</tbody>
</table>
B. Facilitating enforcement .................................................. 63
C. Proposals ........................................................................... 66

III. The Provision on Abnormally Low Tenders From a Competition Law Perspective ............................................. 66
A. How low is "abnormally low"? ........................................... 68
B. Obligation to verify and reject ......................................... 69
C. Abnormally low tenders and anti-competitive agreements (Article 101 TFEU) .................................................. 70
D. Abnormally low tenders and Article 102 TFEU .................. 72
E. Proposals ........................................................................... 75

IV. Voluntary and Preventive Rules ........................................... 75
A. The Commission's proposals for prevention of anti-competitive behaviour by design ........................................ 76
B. Preliminary market consultations .................................... 79
C. Proposals ........................................................................... 79

V. Institutionalisation of Competition Law Aspects in Public Procurement Procedures .................................................. 80
A. Declarations of honour .................................................. 80
B. Proposals ........................................................................... 81

VI. Conclusions ....................................................................... 83

Chapter 3. The Contracting Authority as Purchaser and Regulator: Should the Procurement Rules Regulate what we Buy? 85
Peter Trepte

Chapter 4. Are the Procurement Rules a Barrier for Cross-border Trade within the European Market? A view on proposals to lower that barrier and spur growth ........................................... 107
Albert Sánchez Graells
I. Introduction .......................................................................... 107
II. Some basic economic evidence regarding The Impact of Procurement Rules on The Working of the Internal Market .......... 114
III. A slightly different approach: Focus on simplification and reduction of Red Tape .................................................. 116
IV. Preliminary appraisal of some simplification measures oriented to reduce costs and foster Cross-Border Participation .................................................. 121
A. Reduction of red tape: introducing the European Procurement Passport and (honour) self-declarations .......... 121
B. Reduction of information and search costs: administrative support through knowledge centers and soft law proposals .... 126
Chapter 8. Why the EU Public Procurement Law should contain Rules that allow Negotiation for Public Private Partnerships

Christina D. Tvarnø

I. Introduction PPP From an Institutional Perspective
II. The Objectives Behind PPP
A. Common utility and PPP
B. PPP in the new economic environment
III. PPP is an Alternative to the Traditional Type of Public Contract
A. The PPP key factors
IV. The Aim of EU Public Procurement Law and the Opposite Aim of PPP
V. PPP and the Current Ban on Negotiation in an Economic Perspective
A. PPP in a Law and economics perspective
B. The need of access to negotiation
VI. PPP, Negotiation and Game Theory
A. PPP as the tool to change the game
B. PPP and cooperation
C. The legal framework does not accept PPP as an alternative
VII. Can a PPP Contract Increase Innovation?
VIII. A Possible Legal Solution to the Missing Link in the Optimal Use of PPP
VIII. Closing Remarks
Pedro Telles
I. Introduction .............................................................................. 221
II. Definition of Innovation .......................................................... 222
III. Competitive Dialogue and Product Innovation ...................... 223
   A. Direct procurement of product innovation ......................... 224
   B. Indirect procurement of product innovation ...................... 224
      1. The case of the Balearic Islands Regional Health Board ... 225
IV. Competitive Dialogue and Process Innovation ...................... 226
   A. Competitive dialogue internal process changes ................. 226
   B. Different ways of organizing the dialogue stage ............... 227
      1. Own solution model ................................................. 227
      2. Crowd-sourced model ............................................. 228
      3. Common specifications model ................................. 229
   C. Changes to contracting authorities practice ...................... 229
   D. Changes to companies changing their internal practice ........ 229
   E. Changes to companies internal practice .......................... 230
      1. Combination of procedures and methods ..................... 230
V. Fine-Tuning Competitive Dialogue ....................................... 231
   A. Scope of application .................................................... 231
   B. Allowing confidentiality and cherry picking ban to be put aside .................................................. 232
   C. Making payments mandatory for product innovation ........ 233
   D. Solving the IP problem ................................................. 233
VI. Conclusion .............................................................................. 235

