1. THE ECONOMIC JUSTIFICATION FOR MERGER CONTROL

1 Introduction ........................................................................................................... 1–001

2 Criteria for Assessing Market Performance ..................................................... 1–002
   2.1 Consumer welfare ......................................................................................... 1–003
      2.1.1 Consumer surplus—single market price .............................................. 1–004
      2.1.2 Consumer surplus—price discrimination ............................................. 1–005
   2.2 Total welfare ................................................................................................. 1–008
   2.3 Efficiency .................................................................................................... 1–009
   2.4 Analysis of criteria ....................................................................................... 1–010

3 The Effects of Mergers on Market Performance .............................................. 1–012
   3.1 Efficiencies .................................................................................................. 1–013
   3.2 Market power ............................................................................................... 1–014
      3.2.1 Perfect competition and monopoly contrasted .................................. 1–015
      3.2.2 Oligopoly ............................................................................................ 1–019
   3.3 The trade-off between efficiency and market power ................................... 1–023

4 Measurement of the Predicted Effects of Mergers on Market Performance .... 1–026

5 Empirical Evidence of the Effects of Mergers on Consumers ......................... 1–028

6 Overview of Analysis
   6.1 Theories of competitive harm
      6.1.1 Introduction .......................................................................................... 1–029

3.11 Critical loss analysis .................................................. 3–031
3.12 Demand characteristics ............................................. 3–032
3.13 Previous cartel activity .............................................. 3–033
3.14 Evidence from customers and competitors .................. 3–034
3.15 International categorisations ..................................... 3–035

4 PRODUCT MARKET DEFINITION: SUPPLY-SIDE SUBSTITUTION
4.1 The SSNIP test .......................................................... 3–036
4.2 Evidence ............................................................... 3–037

5 SPECIFIC ISSUES IN PRODUCT MARKET DEFINITION
5.1 Continuous chains of substitution ............................... 3–038
5.2 Own label goods .................................................... 3–039
5.3 Original equipment/replacement goods ....................... 3–040
5.4 Differentiated products ............................................. 3–041
5.5 Captive production/in-house supplies ......................... 3–042
5.6 Secondary markets .................................................. 3–044
5.7 Two-sided markets .................................................. 3–046
5.8 Bundle markets ...................................................... 3–047
5.9 One-way markets .................................................... 3–048
5.10 Outsourcers or resellers who sub-contract to actual suppliers .................................................. 3–049
5.11 Durable goods ........................................................ 3–050
5.12 Recycled goods ...................................................... 3–051
5.13 New markets ........................................................ 3–052
5.14 Innovation markets ................................................. 3–053
5.15 Technology .......................................................... 3–054
5.16 Procurement markets .............................................. 3–055
5.17 Exploration, production and supply ......................... 3–056
5.18 Spot and long-term contracts .................................. 3–057
5.19 Physical and paper trading ...................................... 3–058
5.20 Wholesale markets ................................................. 3–059
5.21 Use of demand- and supply-side analysis .................. 3–060
5.22 Programme and catalogue sales .............................. 3–061

6 GEOGRAPHIC MARKET DEFINITION: INTRODUCTION ........ 3–062

7 GEOGRAPHIC MARKET DEFINITION: DEMAND-SIDE SUBSTITUTION
7.1 The SSNIP test .......................................................... 3–063
7.2 Evidence: introduction ............................................. 3–064
7.3 Pricing
   7.3.1 Commission questionnaires .................................. 3–065
   7.3.2 Price correlation studies ..................................... 3–066
   7.3.3 Stationarity tests .............................................. 3–067
   7.3.4 Uniformity in prices .......................................... 3–068
   7.3.5 Price discrimination .......................................... 3–069
   7.3.6 Absolute price levels ........................................ 3–070
7.4 Trade flows and buying patterns
  7.4.1 Evidence of market operation ........................................3–071
  7.4.2 General principles .........................................................3–072
  7.4.3 Quantification ..................................................................3–073
  7.4.4 Shock analysis or event studies ........................................3–074
  7.4.5 Bidding studies ...............................................................3–075
7.5 Transport and other transaction costs ....................................3–076
7.6 Legal restrictions and capacity constraints ............................3–078
7.7 Customer requirements for local support services ..................3–079
7.8 Conditions of competition ...................................................3–080
7.9 Customers’ procurement policies ..........................................3–081
7.10 EU harmonisation and procurement legislation ....................3–082
7.11 Other harmonisation of product standards ............................3–083
7.12 National preferences, language and culture ..........................3–084

8 GEOPHRAIC MARKET DEFINITION: SUPPLY-SIDE
SUBSTITUTION ........................................................................3–085

