ideas on long-term prospects 43
3 Regional Electricity Cooperation and Integration Francois Verneyre 47
3.1 Introduction 48
3.2 Benefits of regional integration of power systems 50
3.3 Barriers to integration 53
3.4 Institutional framework 56
3.5 Integration of power networks in Eurasia 57
3.5.1 General remarks 57
3.5.2 The European internal electricity market 59
3.5.3 The Mediterranean Ring 62
3.5.4 Expansion to the East 64
3.6 Conclusions 66
4 Impact of Liberalisation on Investment Performance in the Power Sector Ralf Dickel 69
4.1 Introduction 70
4.2 Background: issues, trends and policies 73
4.2.1 Investment decisions 73
4.2.2 Problems with the investment performance of electricity markets 75
4.2.3 Policy tools: capacity mechanisms and price caps 76
4.2.4 Trends in IEA countries 78
4.3 Generation 79
4.3.1 Introduction 79
4.3.2 Investment, reserves and fuel mix in liberalised markets 80
4.3.3 Role of prices and market structure 81
4.4 Transmission 83
4.4.1 Introduction 83
4.4.2 Policy implications 85
4.4.3 Options to relieve transmission congestion 87
4.4.4 Cross-border interconnections 89
4.5 Conclusions 93
5 Development of Interconnections and Reliability Standards Frank Vandenberghe 95
5.1 General context 96
5.1.1 Transmission System Operators’ associations 96
5.1.2 Reliability 96
5.1.3 Short-term rule setting and long-term market watchdog 98
5.1.4 Interconnection types 99

5.2 Development of interconnections 99
5.2.1 UCTE experience of synchronous development 99
5.2.2 Synchronous or asynchronous connection? 100

5.3 Main building blocks of a synchronous area 102
5.3.1 Primary control and reserves 102
5.3.2 Secondary and tertiary control and reserves 104
5.3.3 N-1 criterion 104
5.3.4 Data exchange 106
5.3.5 Stability 106
5.3.6 Control Areas: impediments or building blocks for a well-functioning market? 108
5.3.7 Synchronous versus asynchronous interconnection for new developments? 109

5.4 From technicalities to reliability standards 110
5.4.1 The historical context of former UCPTE 110
5.4.2 Unbundling and the creation of UCTE 111
5.4.3 The UCTE Multi-Lateral Agreement 111
5.4.4 The Multi-Lateral Agreement’s compensation for damages 112

5.5 Reliability standards and synchronous area development 114
5.5.1 General position on synchronous area development 114
5.5.2 Towards definitive borders for the synchronous area? 115

Part II Regulatory Aspects 117

6 Overview of the Regulatory Environment for Trade in Electricity
Andras Lakatos 119

6.1 Introduction 120
6.1.1 Industry structure, regulation and trade 120
6.1.2 Organisation of electricity markets 121

6.2 WTO rules for electricity trade 122
6.2.1 General remarks 122
6.2.2 Definition of electricity: commodity or service? 123
6.2.3 WTO rules applicable to trade in electricity as a good 126

6.3 Barriers to trade in electricity 129
6.3.1 General comments 129
6.3.2 Monopolies and exclusive and special privileges (State Trading Enterprises) 130
6.3.3 Access to foreign customers 134
6.3.4 Reciprocity requirements for market access 135
6.3.5 Trade measures for environmental purposes 137
6.3.6 Public service obligations 144
6.3.7 Access to the network 148
6.3.8 Long-term contracts 151
6.4 Concluding remarks 153

7 Role of Regulatory Arrangements in Developing the Power Markets
David Kennedy 155
7.1 Introduction 156
7.2 Overview of effective power tariffs 158
7.3 Progress in regulatory reform 161
7.4 Detailed reform experiences 164
7.4.1 Hungary 165
7.4.2 Kazakhstan 166
7.4.3 Moldova 169
7.4.4 Discussion and lessons learned 170
7.5 Conclusion 177