Chapter 10. Defining a Service Concession Contract Will the Proposed New Definition of Service Concession Contracts Increase Legal Certainty in the Field of Concessions? ........................................... 237
Carina Risvig Hansen
I. Introduction .............................................................................. 237
II. What is a Service Concession Contract? ................................. 239
   A. Types of risk .................................................................. 241
      1. Exposure to the vagaries of the market ....................... 242
      2. Management and use of facilities/equipment ............... 243
      3. Funding .................................................................... 244
      4. Security of Payment ................................................. 245
   B. Must the risk be substantial? ......................................... 247
III. The Proposed Concessions Directive .................................... 251
Content

A. The definition of service concession contract ........................................... 252
B. New rules – or merely a codification of the Treaty's principles? .................. 254

IV. Summary of Findings ................................................................. 258

Chapter 11. The Public Procurement Rules and Innovation ......................... 259
Michael Steinicke
I. Introduction .................................................................................. 259
   A. Innovation and public procurement – preliminary remarks .......... 260
   B. Innovation and public procurement – perspective of the paper ....... 262
II. The Possibilities of Innovation Within the Procurement Process ... 262
   A. Technical specifications ......................................................... 263
   B. Design contests ................................................................... 263
   C. Variations ............................................................................ 264
   D. Competitive dialogue and the negotiated procedure ............... 265
   E. Conclusion and perspectives ............................................... 266
III. Innovation in the Contractual Phase ............................................. 266
   A. A separate innovation process without initiating a tender process ................ 267
   B. Remedying the flaws of the pre-commercial procurement: innovation partnerships ......................................................... 269
      1. The Proposed Procurement Directive Article 29: innovation partnership ......................................................... 269
      2. Remarks to the proposed provision on innovation partnerships ................................................................. 270
   C. Conclusions on the scope for innovation in the contractual phase ................................................................. 274
IV. Concluding Remarks ................................................................... 274

Chapter 12. Can Secondary Considerations in Procurement Contracts be a Tool for Increasing Innovative Solutions? .. 275
Martin Burgi
I. Introduction .................................................................................. 275
II. Innovation and Secondary Considerations ........................................ 275
   A. Innovation ........................................................................... 275
      1. Clarification ........................................................................ 275
      2. What is new in promoting innovations by public procurement law? ................................................................. 276
   B. Secondary considerations ....................................................... 277
C. The common features of innovation and secondary considerations ............................................................ 277
1. Examples for innovations in environmental and social policy ........................................................................ 278
2. Meeting the standard or creating something new? ..................................................................................... 279
3. The perspectives of promoting innovations by procurement contracts .................................................. 280
4. The risks while promoting innovations ................................................................................................. 280

III. Increasing Innovation by Specifications for Tenderers with Functional Requirements and Variants ........................................................................................................... 282
A. Functional requirements in the specifications ................................................................................. 282
B. Technology forcing as an alternative ................................................................................................. 283
C. Authorizing variants .......................................................................................................................... 284

IV. Increasing Innovation by Award Criteria .......................................................................................... 284
A. Green and social considerations as award criteria ........................................................................ 284
B. Innovative character as an award criterion .................................................................................... 286

V. Increasing Innovative Solutions by Contract Performance Conditions ................................................................................................................................. 287
A. Innovative measures during and beyond contract performance ....................................................... 287
B. Contract performance conditions and EU Treaties ................................................................... 288
C. The requirements of Article 26 Public Sector Directive ................................................................ 288
   1. Measurable impact on the subject-matter of the contract ......................................................... 288
   2. The feasibility of controls and sanctions .................................................................................. 289

VI. Conclusion ........................................................................................................................................ 290

List of cases ......................................................................................................................................... 291

Index ............................................................................................................................................... 299