9 SPECIFIC ISSUES IN GEOGRAPHIC MARKET DEFINITION
  9.1 “One-way” markets.................................................................3–086
  9.2 Continuous chains of substitution ..........................................3–087
  9.3 “Route-by-route” markets ......................................................3–088
  9.4 Suppliers competing in both national and local
      markets ................................................................................3–089
  9.5 Smaller Member States ..........................................................3–090
  9.6 Multi-plant operations ............................................................3–091
  9.7 Competitive tenders and implants .........................................3–094

10 TEMPORAL MARKET DEFINITION ........................................3–095

4. MARKET SHARES AND CONCENTRATION LEVELS
1 INTRODUCTION .......................................................................4–001

2 MARKET SHARE DATA
  2.1 Units for measuring market shares ........................................4–002
      2.1.1 Value data ....................................................................4–003
      2.1.2 Volume data ................................................................4–004
      2.1.3 Capacity data ...............................................................4–005
      2.1.4 Numbers of credible bidders ..........................................4–006
      2.1.5 Uncommitted reserves ..................................................4–009
      2.1.6 Installed base and firm orders .......................................4–010
      2.1.7 Control shares ..............................................................4–011
      2.1.8 Total stock ....................................................................4–012
      2.1.9 Other measurements ....................................................4–013
      2.1.10 Combinations of measurements ...................................4–014
  2.2 Calculating market shares .....................................................4–015
      2.2.1 Exclusion of certain transactions from the
           market ................................................................................4–016
2.2.2 Data sources .................................................. 4-017
2.2.3 Period for calculating market shares .................. 4-018
2.2.4 Adjustments to market shares ......................... 4-019
2.2.5 Currencies ................................................ 4-020
2.2.6 Captive production ...................................... 4-021
2.2.7 Market share calculations in cases of supply-side substitution .................................................. 4-022
2.2.8 Calculation of market shares when a merging party has an interest falling short of sole control in a relevant business .................................................. 4-023
2.2.9 Attribution of market shares in cases of exclusive distribution, toll production, supply of top-up volumes and technology licensing .................................................. 4-024
2.2.10 Attribution to a merging party of sales by a competitor .................................................. 4-025
2.3 The use by the Commission of market share data .......... 4-026
2.3.1 The principal uses of market share data .................. 4-027
2.3.2 Limitations on the usefulness of market share data .................................................. 4-028
2.4 Interpreting market share data .................................. 4-029
2.4.1 Changes in market shares ................................. 4-030
2.4.2 Increment in market share ................................ 4-031
2.4.3 Gap in market share ...................................... 4-032
2.4.4 Directions of shifts in market shares .................. 4-033
2.4.5 Shrinkage effects arising from the merger ............. 4-034
2.4.6 Small markets or small numbers of transactions per year .................................................. 4-035

3 CONCENTRATION DATA .......................................... 4-036

5. THE COUNTERFACTUAL

1 INTRODUCTION .................................................. 5-001

2 THE COUNTERFACTUAL .......................................... 5-002

3 OTHER TRANSACTIONS
3.1 Parallel mergers ............................................. 5-005
3.2 Overlapping mergers ....................................... 5-006
3.3 Applying the counterfactual to parallel and overlapping mergers .................................................. 5-007

6. MARKET OPERATION

6.1 INTRODUCTION .................................................. 6-001

2 PRINCIPAL ECONOMIC MODELS OF MARKET OPERATION ........ 6-002
2.1 The Stackelberg leader-follower model ................. 6-003
2.2 Limit pricing theory ....................................... 6-004
2.3 Game theory ................................................ 6-005
CONTENTS

3 DYNAMIC EFFECTS: CHANGES IN THE MARKET OVER TIME:
   3.1 Expanding markets ........................................... 6-007
   3.2 Static or declining markets .................................. 6-008
   3.3 New markets .................................................... 6-009
   3.4 Innovation ...................................................... 6-011
   3.5 Naturally concentrated markets .................................. 6-012

4 COMPETITIVE INTERACTION ....................................... 6-013
   4.1 Pricing .......................................................... 6-014
      4.1.1 Pre-merger pricing strategies .......................... 6-015
      4.1.2 The merging parties’ prices ............................ 6-016
      4.1.3 The merging parties’ pricing incentives ............... 6-017
      4.1.4 Pricing trends as evidence of competitive conditions ........................................... 6-018
      4.1.5 A comparison of prices in different markets .......... 6-019
      4.1.6 The effects of previous mergers on prices ............ 6-020
      4.1.7 The way in which price is set ........................... 6-021
   4.2 Costs .......................................................... 6-022
   4.3 Products .......................................................... 6-023
   4.4 Contractual terms .............................................. 6-025
   4.5 Network effects .................................................. 6-026
   4.6 Two-sided markets .............................................. 6-028
   4.7 Tender or bidding markets ..................................... 6-029
   4.8 Derived demand .................................................. 6-031
   4.9 Connected markets .............................................. 6-032
   4.10 Not-for-profit organisations .................................. 6-033

