The Handbook of

EUROPEAN INTELLECTUAL PROPERTY MANAGEMENT

Developing, managing and protecting your company's intellectual property

2nd edition

ADAM JOLLY & JEREMY PHILPOTT

In association with

KOGAN PAGE
London and Philadelphia
Contents

Foreword

Part 1  IP potential

1.1 Europe's IP architecture
Laurent Manderieux, L Bocconi University
The European Union – but not only the European Union 4;
The new EU-wide integrated IPRs: big success and much use 5; Partly integrated rights: harmonized rights can sometimes be of real help to companies 6; The EPO: a convenient European alternative route for getting patents 8; And what of the future? 9

1.2 Turning IP into assets
Ben Goodger, Rouse
Your IP strategy as part of your overall business strategy 13;
Knowing what you've got 16; Getting it right from creation 16; Manage your portfolio efficiently 16; Leverage your IP to generate revenue 17; Be prepared to enforce – intelligently 17; Look ahead 18;
Conclusion 18

1.3 Open innovation
Karri Leskinen and Sampo Ylätalo, Borenius & Co
What is open innovation? 21; Open innovation principles 21;
Open innovation: IP strategy planning for SMEs 22;
Conclusion 23

Profile: Procter & Gamble – designed to innovate
Procter & Gamble
1.4 The market for ideas
Li Westerlund, Bavarian Nordic
The market of ideas 29; The biopharmaceutical industry 31; The ‘value’ of patents 32; Summary 32

1.5 IP in a downturn
David Knight, Field Fisher Waterhouse
Global expansion – with IP at the forefront 34; Challenges to the effective management and use of IP 35; Conclusions 36; Four basic recommendations 36

1.6 Creating value
Erik Van Praet and Markus Gahleitner, Borealis Polyolefine
From defensive IP strategy to competitive TC strategy 41; IPR value – a guideline for strategy 42; Facing the world – licensing and enforcement 42

1.7 Challenges in IP
Marianne Levin, Stockholm University
A system under multiple pressures 45; The new stakeholders 46; Time for conciliation 47

Feature: A year of creativity and innovations
Biserka Strel, Slovenian Intellectual Property Office

Part 2 IP fit for purpose

2.1 A combination of rights
Stephen Carter, Mewburn Ellis LLP
Imitation – flattering but is it good business? 65; Cornerstones 66; Make life difficult for competitors 66; Revenue streams 66; Which rights? 66; Home or away? 68; Time your run 68; Don’t switch off 68

2.2 Controlling patent costs
John Richards, Ladas & Parry LLP
Defining the objective 71; Proper preparation 72; Avoiding duplication of effort 73; Pruning the portfolio 74; Conclusion 74
2.3 Registered rights and trade secrets
Martin Nohlen, Uexküll & Stolberg
Basic features of trade secrets and patents or other registered IP rights 77; Which ideas can be subject to registered protection? 80; Product or method – further criteria for striking a balance 80; Case study 81; Conclusion 82

2.4 Broad or narrow
Peter Indahl, Awapatent
The emerging company 85; The established company 86; The force of the narrow patent 87; The costs of securing the patent 87; The fencing policy 88

Cost-efficient patent strategy
Nikolai Bisgaard, GN ReSound

2.5 Filing for speed
Lars de Haas, Vereenigde
The European PACE programme 92; Bypassing the EPO 93; Pros and cons 94

A renewed interest in Belgian patents?
Nicolas Pecher, Pecher Consultants sprl

2.6 IP for SME inventors
Gianfranco Dragotti, Dragotti Associati

Feature: Amendments in Europe and the United States
Annelise Holme, Holme Patent A/S

Part 3 Idea search

3.1 Searching patents
Nigel Clarke, EPO
Patent searching: Why? What's in it for me? 117; Patent searching: How, when, and where can I do it? 118; Patent searching: What can I do with the information? 119; Caution 120; Summary 121

Italian searches
Gianfranco Dragotti, Dragotti Associati

3.2 Brand and design searches
Nicolas Vigneron, OHIM
3.3 Working with universities
Paul Tiltman, University of Exeter
Intellectual property – a real asset? 131; Processes to enable exploitation of the UK knowledge base in higher education institutions (universities) 131; How can the potential for enterprises to source ideas and knowledge best be realized? 132

