INTRODUCTION 1

PART I: INTERNATIONAL SYSTEMS, WORLD HISTORY, AND INTERNATIONAL RELATIONS THEORY 15

1. Systems, History, Theory, and the Study of International Relations 17
   1. The Underdeveloped Conception of the International System 18
   2. The Historiography of International Relations 22
   3. World History 30
   4. Why Prefer the Label 'International Systems'?
   5. Conclusions 33

2. Competing Conceptions of the International System 35
   1. Singer and the Behavioural Conception of the International System 36
   2. Waltz and the Neorealist Conception of the International System 39
   3. Wendt and the Constructivist Conception of the International System 41
   4. Theoretical Pluralism and the Conception of the International System 43
   5. Conclusions 47

3. Systemic Thinking in World History 49
   1. Scientific and Philosophical World History 49
   2. Divergent Approaches to World History 52
   3. Conclusions 67

4. The Theoretical Toolkit of this Book 68
   1. Levels of Analysis 68
   2. Sectors of Analysis 72
   3. Sources of Explanation 77
   4. Conclusions 88

5. Establishing Criteria for International Systems 90
   1. First Order Problems of Definition 90
PART II: SYSTEMS IN PRE-INTERNATIONAL WORLD HISTORY

Introduction to Part II

6. The Origins of Pre-international Systems
   1. Theoretical Interest in the Pre-international
   2. Units
   3. Interaction Capacity
   4. Process
   5. Structure
   6. Conclusions

7. The Transition from Pre-international to International Systems
   1. Units
   2. Interaction Capacity
   3. Process
   4. Structure

Conclusion to Part II

PART III: THE RISE AND INTERLINKAGE OF MULTIPLE INTERNATIONAL SYSTEMS IN THE ANCIENT AND CLASSICAL WORLD

Introduction to Part III

8. The New Units: City-States, Empires, and Barbarians as the Main Actors of the Ancient and Classical World
   1. City-States and Empires
   2. Nomadic Tribes and their Empires
   3. Conclusions

9. Interaction Capacity in Ancient and Classical International Systems
   1. Physical Technologies of Transportation and Communication
   2. Social Technologies of Transportation and Communication
   3. Conclusions

    1. Military-Political Process
    2. Economic Process
3. Societal Process 223
4. Environmental Process 226
5. Conclusions 227

11. Structure in Ancient and Classical International Systems 228
1. Military-Political Structure 228
2. Economic Structure 233
3. Societal Structure 235
4. Conclusions 238

Conclusion to Part III 239

PART IV: THE ESTABLISHMENT AND EVOLUTION OF A GLOBAL INTERNATIONAL SYSTEM 241

Introduction to Part IV 241

12. Units in the Modern International System 243
1. Introduction 243
2. Europe and the Rise of the Modern State 246
3. The Evolution of the Modern State 251
4. The Spread of the Modern State and the Demise of Older Unit Types 256
5. The Development of Non-state Units 266
6. Conclusions 274

13. Interaction Capacity in the Modern International System 276
1. Introduction 276
2. Physical Technologies 276
3. Social Technologies 288
4. Conclusions 295

14. Process in the Modern International System 300
1. Introduction 300
2. Military-Political Process 302
3. Economic Process 306
4. Societal Process 316
5. Environmental Process 325
6. Conclusions 328

15. Structure in the Modern International System 330
1. Introduction 330
2. Military-Political Structure 331
3. Economic Structure 334
4. Societal Structure 336
5. Conclusions 341

Conclusion to Part IV 344

PART V: SPECULATIONS, ASSESSMENTS, REFLECTIONS 347

Introduction to Part V 347

   1. Introduction 349
   2. Scale 350
   3. Interaction Capacity 350
   4. Process 353
   5. Units 358
   6. Structure 362
   7. Conclusions 368

17. What World History Tells us about International Relations Theory 369
   1. International System 369
   2. Units 374
   3. Interaction Capacity 378
   4. Process 379
   5. Structure 382
   6. Conclusions 385

18. What International Relations Theory Tells us about World History 386
   1. Periodization and World History 386
   2. Periodization and IR Theory 389
   3. Competing Approaches to the Periodization of World History 393
   4. Summary of the Chronology of World History Derived from our Framework 405

19. Reflections 407
   1. World History and International Systems 407
   2. Weak and Strong International Systems 409
   3. An End and a Beginning 414

LIST OF FIGURES

4.1 Levels and sectors in the international system 77
5.1 Linear and multiordinate international systems 97
5.2 The Eurasian model: multiple full international systems embedded in an economic international system 100
6.1 The hexagonal lattice model of HGB systems 121
7.1 The demise of small-scale units 140
7.2 Hierarchy of settlements 142
7.3 Linguistic diversity 144
8.1 Watson's model of functional differentiation within empires 179
8.2 The 'international' structure of empires 180
12.1 The feudal system: multiple overlapping sovereignties 245
12.2 The evolution of government in the modern state 254
12.3 The basic form of the Westphalian international system of states 265
16.1 The basic form of the postmodern international system 367
18.1 Pre-international and international systems in world history 390
18.2 Comparative periodization: primary turning points in world history 394