5 EU PROCUREMENT AND HARMONISING LEGISLATION .............. 6-034

6 NATIONAL OR EUROPEAN CHAMPIONS ............................ 6-035

7. HORIZONTAL MERGERS: NON-COORDINATED EFFECTS
   1 INTRODUCTION ..................................................... 7-001
   2 Merging firms have large market shares ...................... 7-002
   3 Differentiated products or suppliers ........................ 7-003
   4 Competitors are unlikely to increase supply if price increases ........................................... 7-007

5 OTHER FACTORS WHICH MAY GIVE RISE TO NON-COORDINATED EFFECTS ........................................... 7-008
   5.1 Limited possibilities of switching supplier ................ 7-009
   5.2 Merged group’s ability to hinder expansion ............... 7-011
   5.3 Loss of an important competitive force or a “maverick” ........................................... 7-012
   5.4 Loss of innovation competition .............................. 7-013
   5.5 Mergers involving recent entrants ........................... 7-017
6 EFFICIENCIES GENERATED BY THE MERGER AND OTHER ASPECTS OF THE MERGED GROUP’S MARKET POSITION

6.1 Whether efficiencies resulting from the merger may contribute to a prohibition decision

6.1.1 The Commission’s early cases

6.1.2 The Commission’s more recent approach and the easyjet judgment

6.1.3 The current position

6.2 The merged group’s financial resources

7 NON-COORDINATED EFFECTS ARISING FROM THE ACQUISITION OF MINORITY SHAREHOLDINGS IN COMPETITORS

8 EVIDENCE AND TECHNIQUES USED TO ASSESS POTENTIAL NON-COORDINATED EFFECTS

8.1 Categories of evidence

8.1.1 Bid data

8.1.2 Survey evidence

8.1.3 Switching data

8.1.4 Natural experiments

8.1.5 Scanner or panel data

8.1.6 Internal documents

8.1.7 Commission questionnaires

8.2 Analytical techniques

8.2.1 Merger simulations

8.2.2 Simplified non-coordinated effects tests

8.2.3 Price/concentration analysis

8.2.4 Bidding analysis

8.2.5 Other econometric techniques

8. COORDINATED EFFECTS

1 INTRODUCTION

2 THE TEST FOR IDENTIFYING COORDINATED EFFECTS

3 METHODOLOGY IN ANALYSING COORDINATED EFFECTS

4 THE NATURE OF COORDINATION

5 WHETHER COORDINATION IS PRESENT PRIOR TO THE MERGER

5.1 The Airtours decision

5.2 The practical importance of a finding of pre-merger coordination

5.3 Evidence

5.3.1 Pricing evidence

5.3.2 Past evidence of suppliers’ ability to increase prices
5.3.3 Past evidence of retaliation or monitoring ...........8–014
5.3.4 Other evidence ..................................................8–015

6 THE MEMBERS OF THE CANDIDATE OLIGOPOLY ...........8–016

7 REACHING TERMS OF COORDINATION
7.1 Introduction ..........................................................8–017
7.2 Terms of coordination will only emerge if they are profitable ..................................................8–018
7.3 Type of product .........................................................8–019
7.4 Facilitating practices .................................................8–021
7.5 Similarity in costs structures ......................................8–022
7.6 Complexity of the terms of coordination ....................8–024
7.7 Transparency of the reference point .........................8–025
7.7 Other factors affecting the ability to reach terms of coordination
7.7.1 The number of coordinating firms .........................8–027
7.7.2 The benefits of not coordinating ..........................8–028
7.7.3 Market growth ..................................................8–029
7.7.4 Innovation ......................................................8–030
7.7.5 Extent of repeated interaction ...............................8–031
7.7.6 Similarities in market shares ...............................8–032
7.7.7 Price elasticity ..................................................8–033
7.7.8 Multi-market contacts .........................................8–034
7.7.9 Vertical integration .............................................8–035

8 MONITORING DEVIATIONS ........................................8–036

9 DETERRENT MECHANISMS ........................................8–041
9.1 Generally ..........................................................8–042
9.2 The scope of the obligation to identify a deterrent mechanism ..................................................8–042
9.3 The incentives to comply with the coordinated outcome
9.3.1 The nature of the deterrent mechanism ................8–044
9.3.2 The incentive to comply .......................................8–045
9.4 Chances of detection and speed of punishment ..................8–046
9.5 The deterrent mechanism must eliminate the gains from cheating ..................................................8–047
9.6 The credibility of the retaliatory threat .......................8–048
9.7 Market operation ..................................................8–049
9.8 Evidence that retaliatory measures have been employed in the past ..................................................8–050