8 International Energy Trade and Access to Networks: the Case of Electricity
Thomas Wälde and Andreas Gunst 179
8.1 Access to networks as precondition for cross-border trade in energy and energy services 180
8.2 The main concepts: natural monopoly, political economy and economic regulation of energy transport facilities 184
8.2.1 Natural monopoly 184
8.2.2 Third-Party Access (TPA) 186
8.2.3 Regulation and regulators 188
8.2.4 Political economy 192
8.3 Legal methods and concepts for TPA 194
8.4 Cross-border and international law issues 199
8.4.1 Third-party access 199
8.4.2 Cross-border energy transit 202
8.4.3 Energy import restrictions 206
8.5 Conclusion 208

9 Cross Border Capacity Allocation Methods
Charles Zimmerman 213
9.1 Introduction 214
9.2 Which countries need to measure cross-border transfer capacity? 215
9.3 Relevant concepts 218
9.3.1 Network congestion 218
9.3.2 Net Transfer Capacity 221
9.3.3 Available Transfer Capacity 223
9.4 Methods of allocating transfer capacity 224
Table of Contents

9.4.1 Methods acceptable within the EU 224
9.4.2 Possible allocation methods outside the EU 225
9.4.3 Other methods of allocating capacity 227
9.5 Identification of transmission asset owners and operators 228
9.6 Legal authority of energy regulators 229
9.7 Regulatory actions needed to address critical bottlenecks 231

10 Multilateral Rules and Trade in Energy Goods and Services: the Case of Electricity
Simonetta Zarrilli 235
10.1 Introduction 236
10.2 The electricity market 238
10.3 International trade in services related to electricity 240
10.4 The multilateral GATS negotiations and their relevance for electricity 242
10.4.1 Classification issues 242
10.4.2 Related financial services 247
10.4.3 Electricity generation and GATT and GATS disciplines 248
10.4.4 Negotiating market liberalisation for electric power services: the "request and offer" process 251
10.5 Competition-related issues 254
10.6 Public services 259
10.7 Conclusions 261

11 Electricity Trade and Trade-Related Environmental Measures
Janusz Bielecki and Leif K. Ervik 265
11.1 What are the environmental concerns and actions in the power sector? 266
11.2 What are the existing safety and environmental standards? 271
11.2.1 Nuclear safety 271
11.2.2 Atmospheric emissions 274
11.3 Why are trade restrictions not the most suitable instruments for environmental protection? 278
11.4 What other instruments could be used? 280
11.5 Concluding remarks 282

12 Trade-Neutral Policies for the Promotion of Electricity from Renewables
Leigh Hancher 285
12.1 Definition of renewable energy sources 286
12.2 Scope of the analysis 288
12.3 Typology of measures 289
12.4 The evolving EU regime
  12.4.1 EU support measures 291
  12.4.2 National support measures 292

12.5 The GATT/WTO framework: general comments 299
  12.5.1 Preliminary remarks: Articles XX and III 300
  12.5.2 The competitive relationship 300
  12.5.3 Less favourable treatment 302

12.6 The scope of Article XX 303
  12.6.1 GATT Article XX(a), (b), and (g) 303
  12.6.2 GATT Article XX(b) 303
  12.6.3 GATT Article XX(g) 305
  12.6.4 Jurisdictional application and processes and production methods 308
  12.6.5 The chapeau of GATT Article XX 311
  12.6.6 Concluding remarks 314

12.7 Subsidies under the SCM agreement 316

12.8 Conclusions 318

List of Figures

Figure 1 Regional breakdown of total installed capacity (2000) 5
Figure 2 Development of excess capacity by region 15
Figure 3 Household electricity prices, 2000 (US cents/kWh) 20
Figure 4 The synchronous zones in 2002 27
Figure 5 Synchronous areas 97
Figure 6 Classification of power system stability 107
Figure 7 Sales of services by foreign affiliates of US companies in the utilities business 239