3.4 Change of technological patterns in the European Union
Ulrich Schmoch and Taehyun Jung, Fraunhofer Institute for Systems and Innovation Research

3.5 Strategic insights
Evamaria Hügel, Krug
Patents as a means to achieve strategic corporate targets 143; Recognizing and assessing a patent strategy 143; Technical prerequisites 145; Corporate requirements 146

Feature: Combine to stay ahead
The Dutch Separation Technology Institute

Feature: Patent searches in the East Asian region
Peter Atzmuller, voestalpine Stahl GmbH

Part 4 Revenue models

4.1 Start-ups and spin-outs
Gwilym Roberts, Kilburn & Strode
The commercial strategy 163; IP strategy – the high level 164; IP strategy – the low level 164; Exploitation 165; Third-party rights 165; Conclusion 165

4.2 Options for keeping a lead in technology
Guido von Scheffer and Mattia Fogliacco, IPB
The standard scenario – and why it might be the first to die 167; Evolution of IP management 168; New options 170; Conclusion 172

4.3 Licensing
Christian Fortmann, 24IP Law Group
Terminology 175; Foundations 175; Anatomy of a licence agreement 177; Differences 179; Conclusion 179
4.4 Patent pools
Stefan Rolf Huebner, Hinkelmann & Huebner
Independent vs complementary inventions 181; The need for cooperation 182; Cooperation in patent pools 183; Patent pool requirements under antitrust law 183; Conclusion 184

4.5 Outsourcing and the extended enterprise
Richard Lawrence, Keltie
Example 1: Creation and management of new IT infrastructure 189; Example 2: Complex supply chain 190; Conclusion 191

Part 5 Ownership of the rights

5.1 Freedom to operate
William E Bird, Bird Goën
The FTO search and analysis 200; What to do if there are blocking third-party rights 202; A few examples 203; Some practicalities of FTO analysis 204

5.2 Collaborative ventures
Dominic Elsworth, Hargreaves Elsworth
Why collaborate? 207; Considerations for potential collaborators 208; Who brings what to the collaboration? 208; How will the collaborative venture be managed? 208; Who gets what? 209; How is intellectual property resulting from the collaboration to be owned and what will be done with it? 209; People 210; Who pays? 210; What about other work? 210; The golden nugget 210; Conclusion 211

5.3 The competitive landscape
Kim Simelius, Tampereen Patenttitoimisto Oy
Optimal patenting strategy 214; Networking and patents 214; Patent-related challenges in a competitive environment 215; Understanding the patent landscape 215; Creating the right balance in patents 216; Summary 217

Feature: Indirect patent infringement
Klaus Hinkelmann, Hinkelmann & Huebner
**Part 6 Contract negotiations**

6.1 IP in commercial agreements  
*Leigh Ellis, Gillhams*

Contract law 225; Contractual dealings with intellectual property 226; Confidential information and know-how 226; Trade mark rights 226; Copyright law 227; Patent rights 227; Commercial environment 227; Conclusion 228

6.2 Model agreements for collaborative research  
*Johan Schlüter, Johan Schlüter Law*

The experience in the past 231; Model agreements: What’s the use? 232; The results of the committee’s work 233; Consideration for the free research of the universities 234; Will the model agreements ease the process? 234

6.3 How to pitch safely  
*Dids Macdonald, ACID*

ACID pitch guidelines 236; What can I do if my rights have been infringed following a pitch? 237

6.4 Trusting and checking: royalty audits  
*David Eastwood, KPMG Forensic*

The business case for royalty audits 241; Some examples of what goes wrong 242; What you can do at the beginning to get this right 242

**Part 7 Technology rights**

7.1 What can and can’t be protected  
*Ilya Kazi, Mathys & Squire*

Computer-implemented inventions 247; Medical innovations 248; Practical advice 248; The future 250; Conclusion 252