10 REACTIONS OF OUTSIDERS ..............................8–051
10.1 Introduction ..........................................................8–052
10.2 The competitive fringe ............................................8–052
10.3 New entry ..........................................................8–054
10.4 Countervailing buyer power ....................................8–055
CONTENTS

11 CAUSATION ................................................................. 8–057

12 CAPACITY
  12.1 Introduction ......................................................... 8–060
  12.2 Symmetry in over-capacity ...................................... 8–061
  12.3 Actual capacity .................................................... 8–062
  12.4 Tacit coordination on capacity ................................. 8–063

13 STRUCTURAL LINKS AND OTHER FORMS OF COOPERATION .......... 8–064

14 EVIDENCE OF HISTORIC CARTEL ACTIVITY ...................... 8–066

9. LOSS OF POTENTIAL COMPETITION AND MERGERS IN NEIGHBOURING MARKETS
  1 INTRODUCTION ......................................................... 9–001

  2 LOSS OF POTENTIAL COMPETITION
     2.1 General ........................................................... 9–002
     2.2 The Commission’s decision in Air Liquide/BOC ............ 9–004
     2.3 The Commission’s other decisions ............................ 9–005
     2.4 The approach of the US agencies .............................. 9–006

  3 MERGERS IN NEIGHBOURING MARKETS ............................. 9–007

10. THE MERGED GROUP’S BUYER POWER
  1 INTRODUCTION ......................................................... 10–001

  2 CONDITIONS FOR THE EXERCISE OF BUYER POWER .......... 10–003

  3 COMMISSION DECISIONS ............................................. 10–004

11. VERTICAL ISSUES
  1 INTRODUCTION
     1.1 Definition .......................................................... 11–001
     1.2 Ambiguous effects of vertical integration on consumer welfare .............................................. 11–002
     1.3 Decisions of the European Union Courts .................... 11–003
     1.4 Notice on non-horizontal mergers ............................. 11–004
     1.5 Consistent application of antitrust law ...................... 11–005
     1.6 Vertical effects flow-chart ..................................... 11–006

  2 POSSIBLE EFFICIENCIES IN VERTICAL MERGERS
     2.1 Introduction ........................................................ 11–007
     2.2 Transaction costs .................................................. 11–008
     2.3 Double marginalisation .......................................... 11–009

  3 INPUT FORECLOSURE
     3.1 Introduction ........................................................ 11–011
CONTENTS

3.2 Market share and concentration levels ........................................... 11-012
3.3 The framework for analysing input foreclosure issues .......................... 11-013
3.4 Identify the leveraging conduct ...................................................... 11-014
3.5 Ability to foreclose access to inputs .............................................. 11-015
   3.5.1 An important input ............................................................. 11-016
   3.5.2 A significant degree of market power in the upstream market ............. 11-017
3.6 Incentive to pursue an input foreclosure strategy .................................. 11-024
3.7 Impact on competition in the downstream market .................................. 11-029
3.8 Causation ..................................................................................... 11-031
3.9 Efficiencies .................................................................................... 11-032

4 CUSTOMER FORECLOSURE
   4.1 Introduction ................................................................................ 11-033
   4.2 Market share and concentration levels ............................................ 11-034
   4.3 The framework for analysing customer foreclosure issues ....................... 11-035
   4.4 Identify the leveraging conduct ...................................................... 11-036
   4.5 Ability to foreclose access to customers .......................................... 11-037
      4.5.1 Merged group an important customer ........................................ 11-038
      4.5.2 Ability to impair upstream rivals’ ability to compete ..................... 11-039
   4.6 Incentive to pursue a customer foreclosure strategy .............................. 11-041
   4.7 Impact on competition ................................................................ 11-042
   4.8 Causation ..................................................................................... 11-044
   4.9 Efficiencies .................................................................................... 11-045

5 FORECLOSURE OF NEW ENTRY ......................................................... 11-046

6 OTHER CONCERNS ARISING FROM VERTICAL INTEGRATION
   6.1 Coordinated effects and express collusion .......................................... 11-047
   6.2 Price discrimination ....................................................................... 11-048
   6.3 Information .................................................................................... 11-049
   6.4 Avoidance of regulatory constraints ................................................ 11-050
   6.5 Reduced incentive to engage in research and development ................... 11-051
   6.6 Loss of liquidity on the input market ................................................. 11-052

7 OTHER SITUATIONS GIVING RISE TO VERTICAL FORECLOSURE CONCERNS
   7.1 “Diagonal” overlaps ...................................................................... 11-053
   7.2 Indirect vertical relationships .......................................................... 11-054
   7.3 Buyer power .................................................................................. 11-055
   7.4 Partial integration .......................................................................... 11-056
      7.4.1 Forward shareholdings ............................................................ 11-057
      7.4.2 Backward shareholdings .......................................................... 11-060
12. CONGLOMERATE ISSUES

1 INTRODUCTION
   1.1 General ................................................................. 12–001
   1.2 Ambiguous effects of conglomerate mergers on consumer welfare .................. 12–002
   1.3 Decisions of the European Union courts .................................................. 12–003
   1.4 Notice on non-horizontal mergers ......................................................... 12–004
   1.5 Grounds for intervention in conglomerate mergers .............................. 12–005
   1.6 Organisation of the chapter ............................................................ 12–006

2 GENERIC TREATMENT OF CONGLOMERATE ISSUES—LEVERAGING
   2.1 Market share and concentration levels ............................................. 12–007
   2.2 The framework for analysing conglomerate leveraging issues ..................... 12–008
   2.3 Identify the leveraging conduct ...................................................... 12–009
   2.4 Ability to pursue the leveraging conduct ........................................ 12–010
      2.4.1 A significant degree of market power in one of the markets concerned .............. 12–011
      2.4.2 A large common pool of customers ............................................. 12–012
   2.5 Incentive to pursue the leveraging conduct ....................................... 12–016
   2.6 Foreclosure ..................................................................................... 12–020
   2.7 Causation ....................................................................................... 12–022
   2.8 Efficiencies ....................................................................................... 12–023

3 TYING, PURE BUNDLING AND MIXED BUNDLING
   3.1 Introduction ..................................................................................... 12–024
   3.2 The Chicago School .......................................................................... 12–025
   3.3 Ability and incentive to tie or bundle ................................................ 12–026
   3.4 The exclusionary effects of tying or bundling ...................................... 12–028

4 OTHER THEORIES OF LEVERAGE .............................................. 12–029

5 PORTFOLIO POWER OR RANGE EFFECTS
   5.1 The scope of portfolio power theories ............................................. 12–030
   5.2 Applying leveraging theory to portfolio power cases ............................ 12–033

6 REDUCED INCENTIVE TO ENGAGE IN RESEARCH AND DEVELOPMENT .............................................. 12–035

13. COORDINATION IN JOINT VENTURES

1 INTRODUCTION
   1.1 The effects of joint ventures on competition .................................. 13–001
   1.2 The relationship between arts 2(4) and 2(5) of the EUMR and coordinated effects ................................................. 13–002

2 COORDINATION OF BEHAVIOUR
   2.1 General ....................................................................................... 13–003
CONTENTS

2.2 Identifying the markets for analysis ........................................... 13-005
2.3 Identifying the mechanism for coordination .................................. 13-006
2.4 Assessing the parents’ incentive and ability to engage in coordination .............................................................. 13-007
2.5 Appreciability ........................................................................... 13-010
2.6 Causation ................................................................................. 13-011
2.7 Article 101(3) analysis ................................................................. 13-012

14. COMPETITION FROM ACTUAL RIVALS

1 INTRODUCTION ............................................................................. 14-001

2 ASSESSING THE STRENGTH OF COMPETITION FROM RIVALS
2.1 General ...................................................................................... 14-002
2.2 Market Shares ............................................................................. 14-003
2.3 Concentration data ........................................................................ 14-004
2.4 Bidding studies ............................................................................ 14-005

3 VIABILITY OF ALTERNATIVE SOURCES OF SUPPLY
3.1 General ...................................................................................... 14-006
3.2 Incentive to expand output ............................................................. 14-007
3.3 Ability to expand output ................................................................. 14-008
3.4 Credible alternatives for customers ................................................. 14-011
3.5 Sufficiency of competitor activity ................................................... 14-012
3.6 Competition from outside the market ............................................ 14-013

4 LINKS BETWEEN THE MERGED GROUP AND ITS COMPETITORS
4.1 General ...................................................................................... 14-014
4.2 Can the Commission take account of links which do not confer control? ................................................................. 14-015
4.3 Analysing links which do not confer control .................................. 14-017
4.4 Analysing links conferring control ................................................ 14-022

15. COUNTERVAILING BUYER POWER

1 INTRODUCTION ............................................................................. 15-001

2 ASSESSING BUYER POWER
2.1 General ...................................................................................... 15-003
2.2 Existence of viable alternatives or credible threats ....................... 15-004
2.3 Whether buyers have an incentive to act ........................................ 15-006
2.4 Whether buyers’ power is counterbalanced by similar or greater power of the merged group .............................................. 15-008
2.5 The role of smaller customers ....................................................... 15-009