7.2 How to knock out a patent  
*Alan MacDougall and Chris Hamer, Mathys & Squire*

What challenges can be made? 254; How to build a case 255; Once you have built a case, what next? 255; What is needed to file the opposition 256; What happens after filing the opposition? 256; How long it takes and how much it costs 256; Help with an opposition 257; Can you get an award of costs? 257; What happens to a European patent when an opposition is pending? 257; Can you appeal the decision? 257; What happens after filing the appeal? 257; Can you appeal the Board of Appeal’s decision? 258; Tips for opposition/appeal strategy 258
7.3 How to design around a patent
Armin K Bohmann, bohmann \|bohmann
The European patent system 261; Claim interpretation 262; Claim interpretation under the EPC 262; Claim interpretation under the national laws governing the national parts of a European patent 263; Questioning the legal validity of a European patent and its national parts 264; Summary 264

7.4 Where applications go wrong
Marco Serravalle, Serravalle s.a.s.
Sufficiency is often impossible to restore 268; Parameters in claims 268

7.5 When to use utility models
C Silvano Reniero, Dr Reniero & Associati

7.6 Technology standards and IP
JJ Hutter, Nederlandsch Octrooibureau
History 279; Third parties excluded? 280

7.7 Why file in the United States first
John Moetteli, Moetteli & Associés SàRL
Exceptions 287; Conclusions 288

Part 8 Technology commercialization

8.1 Early-stage IP
Dan Richardson and Paul McEvoy, Technology from Ideas
Sourcing ideas 305; Selection/filtering 306; Proof of concept development 307; Customer-specific application development 308; Summary and future trends 309

8.2 Technology trading
Mark Cohen, Sargentia
Platforms, subsystems and products: different angles on IP ownership 313; The layered approach to strategic patenting 314; Patenting timelines and the layered approach 314; ‘Surround’ IP and ongoing developments 315; Conclusion 315

8.3 Profiting from science
Damien McDonnell, Norman Apsley, David Brownlee, Ian Wilkinson and Bryan Keating, Matrix
Intellectual asset management 320; Invention/innovation life cycle 322; Managing patent costs 324; Managing technology transfer 325; Conclusions 325
8.4 From IP assets to IP revenues
*Quentin Tannock and Ilian Iliev, CambridgeIP*

- Patents as a source of business intelligence 327
- Challenges in understanding your patent landscape 328
- Case studies illustrating how understanding your patent landscape can improve revenue generation 330

8.5 Keep patents creative
*Jens Jørgen Schmidt and Nelly Sander, Patentgruppen*

- Professionalization of the IP-generating process 337
- Has your IP handling become a pure ‘sausage factory’? 338
- Back to basics – patenting in the start-up company 338
- Introducing the Creative Forum 338
- Definition of goals 339
- Practical implementation 340

Profile: Implementation of a patent management system within an industrial environment
*Peter Atzmüller, voestalpine Stahl GmbH*

Part 9 New frontiers in IP

9.1 The patentability of computer programs under the EPC
*Colin Stratford, EPO*

- European patent law 349
- The exclusions from patentability 350
- Inventive step 351
- Conclusion 353

9.2 Managing the IP in source codes
*Stephan Peters, Deposix*

- The challenge: managing the IP in software source codes 355
- The issue: inherent conflict of interest between developer and licensee 357
- Software escrow 358
- Advantages of software escrow 359

9.3 The biopharma industry
*Birgitte Stephensen, Genmab*

- The patent practice is lagging behind the technology 361
- It takes time to fully develop and get proof-of-concept for a new technology 363
- New therapeutic uses 363
- Experimental use exemption 363
- Freedom to operate issues relating to manufacturing processes 364
- Conclusion 364
9.4 Low-carbon innovation

Chris Harrison, Low Carbon Innovation Centre
Support for innovation 365; Behavioural change and technology 366; Life-cycle greenhouse gas assessment 366; Intellectual property 368; Intelligent systems 368; Starting the journey 368

Feature: Patenting computer-implemented inventions in Europe
Peter Schindelmann and Andreas Dilg, DHS

Part 10 Brand rights

10.1 Brand protection in Europe
Stefano Arena and Gabriele Gislon, Marietti, Gislon e Trupiano
Trade mark rights 385; Model/design rights 387; Conclusion 388