3 LEADING DECISIONS ON BUYER POWER .................................. 15-010
16. NEW ENTRY

1 INTRODUCTION ................................................................. 16-001

2 RELEVANT PRINCIPLES
   2.1 Test of likely, timely and sufficient .............................. 16-002
   2.2 Likelihood of entry ..................................................... 16-003
   2.3 Timeliness .................................................................... 16-004
   2.4 Sufficiency .................................................................... 16-005
   2.5 New entry as a “trump” .................................................. 16-006

3 BARRIERS TO ENTRY
   3.1 Definition ...................................................................... 16-007
   3.2 Technical and strategic advantages .................................. 16-008
      3.2.1 Sunk costs ............................................................... 16-009
      3.2.2 Economies of scale ................................................ 16-010
      3.2.3 Product differentiation through advertising/brand loyalty ............................................................................................................. 16-011
      3.2.4 Brand proliferation .................................................... 16-012
      3.2.5 Research and development ....................................... 16-013
      3.2.6 Excess capacity ........................................................ 16-014
      3.2.7 New entrants face higher costs of capital .................... 16-015
      3.2.8 Distribution and service networks ............................ 16-016
      3.2.9 Other barriers to entry ............................................. 16-017
   3.3 Entry impediments .......................................................... 16-018
   3.4 Analysis of barriers to entry in practice ......................... 16-019
   3.5 Barriers to expansion ...................................................... 16-024
   3.6 Barriers to exit and contestable markets ....................... 16-025

17. THE FAILING FIRM DEFENCE

1 INTRODUCTION .................................................................. 17-001

2 THE CURRENT TEST .......................................................... 17-002
   2.1 Forced out of the market in the near future ...................... 17-003
   2.2 No less anti-competitive purchaser ............................... 17-005
   2.3 Assets would inevitably exit the market ......................... 17-006
   2.4 Competitive structure of the market would deteriorate to at least the same extent absent the merger .................. 17-007

3 THE EVOLUTION OF THE TEST
   3.1 The Commission’s approach prior to BASF .................... 17-008
   3.2 The BASF decision ......................................................... 17-009

4 DECISIONS APPLYING THE TEST
   4.1 NewsCorp/Telepiù ........................................................... 17-011
   4.2 BLU ................................................................................ 17-015
   4.3 JCI/FIAMM ................................................................. 17-016
   4.4 Olympic/Aegean I ......................................................... 17-022
   4.5 Nynas/Shell/Harburg Refinery ....................................... 17-023
18. EFFICIENCY GAINS

1 INTRODUCTION
   1.1 General .................................................. 18–001
   1.2 Rationale for treating efficiency gains as a positive factor in merger appraisal ....................... 18–002
   1.3 Options for giving positive effect to efficiency gains .......................... 18–003

2 EVOLUTION OF THE COMMISSION’S APPROACH TO EFFICIENCIES ........................................ 18–004
   2.1 Reform of the EUMR ........................................ 18–005
   2.2 Input from academic economists .......................... 18–007

3 THE TREATMENT OF EFFICIENCY GAINS UNDER THE EUMR ........................................... 18–009

4 SPECIFIC ISSUES IN ANALYSING EFFICIENCY GAINS
   4.1 Benefit to consumers ....................................... 18–011
   4.2 Merger-specific ............................................. 18–012
   4.3 Verifiable ................................................... 18–013
   4.4 Substantial .................................................. 18–014
   4.5 Timely ....................................................... 18–015
   4.6 Disregarding anti-competitive strategies .................. 18–016
   4.7 A preference for reductions in marginal or variable costs ...................................................... 18–017
   4.8 Extent of remaining competition .......................... 18–018
   4.9 Efficiencies arising in markets other than the one in which market power is created or strengthened ............. 18–019
   4.10 Types of efficiency ........................................ 18–020

19. OTHER EVIDENCE OF THE LIKELY EFFECTS OF THE MERGER ON CONSUMERS

1 INTRODUCTION ................................................. 19–001

2 CATEGORIES OF EVIDENCE
   2.1 Lack of motives for the merger .......................... 19–002
   2.2 Past profitability .......................................... 19–003
   2.3 The effects of previous mergers .......................... 19–005
   2.4 Whether customers object to the merger .................. 19–006
2.5 Stock market reaction .................................................. 19-008
2.6 Purchase price .......................................................... 19-011

20. REMEDIES

1 INTRODUCTION
1.1 General ................................................................. 20-001
1.2 Limits on the power to accept remedies ....................... 20-002
1.3 Burden of proof ....................................................... 20-003
1.4 Remedies in Phases I and II ....................................... 20-004
1.5 Structure of this chapter ............................................ 20-005

2 GENERAL PRINCIPLES RELEVANT TO THE SELECTION OF AN
APPROPRIATE REMEDY
2.1 Comprehensive solution ............................................. 20-006
2.2 Effective implementation ........................................... 20-007
2.3 Proportionality ........................................................ 20-010
2.4 The benefits of the transaction for consumers ............... 20-012
2.5 The overall effect of the remedies package on consumers ... 20-013
2.6 The effect of the remedies on technical and economic
progress ................................................................. 20-014
2.7 Behavioural and structural remedies
   2.7.1 Distinction between behavioural and structural
   remedies generally immaterial .................................... 20-015
   2.7.2 Three-way distinction and preference for
divestiture remedies ................................................ 20-016
   2.7.3 Use of conduct remedies in support of a structural
   solution ............................................................... 20-018

3 SELECTION OF REMEDIES BY THEORY OF COMPETITIVE
HARM ................................................................. 20-019
3.1 Non-coordinated effects (horizontal overlaps) ............... 20-020
3.2 Co-ordinated effects ................................................. 20-021
3.3 Loss of potential competition .................................... 20-023
3.4 Procurement power ................................................... 20-024
3.5 Vertical issues ........................................................ 20-025
3.6 Conglomerate issues ................................................ 20-026
3.7 Coordination in joint ventures ................................... 20-027

4 EMPIRICAL STUDIES OF THE EFFECTIVENESS OF
REMEDIES ............................................................ 20-028

5 TRANSFERRING A MARKET POSITION—TRANSFER OF A
BUSINESS
5.1 Introduction ........................................................... 20-030
5.2 Model texts ........................................................... 20-032
5.3 Clear identification of the divestment business .............. 20-033
5.4 A viable business

5.4.1 Introduction ................................................................. 20-034

5.4.2 Carve-out remedies commonly, but not invariably, accepted ................................................. 20-035

5.4.3 “Mix and match” remedies not usually accepted ................................................................. 20-037

5.4.4 Divestment business must normally operate on a “stand-alone” basis .................................. 20-038

5.4.5 Product cycle effects may undermine viability .............................................................................. 20-039

5.4.6 Strategic behaviour by the vendor of the divestment business .................................................. 20-040

5.4.7 Notifying party can choose between two equally viable remedies .............................................. 20-041

5.5 All necessary assets should be included in the divestment package

5.5.1 General .................................................................................. 20-042

5.5.2 Shared assets ........................................................................... 20-043

5.5.3 When specific assets may be excluded from the divestment package ...................................... 20-044

5.5.4 Relevance of the purchaser’s resources .................................................................................... 20-045

5.5.5 Empirical studies ....................................................................... 20-046

5.6 Divestment of “more than the overlap”

5.6.1 The Commission requires a broader divestment ........................................................................ 20-047

5.6.2 Parties choose a broader divestment .......................................................................................... 20-048

5.7 Divestment of “less than the overlap”

5.7.1 General principles ........................................................................ 20-049

5.7.2 Divestment of a strong business ............................................................................................... 20-050

5.7.3 Divestments leaving a trivial overlap ...................................................................................... 20-051

5.8 Retention by the divesting party of an interest in the divested business ........................................ 20-052

5.9 The purchaser of the divestment business

5.9.1 The purchaser standards ......................................................................................................... 20-053

5.9.2 The operation of the purchaser standards ................................................................................ 20-054

5.9.3 Empirical studies ..................................................................................................................... 20-055

5.9.4 Financial resources .................................................................................................................. 20-056

5.9.5 Proven expertise ....................................................................................................................... 20-057

5.9.6 Incentive to compete ................................................................................................................ 20-060

5.9.7 Independence .................................................................................................................................. 20-062

5.9.8 No competition concerns ........................................................................................................... 20-063

5.9.9 Other issues relating to the purchaser standards ........................................................................ 20-064

5.10 When it is necessary to sell the business to a single purchaser ...................................................... 20-065

5.11 Whether it is necessary to sell the business to the purchaser offering the highest price .................. 20-068

5.12 Time limits ....................................................................................................................................... 20-069

5.13 Interim preservation and carving out of the business ..................................................................... 20-071
5.14 Post-completion transitional support for the purchaser .................................................. 20-074
5.15 Prohibition on buying back the assets .............................................................. 20-077