10.2 Trade mark challenges
Moa Askengren and Peter Hedberg, Brann
Building a strong trade mark 389; How to respond if your trade mark is challenged 392; Look before you leap 394

10.3 Action against copying
Ari-Pekka Launne, Kolster Oy Ab
Plan carefully 398; Secure your rights 399; Enforce your rights 399; Conclusion 400

10.4 Use of trade marks by third parties
Lucas M David, WalderWyss
Trade mark use by resellers of branded goods 401; Use by consumers 402; Use of proper name and address 402; Generic terms 404; Indications of destination 404; Repacking 404; Processing 405; Index-based financial instruments 405; Use as a meta-tag, keyword or ad word 405; Ornamental use 406; Use on toys 406; Conclusions 406

Part 11 The knowledge business

11.1 Organization of intellectual asset management
Marian Driessen, DSM Food Specialties
How to manage intellectual assets strategically 414; Intellectual asset management integrated in the business process 414
11.2 Organizing an innovative company
Thibaud Lelong and Christophe Geiger, Centre of International Intellectual Property Studies
Optimizing the organization of the company: no systematic answer 420; Integration of internal innovation into the organization of the company 421; Integration of external innovation into the organization of the company 422; Conclusion 422

11.3 IP into strategy
Mikael Tranekaer Christensen, Plougmann & Vingtoft, and Jon Wulff Petersen, TTO A/S
IPR is much more than law 425; Difficulties finding the right one 426; Look at competitors’ patents 427; The growing importance of IPR 427

11.4 IP management systems
Tony Nijm, Ipendo
The gap in the IP market 430; A modern approach to IP management 430; IP management systems 432; Digital collaboration areas 432; Ten steps towards value-adding IP management 433

11.5 Manage the flow of IP
Christian Kramer, GSI Office Management
What is a procedure? 435; Procedures and their potential 437; Does IT help your procedures? 438; What does workflow management mean? 439; The real benefit: workflow management and your improved and optimized procedures 439; Challenges 440

Part 12 IP as an asset

12.1 Risk to intangible assets
Dan Trueman, Kiln

12.2 What investors expect to see
Per Victor and Charlotta Poehler, Cederquist

12.3 IP securitization
Alain Kaiser, Novagraaff
New funding sources 459; A favourable new context 460; A range of techniques 462; Conclusion 463
12.4 Valuation of patents
Nikolai Bisgaard, GN ReSound

Feature: Patents for credit and venture capital
Italian Patent and Trademark Office

Part 13 Guard your rights

13.1 Efficient alternative dispute resolution (ADR) for intellectual property disputes
Ignacio de Castro and Sarah Theurich, WIPO
The challenges of enforcing intellectual property rights 479;
Why litigation may not always be the ideal means to solve an IP dispute 480;
What is alternative dispute resolution (ADR)? 480;
What are the benefits of ADR for solving IP disputes? 482;
How does the WIPO Arbitration and Mediation Center assist IP holders to solve their disputes? 484

13.2 Avoiding litigation
Fred Sonnenberg, 24IP Law Group
Costs and time of litigation 487; ADR is an alternative 488;
Alternative dispute resolution 489; The actors, organizations and other professionals such as patent attorneys 490

13.3 Where to take action
Nigel Stoate, Simon Cohen and Tanvi Shah, Taylor Wessing LLP
Post-grant harmonization 493; So what does this mean for business? 495; Where to litigate a European patent 495;
Conclusion 497

IP litigation in Europe and Italy
Gabriele Gislon, Marietti, Gislon e Trupiano

13.4 Preliminary injunctions
Peter-Ulrik Plesner, Plesner Law Firm

13.5 Counterfeiting and piracy
Gábor Németh, Hungarian Patent Office
The extent and economic impact of counterfeiting 506;
Challenges for the IP owners/managers 507; Challenges for the government 508; The current EU context of enforcement 508;
Conclusion 509

13.6 IP risk transfer
Dan Trieman, Kiln
Appendix 1  History, organization and procedures of the European Patent Office  519
Appendix 2  The Office for Harmonization in the Internal Market  525
Index  533
Index of advertisers  547