6 TRANSFERRING A MARKET POSITION—TRANSFER OF INTELLECTUAL PROPERTY RIGHTS
6.1 When the transfer of intellectual property rights will provide an appropriate remedy ........ 20-078
6.2 Pharmaceuticals mergers ......................................................................................... 20-080
6.3 Consumer goods mergers
   6.3.1 General ........................................................................................................ 20-082
   6.3.2 Sometimes no need to transfer production facilities ...................................... 20-083
   6.3.3 Rebranding remedies ..................................................................................... 20-084
   6.3.4 Brand splitting may create viability issues ...................................................... 20-087
   6.3.5 Brand splitting and consumer protection issues .............................................. 20-088
   6.3.6 Brand splitting and co-ordination issues ....................................................... 20-089

7 REMOVAL OF LINKS WITH COMPETITORS ......................................................... 20-090

8 ACCESS REMEDIES
8.1 Introduction ........................................................................................................... 20-092
8.2 Circumstances in which an access remedy may be appropriate .............................. 20-095
8.3 General issues relating to remedies designed to facilitate entry
   8.3.1 Viability of entry opportunity ........................................................................ 20-096
   8.3.2 Actual entry must be foreseeable ................................................................... 20-097
   8.3.3 Timescale for entry ......................................................................................... 20-098
   8.3.4 Sufficiency of entry ....................................................................................... 20-099
   8.3.5 A package of measures may be required ....................................................... 20-100
8.4 General issues relating to remedies designed to prevent foreclosure ...................... 20-101
8.5 Monitoring ............................................................................................................. 20-103
8.6 Duration ............................................................................................................... 20-104
8.7 Examples of remedies granting access to infrastructure or technical platforms ....... 20-105
8.8 Examples of remedies granting access to technology or intellectual property ......... 20-106

9 AMENDMENTS TO LONG-TERM EXCLUSIVE AGREEMENTS
9.1 Introduction ........................................................................................................... 20-107
9.2 Examples of remedies terminating exclusive vertical agreements ......................... 20-109

10 OTHER REMEDIES
10.1 Introduction .......................................................................................................... 20-110
10.2 General principles ................................................................................................. 20-111
10.3 Transfer of specific assets (other than intellectual property rights) to transfer a market position ........................................ 20–112
10.4 Termination of distribution agreements ........................................ 20–114
10.5 The supply of goods or services to eliminate vertical foreclosure concerns or facilitate entry ........................................ 20–115
10.6 The creation of “product space” to facilitate new entry ........................................ 20–116
10.7 Other remedies designed to “sponsor” new entry (not falling within the “access” category) ........................................ 20–117
10.8 Assurance of purchases from third parties ........................................ 20–118
10.9 Correction of market flaws ........................................ 20–119
10.10 Other remedies
  10.10.1 Other remedies for vertical effects ........................................ 20–120
  10.10.2 Ring-fencing and firewalls commitments ........................................ 20–121
  10.10.3 Other specific “conduct” commitments ........................................ 20–122

11 CROWN JEWELS, UP-FRONT BUYER, FIX IT FIRST AND CONDITIONAL REMEDIES
11.1 Alternative and “crown jewel” remedies ........................................ 20–123
11.2 “Up-front buyer” and “fix it first” remedies ........................................ 20–126
11.3 Conditional remedies ........................................ 20–129

12 OTHER ASPECTS OF THE REMEDIES PROCESS
12.1 Legal status of the notice on remedies ........................................ 20–130
12.2 The roles of the trustees ........................................ 20–131
12.3 The “review clause” ........................................ 20–132
  12.3.1 Modifications to divestment remedies ........................................ 20–133
  12.3.2 Modifications to non-divestment remedies ........................................ 20–134
  12.3.3 Modifications triggered by the commission ........................................ 20–135
12.4 Third party consents
  12.4.1 General ........................................ 20–136
  12.4.2 Rejection of necessary remedies conditional on third party consents ........................................ 20–137
  12.4.3 Acceptance of absolute obligations notwithstanding the need for third party consents ........................................ 20–138
  12.4.4 Other solutions to the issue of third party consents ........................................ 20–139
12.5 Commitments given in earlier cases ........................................ 20–141
12.6 Commitments to resolve two or more cases ........................................ 120–142
12.7 Clearance without accepting the commitments (or all of them) ........................................ 20–143
12.8 Status of different types of commitments and consequences of breach ........................................ 20–144
12.9 Declarations from the competent authorities of Member States ........................................ 20–145
12.10 International cooperation ........................................ 20–146
12.13 Conduct by the merging parties in the context of the Commission’s investigation and informal commitments .................................................. 20–147

13 STRUCTURING TRANSACTIONS WHEN REMEDIES ISSUES ARE EXPECTED ................................................................. 20–148

Index ........................................................................................................................................................................... 705
